**22nd European Conference on e-Learning** Shawren Singh, Sarah Jane Johnston, 2023-10-26 These proceedings represent the work of contributors to the 22nd European Conference on e-Learning (ECEL 2023), hosted by University of South Africa, Pretoria, South Africa on 26-27 October 2023. The Conference Co-Chairs Associate Professor Sarah Jane Johnston and Associate Professor Shawren Singh both from University of South Africa, Pretoria, South Africa. ECEL is now a well-established event on the academic research calendar and now in its 22nd year the key aim remains the opportunity for participants to share ideas and meet the people who hold them. The scope of papers will ensure an interesting two days. The subjects covered illustrate the wide range of topics that fall into this important and ever-growing area of research. It is especially relevant that the conference is being hosted by UNISA this year as the university celebrates its 150th anniversary. UNISA has been a pioneer in first distance and now e-Learning. The conference will also host the final round of the 9th e-Learning Excellence Awards where innovate case histories will be presented. The opening keynote presentation is given by Professor Thenjiwe Meyiwa, Vice Principal for the Research, Postgraduate Studies, Innovation and Commercialisation at University of South Africa who will speak on, "The Role of African Feminisms in Shaping a Sustainable Future of Being and Learning". An afternoon keynote on Thursday will be made by Dr Zolile Martin Mguda, University of South Africa on the topic of "ChatGPT: The first year". The second day of the conference will open with an address by Dr Isabel Tarling, MD, Limina, South Africa with the title "Developing Digital Standards for Learning and Teaching in South Africa's Schools". With an initial submission of 100 abstracts, after the double blind, peer review process there are 45 Academic research papers, 3 PhD research papers and 1 Masters Research paper published in these Conference Proceedings. These papers represent research from Belgium, Canada, Chile, Czech Republic, France, Germany, Ghana, Greece, Hong Kong, Ireland, Japan, Malaysia, Mozambigue, Norway, Oman, Perú, Poland, Portugal, Romania, Singapore, South Africa, Sri Lanka, Sweden, Switzerland, Turkey and the United Kingdom.

Security, Design, and Architecture for Broadband and Wireless Network Technologies Chilamkurti, Naveen, 2013-04-30 While wireless technologies continue to provide an array of new challenges and multi-domain applications for business processes and solutions, there still remains to be a comprehensive understanding of its various dimensions and environments. Security, Design, and Architecture for Broadband and Wireless Network Technologies provides a discussion on the latest research achievements in wireless networks and broadband technology. Highlighting new trends, applications, developments, and standards, this book is essential for next generation researchers and practitioners in the ICT field.

Video and Filmmaking as Psychotherapy Joshua L. Cohen, J. Lauren Johnson, Penny Orr, 2015-02-11 While film and video has long been used within psychological practice, researchers and practitioners have only just begun to explore the benefits of film and video production as therapy. This volume describes a burgeoning area of psychotherapy which employs the art of filmmaking and digital storytelling as a means of healing victims of trauma and abuse. It explores the ethical considerations behind this process, as well as its cultural and developmental implications within clinical psychology. Grounded in clinical theory and methodology, this

multidisciplinary volume draws on perspectives from anthropology, psychiatry, psychology, and art therapy which support the use and integration of film/video-based therapy in practice.

Pattern Recognition and Machine Intelligence Pradipta Maji, Ashish Ghosh, M. Narasimha Murty, Kuntal Ghosh, Sankar K. Pal, 2013-12-09 This book constitutes the refereed proceedings of the 5th International Conference on Pattern Recognition and Machine Intelligence, PReMI 2013, held in Kolkata, India in December 2013. The 101 revised papers presented together with 9 invited talks were carefully reviewed and selected from numerous submissions. The papers are organized in topical sections on pattern recognition; machine learning; image processing; speech and video processing; medical imaging; document image processing; soft computing; bioinformatics and computational biology; and social media mining.

