Continental Rifts: Evolution, Structure, Tectonics K.H. Olsen,1995-11-24 This multi-author book has been prepared by an international group of geoscientists that have been active in rift research since the late 1960s. In 1984, an informal, grass-roots study group was initiated to compare individual research results and to explore in greater depth the apparent differences and similarities in the interpretations from various rift systems. The group became known as the CREST working group, an acronym of Continental Rifts: Evolution, Structure and Tectonics, which not surprisingly became the title of this book. Continental Rifts: Evolution, Structure, Tectonics presents an overview of the present state of understanding and knowledge of the processes of continental rifting from a multidisciplinary, lithospheric scale perspective. The chapters have been structured on each rift system in approximately the same synoptic sequence, so as to facilitate comparisons of rifts by the reader. The book complements its predecessors by presenting a more unified picture. It succeeds in presenting the status of a representative majority of the continental rift systems that have been at the forefront of recent research. For students and experienced researchers alike, this book will be of significant value in assessing the current state of knowledge and in serving as a framework for future research.

Ecology and Management of Black-tailed and Mule Deer of North America James R. Heffelfinger,Paul R. Krausman,2023-04-27 Black-tailed and mule deer represent one of the largest distributions of mammals in North America and are symbols of the wide-open American West. Each chapter in this book was authored by the world's leading experts on that topic. Both editors, James R. Heffelfinger and Paul R. Krausman, are widely published in the popular and scientific press and recipients of the O. C. Wallmo Award, given every two years to a leading black-tailed and mule deer expert who has made significant contributions to the conservation of this species. In addition, Heffelfinger has chaired the Mule Deer Working Group sponsored by the Western Association of Fish and Wildlife Agencies for more than 15 years. This working group consists of the leading black-tailed and mule deer experts from each of 24 states, provinces, and territories in western North America, putting them at the forefront of all conservation and much of the research on this species. The book represents all current knowledge available on these deer, including how changing conditions such as fires, habitat alteration and loss, disease, climate change, socio-economic forces, energy development, and other aspects are influencing their distribution and abundance now and into the future. It takes a completely fresh look at all chapter topics. The revisions of distribution, taxonomy, evolution, behavior, and new and exciting work being done in deer nutrition, migration and movements, diseases, predation, and human dimensions are all assembled in this volume. This book will instantly become the foundation for the latest information and management strategies to be implemented on the ground by practitioners and to inform the public. Although this book is about deer, the topics discussed influence most terrestrial wildlife worldwide, and the basic concepts in many of the chapters are applicable to other species.

Genre Publics Emma Baulch,2020-10-16 Genre Publics is a cultural history showing how new notions of 'the local' were produced in context of the Indonesian 'local music boom' of the late 1990s. Drawing on industry records and interviews, media scholar Emma Baulch traces the institutional and technological conditions that enabled the boom, and their links with the expansion of consumerism in Asia, and the specific context of Indonesian democratization. Baulch shows how this music helped reshape distinct Indonesian senses of the modern, especially as 'Asia' plays an ever more influential role in defining what it means to be modern.

The Ecology of Tropical East Asia Richard Corlett,2014 An updated edition of the only book dedicated to the terrestrial ecology of the East Asian tropics, authored by a world-renowned tropical ecologist

Islam, Politics and Youth in Malaysia Dominik M. Mueller,2014-03-05 Providing an ethnographic account of the Islamic Party of Malaysia (PAS) and its Youth Wing (Dewan Pemuda PAS), this book analyses the genesis and role of Islamic movements in terms of their engagement in mainstream politics. It explores the party's changing approach towards popular culture and critically investigates whether the narrative of a post-Islamist turn can be applied to the PAS Youth. The book shows that in contrast to the assumption that Islamic marketization and post-Islamism are reinforcing each other, the PAS Youth has strategically appropriated and integrated Islamic consumerism to pursue a decidedly Islamist – or 'pop-Islamist' – political agenda. The media-savvy PAS Youth elites, which are at the forefront of implementing new outreach strategies for the party, categorically oppose tendencies of political moderation among the senior party. Instead, they are most passionately calling for the establishment of a Syariah-based Islamic order for state and society, although these renewed calls are increasingly expressed through modern channels such as Facebook, YouTube, rock music, celebrity advertising, branded commodities and other market-driven forms of social movement mobilization. A timely and significant contribution to the literature on Islam and politics in Malaysia and beyond, this book sheds new light on widespread assumptions or even hopes of post-Islamism. It is of interest to students and scholars of Political Religion and Southeast Asian Politics.

