The Meat Puppets and the Lyrics of Curt Kirkwood from Meat Puppets II to No Joke! Matthew Smith-Lahrman,2014-10-30 In *The Meat Puppets and the Lyrics of Curt Kirkwood from Meat Puppets II to No Joke!*, Matthew Smith-Lahrman interprets the words of Curt Kirkwood, founding member and songwriter of the Meat Puppets, a pioneering rock 'n' roll band of the last thirty years. Smith-Lahrman's analysis covers Kirkwood's lyrics on nine albums, from 1983 to 1995, when he wrote virtually every lyric for the band. A lyricist whom Rolling Stone writer Kurt Loder once rated alongside Bob Dylan, Kirkwood remains an important, yet overlooked songwriter. His often oblique "cut-up" style not only recalls Dylan but also other great lyricists, such as Brian Eno, Jimi Hendrix, and Robert Hunter, as well as poets and authors like John Milton, Arthur Rimbaud, Lewis Carroll, and William Burroughs.

Children's Imaginative Play Shlomo Ariel,2002-06-30 In this visit to the wonderland of children's imaginative, make-believe play, readers are be exposed to both a general, bird's-eye view of the whole of this fascinating realm, and to a closer look at its diverse regions. This volume examines the borderlines between make-believe play and akin phenomena such as dreams, drama, and rituals. Readers will become acquainted with the secret codes of make-believe play. These codes are activated in both covert and overt power struggles among children as well as in the child's internal theater of emotions. Readers will have the opportunity to examine these uses by looking at real-life sociodramatic play scenes. Also, the development of make-believe play and its interface with the child's general cognitive and socioemotional development is traced. This volume enables readers to consider children of various cultures at play, and investigates whether make-believe play and its characteristics are universal or culture-specific. Make-believe play has been investigated across fields including cognitive, clinical, developmental, and social psychology, as well as linguistics, anthropology, and sociology. In this book, a comprehensive, integrative model is proposed, in which all of these approaches are synthesized into a single, coherent whole. The unifying hypothesis behind this synthesis is that make-believe play is a semiotic system, a body of signs and symbols, a language by means of which children express themselves and communicate. This language enables children to regulate and balance both their inner emotional life and their social life. Another central hypothesis is therefore that make-believe play functions as an homeostatic feedback mechanism for controlling the level of arousal around the child's central concerns, as well as the level of interpersonal conflict around issues of social proximity and power. Therapeutic and education applications of make-believe play are derived from these hypotheses and their ramifications.
