Twinmaker Sean Williams, 2013-11-05 M. T. Anderson meets Cory Doctorow in this teen debut from #1 New York Times bestseller Sean Williams, who also coauthors the Troubletwisters series with Garth Nix. When a coded note promises improvement—the chance to change your body any way you want, making it stronger, taller, more beautiful—Clair thinks it's too good to be true, but her best friend, Libby, falls into a deadly trap. With the help of the school freak and a mysterious stranger, Clair races against the clock and around the world to save Libby, even as every step draws her deeper into a deadly world of cover-ups and conspiracies. Action and danger fuel this near-future tale of technology, identity, and the lengths one girl will go to save her best friend.

Crash: Twinmaker 2 Sean Williams, 2014-11-01 Praise for *Jump*: 'A thrilling, existential head-trip' - Alaya Dawn Johnson If you betrayed a friend, how far would you go to earn their forgiveness? If someone had saved your life, would you risk your life to save them? If you could bring someone back from the dead, who would you choose? Clair and Jesse have barely been reunited when the world is plunged into crisis - the d-mat network is broken. People are trapped, injured and dying, and it's partly Clair's fault. Peacekeepers enlist Clair to track down Q, the rogue AI - artificial intelligence - who saved her life and is the key to fixing the system. Targeted by dupes and abandoned by her friends, Clair finds powerful allies in the most unlikely places. But who can she trust? Q won't respond to her calls for help, and if Clair finds her, will she be trapping her friend in a life of servitude or sending her to death by erasure? Caught between pro- and anti-d-mat philosophies, in a world on the brink of all-out war, Clair must decide where she stands - and who she stands with - at the end.

Fall: Twinmaker 3 Sean Williams, 2015-10-21 Action and danger fuel this near-future thriller in a fresh take on technology, identity, and the lengths one girl will go to save her best friend. The explosive conclusion to the Twinmaker series. Clair's world has been destroyed - again. The only remaining hope of saving her friends is for her and Q to enter the Yard, a digital world of Ant Wallace's creation. The rules there are the same as those of the real world: water is real; fire is real; death is real. It all looks exactly the same as the world she used to know. But in the Yard there are two Clair Hills, and their very existence causes cracks that steadily widen. Getting inside is the easy part. Once there, Clair has to earn the trust of her friends, including the girl who started it all - her best friend, Libby. But they don't know what's happened to the real world, and the other Clair is headstrong, impulsive, suspicious - just like Clair herself used to be. And that makes her dangerous. As Clair struggles to find Jesse and make peace with herself, a surprising new ally emerges from the ashes of the world. Together they fight their way through the digital and political minefield in the hope of saving the world once and for all. This time Clair has to get it right or lose everything. Praise for Twinmaker: Fall: 'The final act is packed with surprises that make perfect sense in retrospect. A philosophical marathon.' Kirkus

The Resurrected Man Sean Williams, 2010-04-07 Private detective Jonah McEwen is wanted for murder. Someone has been killing women who resemble Marilyn Blaylock, his former colleague and ex-lover. The latest grisly discovery is right on his doorstep. He is the obvious suspect. The problem? He has been in a coma for three years - a coma he has no memory of entering. And there's worse to come. Using matter transporter technology, or d-mat, a serial killer known only as the Twinmaker has been brutally torturing and killing perfect facsimiles of his victims and leaving the originals alive. As legal arguments rage about whether this even constitutes murder, Jonah finds himself in the awkward position of defending his innocence when his own exact copy might actually be guilty. Set in a time where the lines between human and machine are increasingly blurred, The Resurrected Man explores the future of terrorism, law enforcement, and globe-spanning conspiracies. A perfect blend of suspense and science fiction, the novel follows the complexities of Jonah and Marilyn's relationship and their quest to find the killer before he strikes again, as well as unravelling the tensions between Jonah and his father - a man who has been dead for three years but who might yet hold the key to everything... Nominated for the Aurealis Award and winner of the Ditmar Award, The Resurrected Man was hailed as a tour de force in Australia, the author's home country, and described as compulsively readable by Locus.

We Know It When We See It Richard Masland,2021-01-07 Spotting a face in a crowd is so easy, you take it for granted. But how you do it is one of science's great mysteries. Vision is involved in nearly a third of everything a brain does and explaining how it works reveals more than just how we see. It also tells us how the brain processes information – how it perceives, learns and remembers. In *We Know It When We See It*, pioneering neuroscientist Richard Masland covers everything from what happens when light hits your retina, to the increasingly sophisticated nerve nets that turn that light into knowledge, to what a computer algorithm must be able to do before it can truly be called 'intelligent'. It is a profound yet accessible investigation into how our bodies make sense of the world.

Predictive Analytics in Cloud, Fog, and Edge Computing Hiren Kumar Thakkar, Chinmaya Kumar Dehury, Prasan Kumar Sahoo, Bharadwaj Veeravalli, 2022-12-16 This book covers the relationship of recent technologies (such as Blockchain, IoT, and 5G) with the cloud computing as well as fog computing, and mobile edge computing. The relationship will not be limited to only architecture proposal, trends, and technical advancements. However, the book also explores the possibility of predictive analytics in cloud computing with respect to Blockchain, IoT, and 5G. The recent advancements in the internet-supported distributed computing i.e. cloud computing, has made it possible to process the bulk amount of data in a parallel and distributed. This has made it a lucrative technology to process the data generated from technologies such as Blockchain, IoT, and 5G. However, there are several issues

a Cloud Service Provider (CSP) encounters, such as Blockchain security in cloud, IoT elasticity and scalability management in cloud, Service Level Agreement (SLA) compliances for 5G, Resource management, Load balancing, and Fault-tolerance. This edited book will discuss the aforementioned issues in connection with Blockchain, IoT, and 5G. Moreover, the book discusses how the cloud computing is not sufficient and one needs to use fog computing, and edge computing to efficiently process the data generated from IoT, and 5G. Moreover, the book shows how smart city, smart healthcare system, and smart communities are few of the most relevant IoT applications where fog computing plays a significant role. The book discusses the limitation of fog computing and the need for the edge computing to further reduce the network latency to process streaming data from IoT devices. The book also explores power of predictive analytics of Blockchain, IoT, and 5G data in cloud computing with its sister technologies. Since, the amount of resources increases day-by day, artificial intelligence (AI) tools are becoming more popular due to their capability which can be used in solving wide variety of issues, such as minimize the energy consumption of physical servers, optimize the service cost, improve the quality of experience, increase the service availability, efficiently handle the huge data flow, manages the large number of IoT devices, etc.
