The Royal Inscriptions of Esarhaddon, King of Assyria (680-669 BC) Erle Leichty, 2011-06-23 The Royal Inscription of Esarhaddon, King of Assyria (680-669 BC) is the inaugural volume of the Royal Inscriptions of the Neo-Assyrian Period Project. The volume provides reliable, up-to-date editions of all of the known royal inscriptions of Esarhaddon, a son of Sennacherib who ruled Assyria for twelve years (680-669 BC). Editions of 143 firmly identifiable texts (which mostly describe successful battles and the completion of building projects, all done ad maiorem gloriam deorum), 29 poorly preserved late Neo-Assyrian inscriptions that may be attributed to him, and 10 inscriptions commissioned by his mother Naqia (Zakutu) and his wife Esharra-hammat are included. To make this corpus more user-friendly to both specialist and laymen, each text edition (with its English translation) is supplied with a brief introduction containing general information, a catalogue containing basic information about all exemplars, a commentary containing further technical information and notes, and a comprehensive bibliography (arranged chronologically from earliest to latest). The volume also includes: (1) a general introduction to the reign of Esarhaddon, the corpus of inscriptions, previous studies, and dating and chronology; (2) translations of the relevant passages of three Mesopotamian chronicles; (3) 19 photographs of objects inscribed with texts of Esarhaddon; (4) indexes of museum and excavation numbers and selected publications; and (5) indexes of proper names (Personal Names; Geographic, Ethnic, and Tribal Names; Divine, Planet, and Star Names; Gate, Palace, Temple, and Wall Names; and Object Names). The book is accompanied by a CD-ROM containing transliterations of selected inscriptions arranged in a 'musical score' format. The Royal Inscriptions of the Neo-Assyrian Period (RINAP) series will present up-to-date editions of the royal inscriptions of a number of late Neo-Assyrian rulers, beginning with Tiglath-pileser III (744-727 BC). This new series is modeled on the publications of the now-defunct Royal Inscriptions of Mesopotamia (RIM) series and will carry on where its RIMA (Royal Inscriptions of Mesopotamia, Assyrian Periods) publications ended. The project is under the direction of G. Frame (University of Pennsylvania) and is supported by the National Endowment for the Humanities.

Historical Anthology of Music: Oriental, medieval and Renaissance music Archibald Thompson Davison, Willi Apel, 1949 This great anthology of music literature makes available to all music lovers a wonderful storehouse of hitherto inaccessible treasure. The volume includes the development of Oriental, Medieval, and Renaissance music from the beginning to 1600. Its more than 200 representative examples are individually complete compositions, each of sufficient length to illustrate clearly a form or style. The authors provide an explanatory commentary with bibliography, English translations of foreign texts, and an index. The Library Journal says of it, in short, Volume 1 of the music historian's classic dreams...No competitors on the market. Highly recommended.

Literacy Development in A Multilingual Context Aydin Y. Durgunoglu, Ludo Verhoeven, 2013-12-16 During the past decades, literacy has gradually become a major concern all over the world. Though there is a great diversity in both the distribution and degree of literacy in different countries, there has been an increasing awareness of the number of illiterates and the consequences of being illiterate. However, literacy is no longer seen as a universal trait. When one focuses on culturally-sensitive accounts of reading and writing practices, the concept of literacy as a single trait does not seem very feasible. A multiplicity of literacy practices can be distinguished which are related to specific cultural contexts and associated with relations of power and ideology. As such, literacy can

be seen as a lifelong context-bound set of practices in which an individual's needs vary with time and place. This volume explores the use of literacy outside the mainstream in different contexts throughout the world. It is divided into four sections. Section 1 presents an anthropological perspective--analyzing the society and the individual in a society. Section 2 presents a psychological perspective--focusing on the individuals themselves and analyzing the cognitive and affective development of young children as they acquire literacy in their first and second languages. Section 3 presents an educational perspective--highlighting the variations in educational approaches in different societies as well as the outcomes of these approaches. Section 4 summarizes the studies presented in this volume. Both theoretical issues and educational implications related to the development of literacy in two languages are discussed. An attempt is also made to open up new directions in the study of literacy development in multilingual contexts by bringing these various disciplinary perspectives together.

Conceptual Graphs and Fuzzy Logic Tru Hoang Cao,2010-07-15 In this volume, first we formulate a framework of fuzzy types to represent both partial truth and uncertainty about concept and relation types in conceptual graphs. Like fuzzy attribute values, fuzzy types also form a lattice laying a common ground for lattice-based computation of fuzzy granules. Second, for automated reasoning with fuzzy conceptual graphs, we develop foundations of order-sorted fuzzy set logic programming, extending the theory of annotated logic programs of Kifer and Subrahmanian (1992). Third, we show some recent applications of fuzzy conceptual graphs to modelling and computing with generally quantified statements, approximate knowledge retrieval, and natural language query understanding.

Converged Networking Chris McDonald,2003-03-31 This volume forms the edited proceedings of the Sixth International Symposium on Communications Interworking, held in Perth, Western Australia, from 13-16 October, 2002. In total, 39 research papers were submitted for consideration, and after full refereeing by international referees, 27 papers from authors in 11 countries were accepted for publication. Invited keynote addresses were presented by Dr Hugh Bradlow, Chief Technology Officer for Telstra Corporation, Australia, and Dr Sathya Rao, Director of Telscom A.G., Switzerland. The symposium brought together 60 active international researchers and telecommunications engineers to discuss the important questions as to whether there is a convergence of all communications, including real-time communications, over the Internet Protocol (IP), and whether existing IP technology is capable of supporting this convergence, or whether it requires further development of that technology. The papers selected to appear in this volume make an important and timely contribution to this debate. Specific symposium paper sessions were held to present and discuss emerging research on the topics of converged networking, real-time communications over IP, quality of service, routing and metrics, emerging issues in mobile networks, differentiated services, and wireless networking.

Galen: Writings on Health ,2023-03-09 Galen's Health (*De sanitate tuenda*) was the most important work on daily exercise, diet and health regimes in antiquity. This book presents the first reliable scholarly translation of this work in English, alongside the related theoretical work *Thrasylbulus*. A substantial introduction and thorough annotation elucidate both works and contextualize them within the framework of ancient health practices, ancient conceptions of the body and debates between medical and philosophical schools. The texts are of enormous interest from three points of view: (1) the wide range of insights they give into ancient everyday lifestyles, especially as regards diet, bathing, exercise and materia medica, as well as aspects of daily intellectual life; (2) the light they shed on ancient debates within medicine and philosophy, on fundamental conceptions of the body and the relationship between body and mind; (3) the enormous influence that Health had in mediaeval and early modern times.
