What does a toddler say when she drops her sunglasses in the sand? Uh-Oh! What does she say when a seagull lands on her sandcastle? Uh-Oh! What does she say when she finds a crab in her pail? Uh-Oh! And what does she say when a big wave is coming? That’s the biggest Uh-Oh! of all! This nearly wordless story of toddler adventure perfectly captures the dynamics between the youngest friends and the sheer pleasure of that favorite toddler word: Uh-Oh!

- 📖 **Tales from the 1980 Louisville Cardinals** Jim Terhune,2004 Negative vibes echoed through the athletic environs of the University of Louisville campus like claps of thunder in 1979. The coughs and sputters of the engine that had always driven U of L sports--basketball--was concerning to an athletic department that was under fire for the failings of its football team and its athletic director. Basketball coach Denny Crum had taken the Cardinals to two NCAA Final Fours in his first four seasons. Louisville had not been able to win the great prize, but its runs had given rise to great expectations. His next four squads burst out of the blocks with lightning speed, too. When each one wheezed in late February and came to a halt in mid-March, however, great hopes turned into great grumblings. Could Crum ever win the big one? Eighty-three minutes and 27 seconds into the season, the fifth starter, Scooter McCray, went out for good with a torn knee ligament. His replacement was brother Rodney, a freshman who had arrived in poor condition and with a poor attitude. We’ll be lucky to win 15 games, Crum said. He had never won fewer than 20 in any of his eight campaigns, but no one argued with this pronouncement. Yet with a rookie, three sophomores, and star Darrell Griffith and his 48-inch vertical leap in the lineup, strange, zany, and enchanting things began to happen Wiley Brown was given a bionic thumb, and the prosthesis not only apparently helped his rebounding, but also stayed on most of the time. Manchild small forward Derek Smith talked of being from Jupiter one night and snatched 15 rebounds with his Goliath-sized hands the next. Reserve Roger Burkman’s demolition derby aggression earned him the pen name Instant Defense while sub PonchoWright’s cloud-tickling jumpers and jaw-dropping dunks got him the Instant Offense title. Rodney McCray transformed himself into an indispensable man not overnight, but over the course of a few minutes when his sibling went down. Above all this, quite literally and figuratively, was Griffith. He led as an athlete, by his graciousness and classy demeanor. They became a team that put winning above everything. Each of them would have welcomed any of the others into a foxhole. The discombobulated basketball team set an impossibly high standard of bonding through diversity and adversity and promptly answered that question posed by Crum’s peers. Yes, he could win the big one.

- 📖 **Developer’s Dilemma** Casey O’Donnell,2014-11-21 An examination of work—including the organization of work and the market forces that surround it—through the lens of the collaborative practice of game development. Rank-and-file game developers bring videogames from concept to product, and yet their work is almost invisible, hidden behind the famous names of publishers, executives, or console manufacturers. In this book, Casey O’Donnell examines the creative collaborative practice of typical game developers. His investigation of why game developers work the way they do sheds light on our understanding of work, the organization of work, and the market forces that shape (and are shaped by) media industries. O’Donnell shows that the ability to play with the underlying systems—technical, conceptual, and social—is at the core of creative and collaborative practice, which is central to the New Economy. When access to underlying systems is undermined, so too is creative collaborative process. Drawing on extensive fieldwork in game studios in the United States and India, O’Donnell stakes out new territory empirically, conceptually, and methodologically. Mimicking the structure of videogames, the book is divided into worlds, within which are levels; and each world ends with a boss fight, a “rant” about lessons learned and tools mastered. O’Donnell describes the process of videogame development from pre-production through production, considering such aspects as experimental systems, “socially mandatory” overtime, and the perpetual startup machine that exhausts young, initially enthusiastic workers. He links work

PRACTICE TO BROADER SYSTEMS OF PUBLISHING, MANUFACTURING, AND DISTRIBUTION; INTRODUCES THE CONCEPT OF A PRIVILEGED “ACTOR-INTRA-INTERNETWORK”; AND DESCRIBES PATENT AND COPYRIGHT ENFORCEMENT BY INDUSTRY AND THE STATE.