The Collapse of North Korea Tara O,2016-07-25 This book highlights the increasing risk of North Korea's collapse and considers the necessary actions that would enable the neighboring powers to prepare for such an event. North Korea's deteriorating economic conditions, its reliance on external assistance, and the degree of information penetration all provide hints of its collapse. Whether the chance is high or low, the collapse of North Korea and subsequent Korean unification would drastically alter the geostrategic landscape and profoundly affect the national interests of the regional powers—South Korea, China, the United States, Japan, and Russia. The most desirable scenario for a post-unification Korean Peninsula is a successfully developed and integrated non-nuclear Korea acting as a responsible regional and world stakeholder. This work considers the major challenges expected after a North Korean collapse, including the control of nuclear weapons, disorder in the immediate aftermath of collapse, and economic and social integration. The author then outlines how regional powers need to prepare to handle these challenges in order to minimize suffering and to set the foundation for long-term development and regional stability.

BAHAN PANGAN Pencegah Kanker Fatma Zuhrotun Nisa',Manik Nur Hidayati ,Aprilina Ratriany Putri,Pina Rahayu,2021-10-19 Kanker adalah penyakit yang disebabkan oleh sel kanker dalam tubuh, yaitu sel yang tumbuh dan berkembang biak dengan cepat dan tidak dapat dikendalikan oleh tubuh. Selain dapat membelah secara abnormal tanpa kontrol, sel kanker dapat menyebar dan menyerang jaringan di sekitarnya yang disebut metastasis. Masyarakat sering menyebut kanker sebagai tumor, tetapi tidak semua tumor merupakan kanker. Tumor adalah sebutan untuk semua benjolan atau gumpalan yang muncul pada tubuh bagian mana pun, baik pada bagian tubuh yang terlihat maupun tersembunyi. Kanker merupakan salah satu penyakit penyebab kematian paling banyak di dunia. Pada tahun 2017, diperkirakan 9 juta orang meninggal di seluruh dunia akibat mengidap kanker. Diprediksikan jumlah tersebut akan terus meningkat hingga 13 juta pada tahun 2030. Menurut Data Riskesdas 2018, prevalensi kanker di Indonesia, yaitu 1,8 per 100.000 penduduk. Jumlah ini mengalami peningkatan dibanding tahun 2013, yaitu 1,4 per 100.000 penduduk. Buku ini membahas mengenai apa itu kanker, faktor risiko penyebab kanker, radikal bebas dan antioksidan, potensi bahan pangan sebagai antikanker, dan beberapa bahan pangan yang dapat dimanfaatkan sebagai pencegah kanker.

