**Applications of Computer Vision in Fashion and Textiles** Calvin Wong,2017-10-20 Applications of Computer Vision in Fashion and Textiles provides a systematic and comprehensive discussion of three key areas that are taking advantage of developments in computer vision technology, namely textile defect detection and quality control, fashion recognition and 3D modeling, and 2D and 3D human body modeling for improving clothing fit. It introduces the fundamentals of computer vision techniques for fashion and textile applications, also reviewing computer vision techniques for textile quality control, including chapters on wavelet transforms, Gabor filters, Fourier transforms, and neural network techniques. Final sections cover recognition, modeling, retrieval technologies and advanced human shape modeling techniques. The book is essential reading for scientists and researchers working in the field of fashion production, quality assurance, product development, textiles, fashion supply chain managers, R&D professionals and managers in the textile industry. Explores computer vision technology with reference to improving budget, quality and schedule control in textile manufacturing Provides a thorough understanding of the role of computer vision in developing intelligent systems for the fashion and textiles industries Elucidates the connections between human body modeling technology and intelligent manufacturing systems

Fabric of Vision Anne Hollander,2016-09-22 Clothing appears in all forms of figurative painting, often taking up two thirds of a frame; yet it can often go unnoticed. Far more than a simple means of identifying the status or occupation of a figure, clothes and cloth are used creatively by artists to hint at ambiguities in character, adjust the emotional temperature, direct the eye or make subtle allusions. Drawing on works by artists over a period of six centuries, from Giotto to El Greco, Matisse to Cindy Sherman, the author reveals through paintings, fashion plates, photographs and film stills how drapery in art evolved from Renaissance extravagance to Neoclassical simplicity at the end of the 18th century, and has extended to infinite uses in all genres of Modern art. First published in 2002 to accompany an exhibition of the same name at the National Gallery, London, this beautifully illustrated - and beautifully written - book by pioneering art historian and critic Anne Hollander, is reissued with a new Foreword by Valerie Steele. As penetrating and insightful as when it was first published, it remains a must-read for today's generation of students and anyone with an interest in art and fashion.

**The Body Project** Joan Jacobs Brumberg,2010-06-09 The award-winning author of *Fasting Girls* explores what teenage girls have lost in this new world of freedom and consumerism—a world in which the body is their primary project. Fascinating ... riveting ... Women and girls should read this fine book together. —The New York Times Book Review A hundred years ago, women were lacing themselves into corsets and teaching their daughters to do the same. The ideal of the day, however, was inner beauty: a focus on good deeds and a pure heart. Today American women have more social choices and personal freedom than ever before. But fifty-three percent of our girls are dissatisfied with their bodies by the age of thirteen, and many begin a pattern of weight obsession and dieting as early as eight or nine. Why? In *The Body Project*, historian Joan Jacobs Brumberg answers this question, drawing on diary excerpts and media images from 1830 to the present. Tracing girls' attitudes toward topics ranging from breast size and menstruation to hair, clothing, and cosmetics, she exposes the shift from the Victorian concern with character to our modern focus on outward appearance—in particular, the desire to be model-thin and sexy. Compassionate, insightful, and gracefully written, *The Body Project* explores the gains and losses adolescent girls have inherited since they shed the corset and the ideal of virginity for a new world of sexual freedom and consumerism—a world in which the body is their primary project.

Fashion Theory and the Visual Semiotics of the Body Žarko Paić,2022-07-18 Instead of the logic of representation of fashion in the light of modern society and postmodern culture, this book argues that contemporary fashion should be regarded as a performative-conceptual turn in the very core of body iconograms. The text presents a theoretical perspective of the phenomenon of fashion within fashion theory as establishing a new approach from visual semiotics. Through this lens, fashion, therefore, emerges as a visual code of contemporary societies and cultures in the networked matrices of hyperreality and visions of that coming time that will determine the combination of cybernetics, fetishism and transgression.

*Sex and Suits* Anne Hollander,2016-08-25 Since the dawn of western fashion in the Middle Ages, women's dress has never stopped evolving, yet menswear has seen far

fewer style revolutions. At the centre of the male wardrobe is the suit: relatively unchanged since the 17th century, its cut and cloth suggest athleticism, seriousness, sexuality and strength – qualities which contrasted with the perceived superficiality and frivolity of female dress, and eventually led to the adoption of the suit into the female wardrobe where it remains to this day. In *Sex and Suits* brilliant essayist and art critic Anne Hollander charts the development of men's and women's fashion from their divergence in the medieval period to their convergence through to the late 20th century. Challenging the idea that the suit's success is merely down to its practicality, this trailblazing book argues that men have been fashion's true style-setters and that as women's fashion has taken on elements of men's style through tailoring, so men have reclaimed the embellishment and colour of past eras. First published in 1994 to great acclaim, this classic text is as fresh and provocative as ever and remains a must-read for students, scholars and anyone fascinated by the history of fashion and gender.