Decisions and Orders of the National Labor Relations Board United States. National Labor Relations Board, 2014 Ultrasound Evaluation of Peripheral Nerves and Focal Neuropathies, Second Edition Jeffrey A. Strakowski, MD, 2020-12-07 This thoroughly updated and expanded second edition continues to be the singular reference for comprehensive clinical instruction in the use of high-frequency ultrasound for assessing peripheral nerves and their disorders, particularly focal neuropathies. Revised to integrate current advances in the field, new applications, and next-generation equipment, this top of the line text uses a how-to approach to describe clinical evaluation, inclusive of both normal and pathological findings with discussions of relevant non-neurologic tissue. The book begins with a review in ultrasound physics, instrumentation, image optimization, and anatomy before presenting a highly visual tour through multiple nerves of the neck, shoulder, and upper and lower limbs with new chapters on the evaluation of muscle and ultrasound guided principles. Anatomical chapters have been substantially updated to feature additional nerves and advanced concepts with updated drawings and unprecedented visualization of smaller nerve segments captured by cutting-edge equipment. Chapters include clinical cases unique to this edition that demonstrate the use of ultrasound in conjunction with clinical and electrophysiologic assessment to optimize diagnosis. In-text video callouts directly connect chapter content to over 430 detailed video examinations accessible online to better facilitate understanding of the ultrasound image. The definitive reference on peripheral nerve ultrasound and focal neuropathies, this practical text and atlas is the prime resource for neurologists, physiatrists, radiologists, sports medicine physicians, and other providers seeking to combine ultrasound with electrodiagnosis for entrapments of the upper and lower limbs. Key Features: Utilizes a how-to skills approach for imaging peripheral nerves with ultrasound and understanding anatomic, clinical, electrodiagnostic, and imaging considerations for focal neuropathies Thoroughly revised and updated Second Edition New chapters on imaging muscle and ultrasound-guided procedure Introduces ultra-high frequency imaging with many new sections covering less commonly scanned and smaller nerves Incorporates brand new clinical cases throughout to survey an array of disorders and conditions including an extended series on foot drop Includes hundreds of detailed anatomical drawings and state-ofthe-art images with corresponding videos online New audiovisual EMG waveforms provided by Ernest W. Johnson, MD Purchase includes digital access for use on most mobile devices or computers

**Handbook of Visual Communications** Hseuh-Ming Hang, John W. Woods, 2012-12-02 This volume is the most comprehensive reference work on visual communications to date. An international group of well-known experts in the field provide up-to-date and indepth contributions on topics such as fundamental theory, international standards for industrial applications, high definition

television, optical communications networks, and VLSI design. The book includes information for learning about both the fundamentals of image/video compression as well as more advanced topics in visual communications research. In addition, the Handbook of Visual Communications explores the latest developments in the field, such as model-based image coding, and provides readers with insight into possible future developments. Displays comprehensive coverage from fundamental theory to international standards and VLSI design Includes 518 pages of contributions from well-known experts Presents state-of-the-art knowledge--the most up-to-date and accurate information on various topics in the field Provides an extensive overview of international standards for industrial applications

Bradley's Neurology in Clinical Practice E-Book Joseph Jankovic, John C Mazziotta, Scott L Pomeroy, 2021-03-23 A practical, dynamic resource for practicing neurologists, clinicians and trainees, Bradley and Daroff's Neurology in Clinical Practice, Eighth Edition, offers a straightforward style, evidence-based information, and robust interactive content supplemented by treatment algorithms and images to keep you up to date with all that's current in this fast-changing field. This two-volume set is ideal for daily reference, featuring a unique organization by presenting symptom/sign and by specific disease entities—allowing you to access content in ways that mirror how you practice. More than 150 expert contributors, led by Drs. Joseph Jankovic, John C. Mazziotta, Scott L. Pomeroy, and Nancy J. Newman, provide up-to-date guidance that equips you to effectively diagnose and manage the full range of neurological disorders. Covers all aspects of today's neurology in an easy-to-read, clinically relevant manner. Allows for easy searches through an intuitive organization by both symptom and grouping of diseases. Features new and expanded content on movement disorders, genetic and immunologic disorders, tropical neurology, neuro-ophthalmology and neuro-otology, palliative care, pediatric neurology, and new and emerging therapies. Offers even more detailed videos that depict how neurological disorders manifest, including EEG and seizures, deep brain stimulation for PD and tremor, sleep disorders, movement disorders, ocular oscillations, EMG evaluation, cranial neuropathies, and disorders of upper and lower motor neurons, as well as other neurologic signs.