Ecorestoration for Sustainability Arnab Banerjee,Manoj Kumar Jhariya,Surendra Singh Bargali,Debnath Palit,2023-07-19 A transdisciplinary approach to investigating relationships between biomass burning and human health outcomes Environmental degradation is causing severe impacts on the various Earth ecosystems. Unsustainable development and anthropogenic pressure have altered the natural balance. From this perspective, sustainability has become a major issue to frame a greener and cleaner Earth for future generations. It can be argued that the worst example of unsustainable development is habitat degradation. Therefore, ecorestoration and other ecological practices are becoming increasingly important in our march toward sustainability. The present book covers all the aspects of ecorestoration and sustainability and how various areas intersect in this space. Environmental degradation is increasing all over the world at an unprecedented rate. This includes air, water, soil, and other natural resources resulting in the depletion of natural resources and an unsustainable planet. Therefore, it is incredibly important to restore the ecosystem's health and services to maintain homeostasis. In this context, ecorestoration approaches in the form of eco-friendly technologies need to be formulated to promote the protection and conservation of various ecosystems. These approaches include freshwater bodies, soil and mined-out wasteland, degraded forest, biodiversity, and other degraded ecosystems. This important new volume from Wiley-Scrivener tackles these problems from a practical perspective, offering solutions and new methods for restoring our suffering global ecosystem. Edited by a team of experts, this collaboration of papers on these issues is a further step in our march toward sustainability. Whether for the engineer, scientist, or student, it is a

must-have for any library.

Six Decades of Indonesia-China Relations Lidya Christin Sinaga,2018-03-20 This book analyses the relations between Indonesia and China in the regional dynamics of Southeast Asia. The rising China has influenced global and regional constellations, and also has direct impacts for Indonesia. While this fact should be viewed as an opportunity that needs to be fully utilised for the benefit of national development of Indonesia, we should also prepare for the threats embedded in this development, especially from the service and labour sectors. As such, this book suggests that equal positions in relations between Indonesia and China are absolutely necessary, since both countries need each other in their efforts to maintain the continuity of their development. It also argues that to further strengthen its position in relation to China in the future, Indonesia's diplomacy requires an integrated grand design that supports the creation of economic and political power in the face of the emergence of China's economic and military power.

Chinese Encounters in Southeast Asia Pál Nyíri,Danielle Tan,2016-12-01 This is the first book to focus explicitly on how China's rise as a major economic and political actor has affected societies in Southeast Asia. It examines how Chinese investors, workers, tourists, bureaucrats, longtime residents, and adventurers interact throughout Southeast Asia. The contributors use case studies to show the scale of Chinese influence in the region and the ways in which various countries mitigate their unequal relationship with China by negotiating asymmetry, circumventing hegemony, and embracing, resisting, or manipulating the terms dictated by Chinese capital.

Cinema and Sacrifice Costica Bradatan,Camil Constantin Ungureanu,2017-10-02 Cinema has a long history of engaging with the theme of sacrifice. Given its capacity to stimulate the imagination and resonate across a wide spectrum of human experiences, sacrifice has always attracted filmmakers. It is on screen that the new grand narratives are sketched, the new myths rehearsed, and the old ones recycled. Sacrifice can provide stories of loss and mourning, betrayal and redemption, death and renewal, destruction and re-creation, apocalypses and the birth of new worlds. The contributors to this volume are not just scholars of film but also students of religion and literature, philosophers, ethicists, and political scientists, thus offering a comprehensive and interdisciplinary approach to the relationship between cinema and sacrifice. They explore how cinema engages with sacrifice in its many forms and under different guises, and examine how the filmic constructions, reconstructions and misconstructions of sacrifice affect society, including its sacrificial practices. This book was originally published as a special issue of *Angelaki: journal of the theoretical humanities*.

Proceedings of the 4th Borobudur International Symposium on Humanities and Social Science 2022 (BIS-HSS 2022) Zulfikar Bagus Pambuko,Muji Setiyo,Chrisna Bagus Edhita Praja,Agus Setiawan,Fitriana Yuliasuti,Lintang Muliawanti,Veni Soraya Dewi,2023-10-10 This is an open access book.Related to the big theme of the SDGs reinforcement at our previous conference, we try to invite all academics and researchers around the world to participate in the 4th Borobudur International Symposium 2022 (4thBIS 2022). As we know, the COVID-19 pandemic and its impact on all the 17 SDGs have demonstrated how what began as a health catastrophe swiftly transformed into a human, socioeconomic and environmental crisis. The 4th BIS brought up "The Innovation Chain: A Contribution to Society and Industry" as the main theme to respond this condition. This conference is expected to support the UN Agenda. Additionally, this conference will also provide avenues for participants to exchange ideas and network with each other as well as domain experts from their fields. Overall, this event is aimed at professionals across all spheres of technology and engineering including the experienced, inexperienced, and students as well. The conference will be held virtually on Wednesday, December 21st, 2022 in Magelang, Central Java, Indonesia.

