High-Tc SQUIDS for Biomedical Applications: Immunoassays, Magnetoencephalography, and Ultra-Low Field Magnetic Resonance Imaging

Fredrik Öisjöen, 2012-07-25 This thesis describes the challenging task of developing high critical temperature superconducting quantum interference devices (high-Tc SQUIDS) and using them as sensors for biomedical applications, including magnetic immunoassays, magnetoencephalography and magnetic resonance imaging (MRI). The first part of this work discusses the development of fast magnetic immunoassays, which can be used to improve the sensitivity, or to create new, unique point-of-care diagnostics systems. The second part shows that high-Tc SQUIDS might make magnetoencephalography more available, thus opening the field of high-Tc SQUID-based magnetoencephalography for recording brain functions. This technique can be combined with ultra-low field MRI which is discussed in the last part. This combination may provide a new unique tool for studies of brain functions. This work does not simply improve on existing technology but opens possibilities for novel advanced medical devices and techniques.

High Sensitivity Magnetometers Asaf Grosz, Michael J. Haji-Sheikh, Subhas C. Mukhopadhyay, 2016-09-20 This book gathers, for the first time, an overview of nearly all of the magnetic sensors that exist today. The book is offering the readers a thorough and comprehensive knowledge from basics to state-of-the-art and is therefore suitable for both beginners and experts. From the more common and popular AMR magnetometers and up to the recently developed NV center magnetometers, each chapter is describing a specific type of sensor and providing all the information that is necessary to understand the magnetometer behavior including theoretical background, noise model, materials, electronics, design and fabrication techniques, etc.

Ultra-Low Field Nuclear Magnetic Resonance Robert Kraus Jr., Michelle Espy, Per Magnelind, Petr Volegov, 2014-02-26 This book is designed to introduce the reader to the field of NMR/MRI at very low magnetic fields, from milli-Tesla to micro-Tesla, the ultra-low field (ULF) regime. The book is focused on applications to imaging the human brain, and hardware methods primarily based upon pre-polarization methods and SQUID-based detection. The goal of the text is to provide insight and tools for the reader to better understand what applications are best served by ULF NMR/MRI approaches. A discussion of the hardware challenges, such as shielding, operation of SQUID sensors in a dynamic field environment, and pulsed magnetic field generation are presented. One goal of the text is to provide the reader a framework of understanding the approaches to estimation and mitigation of low signal-to-noise and long imaging time, which are the main challenges. Special attention is paid to the combination of MEG and ULF MRI, and the benefits and challenges presented by trying to accomplish both with the same hardware. The book discusses the origin of unique relaxation contrast at ULF, and special considerations for image artifacts and how to correct them (i.e. concomitant gradients, ghost artifacts). A general discussion of MRI, with special consideration to the challenges of imaging at ULF and unique opportunities in pulse sequences, is presented. The book also presents an overview of some of the primary applications of ULF NMR/MRI being pursued.

Scanner Data and Price Indexes Robert C. Feenstra,Matthew D. Shapiro,2007-11-01 Every time you buy a can of tuna or a new television, its bar code is scanned to record its price and other information. These scanner data offer a number of attractive features for economists and statisticians, because they are collected continuously, are available quickly, and record prices for all items sold, not just a statistical sample. But scanner data also present a number of difficulties for current statistical systems. *Scanner Data and Price Indexes* assesses both the promise and the challenges of using scanner data to produce economic statistics. Three papers present the results of work in progress at statistical agencies in the U.S., United Kingdom, and Canada, including a project at the U.S. Bureau of Labor Statistics to investigate the feasibility of incorporating scanner data into the monthly Consumer Price Index. Other papers demonstrate the enormous potential of using scanner data to test economic theories and estimate the parameters of economic models, and provide solutions for some of the problems that arise when using scanner data, such as dealing with missing data.

Finally, here, each chapter shows how leading companies are successfully marketing the particular product in the Indian market. WHAT IS NEW IN THIS EDITION : The new edition incorporates the challenges offered by many new trends like growth of modern trade, explosion of the media, and the increasing influence of rural market in India. Chapters on The Indian Market: Emerging Panorama, and New Marketing Challenges expose the students to contemporary concepts and examples. The Third Edition is more profusely illustrated with exhibits, diagrams and PPTs, and should be of immense utility and worth to the students of management as well as practising brand managers and executives in the advertising arena.

Marketing Strategies in Creating Brand Image of FMCG in India with Special Reference to Store Promotion Dr Astha Joshi Dr Geeta Nema,

The Noble, the Serf and the Revizor Daniel Beauvois, 2023-02-28 First published in 1991, *The Noble, the Serf and the Revizor* is a historical and sociological study of the Polish nobility of the Western Ukraine between the two great uprisings that shook Poland in the 19th century is based almost entirely on original, unpublished documents. Daniel Beauvois throws an entirely new light on the Polish nobility of the Ukraine, on its development and particular mentality. Furthermore, his research reveals mechanisms of domination and assimilation, which the Czarist bureaucracy can be said to have pioneered long before the Soviet empire. During this period, the Russian revizor, a key figure in the social drama described in these pages, ruthlessly lowered the status of the majority of the Polish nobles in the Ukraine. Thereafter, their fate was defined by two basic realities: poverty and the decline of their national identity and social status. Only a small minority of rich landowners survived. The price they paid was total political subservience, a subservience which gave rise to an increasingly conservative mentality and the loss of all real contact with the Polish national movement. This book will be of interest to students of history, political science, sociology and international relations.

Building Brands in the Indian Market Tapan Kumar Panda, 2004 How are brands built? Is an advertising campaign capable enough to build a brand? What are the criteria for making a brand successful? Is building and managing a brand in India different than elsewhere? How Customer Relationship Management shapes a branding paradigm? Do extensions dilute the master brand???? Many more intriguing questions answered in this book by researchers, academicians, CEOs, brand gurus and consultants.

Strategic Marketing Management in Asia Syed Saad Andaleeb, Khalid Hasan, 2016-12-22 With a view to continue the current growth momentum, excel in all phases of business, and create future leadership in Asia and across the globe, there is a felt need to develop a deep understanding of the Asian business environment, and how to create effective marketing strategies that will help growing their businesses.
