Handover of Power - Foreign Affairs Andreas Seidl,2022-08-25 Foreign policy rethought Do you sometimes worry that globalisation is doing you more damage than good? And do you also wish for a similar standard of living for all humans in this world? What kind of policy can unify states without war and avoid the causes of flight? This book tells us: ... how an International Union can look like, in which states - depending on the willingness of their peoples - gradually unify their actions and unite democratically. ... how underdeveloped countries are developed one after the other through education and infrastructure so that the population there can help itself. ... how to reduce transnational exploitation and crime and build the united states of the world. After 20 years of work on this book series, Andreas Seidl thus ventures a step towards founding a party. In doing so, he entertains his readers both intellectually and visionarily. If this work can give you hope, inspire you or move you to action, it has fulfilled its purpose. Available in German and English

Broadcast Journalism Peter Stewart,Ray Alexander,2021-09-14 Now in its 8th edition, Broadcast Journalism continues to be an essential text on the production of news broadcasting and the practical skills needed. It includes not only basic techniques and classic examples for the production of radio and TV news, but also new technology and the latest case studies. The fundamental skills of interviewing, news writing and production now have to cope with the prevalence of Fake News and Deep Fakes and verifying content in an endless flow of social media. This edition also includes newsgathering with mobile devices, live reporting and using data and graphics. There are dozens of new images and links for downloads and further reading, plus end-of-chapter exercises and tutor notes. This continues to be an indispensable textbook for broadcast journalism and communications students looking for an in-depth guide to the industry.

Application of Big Data for National Security Babak Akhgar,Gregory B. Saathoff,Hamid R Arabnia,Richard Hill,Andrew Staniforth,Petra Saskia Bayerl,2015-02-19 Application of Big Data for National Security provides users with state-of-the-art concepts, methods, and technologies for Big Data analytics in the fight against terrorism and crime, including a wide range of case studies and application scenarios. This book combines expertise from an international team of experts in law enforcement, national security, and law, as well as computer sciences, criminology, linguistics, and psychology, creating a unique cross-disciplinary collection of knowledge and insights into this increasingly global issue. The strategic frameworks and critical factors presented in Application of Big Data for National Security consider technical, legal, ethical, and societal impacts, but also practical considerations of Big Data system design and deployment, illustrating how data and security concerns intersect. In identifying current and future technical and operational challenges it supports law enforcement and government agencies in their operational, tactical and strategic decisions when employing Big Data for national security Contextualizes the Big Data concept and how it relates to national security and crime detection and prevention Presents strategic approaches for the design, adoption, and deployment of Big Data technologies in preventing terrorism and reducing crime Includes a series of case studies and scenarios to demonstrate the application of Big Data in a national security context Indicates future directions for Big Data as an enabler of advanced crime prevention and detection

Double Gifted Douglas Palma,2020-04-24 In a city where teenagers are born with the gifts of magic or superpowers (or both) comes a story about fourteen-year-old Emma who is on the edge of entering high school and trying desperately to figure out the gifts she was born with. High school and life are hard enough for teenagers who are born double gifted; but on Emma's first day of school, she is lucky enough to meet Jack, a fellow freshman who can help her navigate through it all. But both Emma and Jack need to be careful. There is a secret organization that is out to separate the double-gifted citizens from the rest of the city that both Emma's and Jack's families call home.

The Shaping of News Julie Firmstone,2023-09-23 This book provides readers with the understanding required to analyse the range of key factors that shape the production of news, and to assess their implications for the role of news and journalism in democracy. It brings existing research together under the umbrella of a central organising framework to explore how news and its production is shaped by a multiplicity of factors including the norms, values, role perceptions and ethics associated with journalism as a profession, the role of news sources, the changing character and significance of news audiences, the aims and objectives of news organisations, and the political, economic and social contexts within which news is produced. Exploring these factors in depth, using examples, and considering the changing conditions of news production, the chapters chart significant changes, challenges, and responses to provide the essential background for understanding the consequences of current transformations for the democratic

qualities of news.

Handover of Power - Innovation Andreas Seidl,2022-08-25 Innovation rethought Do you sometimes worry that important innovations are introduced too late? And do you also wish for an implementation of your good ideas? How can promising inventions be implemented quickly and easily? This book tells us: ... how inventors can find suitable researchers, industrial property rights, investors, producers and customers in a directory. ... how the linking of education, research and development can provide a mass of skilled workers who invent and implement innovations at lightning speed. ... which path innovations can take when they are implemented in a large state-owned company until patent protection expires. After 20 years of work on this book series, Andreas Seidl thus ventures a step towards founding a party. In doing so, he entertains his readers both intellectually and visionarily. If this work can give you hope, inspire you or move you to action, it has fulfilled its purpose. Available in German and English

Fox 8 George Saunders,2013-04-09 From the #1 New York Times bestselling author of Lincoln in the Bardo, a darkly comic short story about the unintended consequences unleashed by our quest to tame the natural world—featuring gorgeous black-and-white illustrations by Chelsea Cardinal. Fox 8 has always been known as the daydreamer in his pack, the one his fellow foxes regard with a knowing snort and a roll of the eyes. That is, until he develops a unique skill: He teaches himself to speak “Yuman” by hiding in the bushes outside a house and listening to children’s bedtime stories. The power of language fuels his abundant curiosity about people—even after “danjer” arrives in the form of a new shopping mall that cuts off his food supply, sending Fox 8 on a harrowing quest to help save his pack. Told with his distinctive blend of humor and pathos, Fox 8 showcases the extraordinary imaginative talents of George Saunders, whom The New York Times called “the writer for our time.”

Multimedia and Internet Systems: Theory and Practice Aleksander Zgrzywa,Kazimierz Choroś,Andrzej Siemiński,2012-08-16 Aleksander Zgrzywa, Kazimierz Choroś, and Andrzej Siemiński (Eds.) Multimedia and Internet Systems: Theory and Practice During the last 20 years we have witnessed a rapid development of Multimedia and Network Information Systems. What is even more important, the pace of change does not show any sign of slowing. When we look back we see how many research projects that have originated at various universities or in research facilities are now part of our everyday life. This monograph offers the reader a very broad review of the most recent scientific investigations in that area. The book is a collection of carefully selected and the most representative investigations, solutions, and applications presented by scientific teams from several countries. The content of the monograph has been divided into four parts: 1. Multimedia Information Technology 2. Information Systems Specification 3. Information Systems Applications 4. Web Systems and Network Technologies The book is aiming to attract more scholars to work on the area of multimedia and Internet applications and to inspire the research community already working on the domain.