Cattle and People Catarina Ginja,Elizabeth Wright,2022-05-01 This volume originates in a conference session that took place at the 2018 International Council of Archaeozoology conference in Ankara, Turkey, entitled Humans and Cattle: Interdisciplinary Perspectives to an Ancient Relationship. The aim of the session was to bring together zooarchaeologists and their colleagues from various other research fields working on human cattle interactions over time. The contributions in this volume reflect well the breadth of work being undertaken on the ancient relationship between humans and cattle across the continents of Europe, Africa and Asia, and from the late Pleistocene to postmedieval period. Almost all involve the study of archaeological cattle remains and use different zooarchaeological methods, but the combination of these approaches with that of ethnography, isotopes and genetics is also featured. Snow Leopards ,2023-10-12 Snow Leopards, Second Edition provides a foundational, comprehensive overview of the biology, ecology and conservation of this iconic species. This updated edition incorporates all the recent information from range-wide surveys and conservation projects, the results of technical and advances particularly in genetics, camera trapping and satellite tracking, and evaluates emerging threats. New chapters synthesize the novel scientific methods and statistical analyses used to develop density and population estimates and how they inform conservation and management estimates. Sections cover historical information, the main biogeographic patterns, evolutionary trends, conservational efforts, and cultural significance. Status and distribution are fully updated for all 12 countries where snow leopards occur. Other sections describe established and emerging threats, including human-wildlife conflict, illegal trade, infrastructure development, and climate change along with conservation solutions used to address these threats. The book concludes with a final section on global snow leopard initiatives and future potentials. ? Offers a complete and thorough update on snow leopard ecology, conservation, research techniques and population trends, among other topic ? Presents the results of the latest scientific research and conservation measures ? Edited by recognized experts with contributions from 240 of the world's leading experts throughout the snow leopard's range

Don Drummond Heather Augustyn,2013-08-02 This is a comprehensive biography of a brilliant musician who forever shaped the course of ska, reggae, and popular music worldwide, only to take the life of his lover and in so doing, destroy his career at the age of 30. In his short life Don

Drummond created an enduring legacy despite poverty, class separation, mental illness, racial politics, and the exploitation of his work. The words of Drummond's childhood friends, classmates, musicians, medical staff, legal counsel, and teachers enliven this story of his unusual mind. They recall the early days in the recording studio, playing the instrumental backup for Bob Marley and others, and the nights in the Rasta camps where musicians burned the midnight oil and more. They remember the gyrations of his lover, Margarita, the Rumba Queen, as she tantalized audiences at Club Havana; tell what happened that tragic night when Drummond stabbed Margarita four times; reveal details of the trial (delayed more than a year as Drummond was ruled mentally unfit) and offer insights into Drummond's death in a mental asylum at age 35.

Vertebrate Palaeontology Michael J. Benton,2014-10-20 Vertebrate palaeontology is a lively field, with new discoveries reported every week... and not only dinosaurs! This new edition reflects the international scope of vertebrate palaeontology, with a special focus on exciting new finds from China. A key aim is to explain the science. Gone are the days of guesswork. Young researchers use impressive new numerical and imaging methods to explore the tree of life, macroevolution, global change, and functional morphology. The fourth edition is completely revised. The cladistic framework is strengthened, and new functional and developmental spreads are added. Study aids include: key questions, research to be done, and recommendations of further reading and web sites. The book is designed for palaeontology courses in biology and geology departments. It is also aimed at enthusiasts who want to experience the flavour of how the research is done. The book is strongly phylogenetic, and this makes it a source of current data on vertebrate evolution.
