The Digital Future of Hospitality Lindsay Anne Balfour, 2023-03-31 This book asks how an unconditional welcome to strangers is both challenged and made possible by new digital technologies, machine learning, and human-computer interaction (HCI). It argues that the digital – the advancement of data, the proliferation of machines (embodied or not) in our homes and on our screens, and the millions of lines of code that organize and predict our lives – is not the absence of hospitality but rather the beginning, though not without its challenges. While such an ethic remains more important than ever, *The Digital Future of Hospitality* updates this enduring philosophical imperative for digital times. Through the lens of cultural studies, intersectional feminism, and posthumanism, this book reanimates hospitality in relation to a series of digital texts that are relevant to the twenty-first century and beyond – android figures on television, virtual domestic assistants, home- and ride-sharing apps, wearable devices, and a renewed cultural obsession with viruses and immunity.

Agricultural English Georgeta Rață, Florin Sala, Ionel Samfira, 2012-04-25 Agricultural English is a collection of essays on the English of Agriculture. The approach is a linguistic one: the different aspects of the English used in the field of agriculture (agricultural practices, agricultural systems) and in some fields related to agriculture (agricultural zoology, agri-tourism, biology, botany, ecology, entomology, gastronomy, land measurement, plant pathology, zoology) are analysed from a morphological (combination, derivation), syntactical (nominal phrases, verbal phrases), lexical and lexicographical, semantic (homonymy, semantic fields, synonymy, terminology), pragmatic (academic discourse, idiom, metaphor), etymological (etymon, Latin heritage), and contrastive (English-Croatian, English-French, English-German, English-Romanian, Romanian-English) points of view. The book will appeal to agriculturists, animal breeders, professors, researchers, students, and translators from Croatian-, English-, French-, German-, and Romanian-speaking countries, active in their own countries or abroad. The types of academic readership it would appeal to include academic teaching staff, researchers and students in the fields of agriculture and related fields – agricultural zoology, agri-tourism, biology, botany, ecology, entomology, gastronomy, land measurement, plant pathology, and zoology.
