**Designing Enterprise Applications with the J2EE Platform** Inderjeet Singh,2002 Following her widely acclaimedAutobiography of Red(A spellbinding achievement --Susan Sontag), a new collection of poetry and prose that displays Anne Carson's signature mixture of opposites--the classic and the modern, cinema and print, narrative and verse. InMen in the Off Hours, Carson reinvents figures as diverse as Oedipus, Emily Dickinson, and Audubon. She views the writings of Sappho, St. Augustine, and Catullus through a modern lens. She sets up startling juxtapositions (Lazarus among video paraphernalia; Virginia Woolf and Thucydides discussing war). And in a final prose poem, she meditates on the recent death of her mother. With its quiet, acute spirituality, its fearless wit and sensuality, and its joyful understanding that the fact of the matter for humans is imperfection,Men in the Off Hoursshow us the most exciting poet writing in English today (Michael Ondaatje) at her best. **Leading in the Digital World** Amit S. Mukherjee,2020-02-25 The definitive book on leadership in the digital era: why digital technologies call for leadership that emphasizes creativity, collaboration, and inclusivity. Certain ideas about business leadership are held to be timeless, and certain characteristics of leaders—often including a square jaw, a deep voice, and extroversion—are said to be universal. In Leading in the Digital World, Amit Mukherjee argues that since digital technologies are changing everything else, how could they not change leadership ideologies and styles? As more people worldwide participate equally in business, those assumptions of a leader's ideal profile have become irrelevant. Offering a radical rethinking of leadership, Mukherjee shows why digital technologies call for a new kind of leader—one who emphasizes creativity, collaboration, and inclusivity. Drawing on a global survey of 700 mid-tier to senior executives and interviews with C-level executives from around the world, Mukherjee explains how digital technologies are already reshaping organizations and work and what this means for leaders. For example, globally dispersed businesses can't reserve key leadership roles for people from exclusive groups; leadership must become inclusive, or fail. Leaders must learn to collaborate in a multipolar world of networked organizations, working with co-located and non-co-located colleagues. Leaders must lead for creativity rather than productivity. Focusing on practice, Mukherjee outlines goals and strategies, warns against unthinking assumptions, and explains how leaders can identify the mindsets, behaviors, and actions they need to pursue. With Leading in the Digital World, Mukherjee offers the definitive book on leadership for the digital era.

*FlowingData.com Data Visualization Set* Nathan Yau, 2014-03-17 Visualize This is a guide on how to visualize and tell stories with data, providing practical design tips complemented with step-by-step tutorials. It begins with a description of the huge growth of data and visualization in industry, news, and gov't and opportunities for those who tell stories with data. Logically it moves on to actual stories in data-statistical ones with trends and human stories. The technical part comes up quickly with how to gather, parse and format data with Python, R, Excel, Google docs, etc and details tools to visualize data-native graphics for the Web like ActionScript, Flash libraries, PHP, JavaScript, CSS, HTML. Every chapter provides an example as well. Patterns over time and kinds of data charts are followed by proportions, chart types and examples. Next, examples and descriptions of outliers and how to show them, different kinds of maps, how to guide your readers and explain the data in the visualization. The book ends with a value-add appendix on graphical perception. Data Points focuses on the approach to visualization and data. Visualization is a medium that can be used as a tool, art, a way to tell stories, etc., Data Points guides readers through making data approachable through visualization techniques and best practices. The focus is on designing with a purpose in mind. Data Points discusses why recipes (from the rules) work and expands on how readers can make their own recipes. The book is example-driven, featuring work from people in areas of art, design, business, statistics, computer science, cartography, and online media, as well as many of the author's own illustrations. The major sections of the book cover: Visualization as Medium -- In the same way not all movies are documentaries, not all visualization is about optimal visual perception. Data Representation -- There are rules across all visualization applications, such as the use of appropriate shapes to accurately represent values. Design with Purpose -- Rules can be broken though. It all depends on who and what you're designing for. Data Points digs deep into the foundations of data visualization: Understanding Data and Visualization Representing Data Exploring Data Visually Designing for an Audience Visualizing with Clarity Putting Everything Into Practice with Tools and Resources

Data Structures and Algorithms in Java Michael T. Goodrich,Roberto Tamassia,Michael H. Goldwasser,2014-06-16 The design and analysis of efficient data structures has long been recognized as a key component of the Computer Science curriculum. Goodrich and Tomassia's approach to this classic topic is based on the object-oriented paradigm as the framework of choice for the design of data structures. For each ADT presented in the text, the authors provide an associated Java interface. Concrete data structures realizing the ADTs are provided as Java classes implementing the interfaces. The Java code implementing fundamental data structures in this book is organized in a single Java package, net.datastructures. This package forms a coherent library of data structures and algorithms in Java specifically designed for educational purposes in a way that is complimentary with the Java Collections Framework.
