Intimate Relationships in Cinema, Literature and Visual Culture Gilad Padva, Nurit

Buchweitz,2017-10-04 This edited volume is an inquiry into the representation of intimate relationships in a diverse array of media including cinema, arts, literature, picture books, advertising and popular music. It examines artistic portrayal of intimate relationships as a subversion of the boundaries between the representable and the non-representable, the real and the surreal, the visceral and the ideal, the embodied and the abstracted, the configured and transfigured. The essays focus on artistic mediation of intimacy in diverse relationships, including heterosexual, same-sex, familial, sibling' , political, and sadomasochistic. The collection offers new interdisciplinary and multicultural perspectives on current trends in the study of popular representations of intimacy; representations that affect and formulate people's most personal inspirations, desires, angsts, dreams and nightmares in an increasingly alienated, industrialized world.

Digital Platforms and the Global South Philippe Bouquillion, Christine Ithurbide, Tristan

Mattelart,2023-12-01 This book addresses the issues raised by digital platforms in the Global South, with an emphasis on the cultural stakes involved. It brings together an interdisciplinary team of researchers – including political economists, socio-economists, geographers, media sociologists or anthropologists – who each explore these issues through an insightful case study at a local, national, regional or international scale. While studying the strategies of some of the main US-based Big Tech platforms or video streaming platforms towards the Global South, the chapters also consider the often-neglected active role local or regional actors play in the expansion of those Western digital players, and highlight the existence of a constellation of local or regional platforms that have emerged in Africa, Asia, Latin America or the Middle East. In addition to analysing the complex relationships of competition, collaboration or dependence between these diverse actors, this volume examines the ways in which the rise of these digital platforms has generated new forms of cultural entrepreneurship and participated in the reconfiguring of the conditions in which cultural contents are produced and circulated in the Global South. This volume will appeal to readers interested in the transnationalisation of cultural industries or in the social, political, economic, cultural and geopolitical dimensions of digital transformations and will be an important resource for students, teachers and researchers in media, communication, cultural studies, international relations and area studies programmes.
