The Report: Turkey 2012 , 2012

The Report: Turkey 2013 ,

The Business Year: Turkey 2020 , 2019-12-20 Much has changed in the Turkish

economy since The Business Year's last publication on the country in 2016. Then, the economy was experiencing a sustained period of high growth at a time when much of the rest of the world was still struggling to recover from the global recession. On our 2019 return to Turkey to produce this publication, the country was in the grip of a sharp drop in its currency's value and the onset of economic recession. Beleaguered by high interest rates and a decline in domestic consumer demand, companies canceled planned investments and corporate loans began souring. Despite this, the year ended optimistically, with the economy beating growth estimates, inflation reined in, and lower global and domestic interest rates providing a needed boost in investment activity. The Business Year's country-specific publications, sometimes featuring over 150 face-to-face interviews, are among the most comprehensive annual economic publications available internationally.

Technology and National Identity in Turkey Burce Celik, 2011-08-30 Since the fall of the Ottoman Empire, Turkey has seen a complete re-imagining of its political, cultural and social landscape. Burce Celik argues that technology has been integral to this transformative process, showing how take-up of modern technologies, such as the cell or mobile phone, has been embraced particularly by those who most easily absorbed new ideals about Turkey and

modern Turkishness. While many studies on the cultural significance of mobile technology focus on its rational uses and incentives, A elik draws on cultural theory, psychoanalysis and the philosophy of technology to explore the bonds, desires and dependencies that Turkish citizens have in relation to the cell phone. She ultimately links a collective post-empire melancholia with a desire to re-imagine a new, ideal Turkish national identity through technology.

The Brussels Effect Anu Bradford, 2020-01-27 For many observers, the European Union is mired in a deep crisis. Between sluggish growth; political turmoil following a decade of austerity politics; Brexit; and the rise of Asian influence, the EU is seen as a declining power on the world stage. Columbia Law professor Anu Bradford argues the opposite in her important new book The Brussels Effect: the EU remains an influential superpower that shapes the world in its image. By promulgating regulations that shape the international business environment, elevating standards worldwide, and leading to a notable Europeanization of many important aspects of global commerce, the EU has managed to shape policy in areas such as data privacy, consumer health and safety, environmental protection, antitrust, and online hate speech. And in contrast to how superpowers wield their global influence, the Brussels Effect – a phrase first coined by Bradford in 2012– absolves the EU from playing a direct role in imposing standards, as market forces alone are often sufficient as multinational companies voluntarily extend the EU

rule to govern their global operations. The Brussels Effect shows how the EU has acquired such power, why multinational companies use EU standards as global standards, and why the EU's role as the world's regulator is likely to outlive its gradual economic decline, extending the EU's influence long into the future.