Teaching Digital Photography Keith Kyker, 2014-09-26 This book provides a full-year curriculum for educators wishing to teach a digital photography/multimedia class that will endow students with the technical skills for producing complex digital imaging projects. Digital imaging devices are everywhere, and most households have several—digital cameras, smartphones with cameras, and GoPro action cameras. With the right techniques and software, today's high-tech equipment can be used to create outstanding photographs or stunning digital imaging projects. This book allows any educator to teach digital photography/video and multimedia, regardless of previous experience with digital imaging, supplying tested and proven lesson plans, hands-on project ideas, and grading rubrics for a full-year course. Ideal for middle school, high school, and community college teachers as well as public youth services librarians, particularly those embracing the makerspace movement, Teaching Digital Photography: The Ultimate Guide to 'Tween and Teen Learning provides a detailed educational plan advising how to purchase equipment, set up a classroom or library area to be used for instruction, and instruct the students in the skills needed to become excellent digital photographers. The first half of the book focuses on establishing the class: the general philosophy, the classroom, and the equipment. Three chapters are dedicated to exploring the best ways to teach students the skills of photography, digital image improvement, and digital layout. The final sections of the book provide more than 20 digital layout projects and cover digital video production.

Accounting Paul D. Kimmel, Jerry J. Weygandt, Donald E. Kieso, 2010-12-01 With this fourth edition, accountants will acquire a practical set of tools and the confidence they need to use them effectively in making business decisions. It better reflects a more conceptual and decision-making approach to the material. The authors follow a macro- to micro- strategy by starting with a discussion of real financial statements first, rather than starting with the Accounting Cycle. The objective is to establish how a financial statement communicates the financing, investing, and operating activities of a business to users of accounting information. This motivates accountants by grounding the discussion in the real world, showing them the relevance of the topics covered to their careers.

**Deep Reinforcement Learning for Wireless Networks** F. Richard Yu, Ying He, 2019-01-17 This Springerbrief presents a deep reinforcement learning approach to wireless systems to improve system performance. Particularly, deep reinforcement learning approach is used in cache-enabled opportunistic interference alignment wireless networks and mobile social networks. Simulation results with different network parameters are presented to show the effectiveness of the proposed scheme. There is a phenomenal burst of research activities in artificial intelligence, deep reinforcement learning and wireless systems. Deep reinforcement learning has been successfully used to solve many practical problems. For example, Google DeepMind adopts this method on several artificial intelligent projects with big data (e.g., AlphaGo), and gets quite good results. Graduate students in electrical and computer engineering, as well as computer science will find this brief useful as a study guide. Researchers, engineers, computer scientists, programmers, and policy makers will also find this brief to be a useful tool.

How to Get Anything on Anybody Lee Lapin, 2003-01-15 The world's only hands-on guide to electronic, surveillance, people tracking and asset discovery. How to do it, how to protect yourself from those who would. Used by all major intelligence agencies, now available to the public. People tracking to computer violating. The best of the worst. Or, perhaps the worst of the best. How to track, trace, and investigate anyone, anywhere, anytime. Uncover hidden assets and agendas, build a dossier, put together anyone's background. Used by the FBI as a training manual, How To, Book 3, teaches you the inside secrets of surveillance, people tracking, asset discovery, electronic and physical surveillance. Let the world's top experts, including the FBI and the KGB teach you hands-on surveillance, people tracking, asset location and rock turning. Nothing else like it on the planet.

Searching for God Study Guide Holly Lazzaro, 2019-08-27 In this 6-session, video-based study guide (DVD/streaming video sold separately) some of today's greatest Christian thinkers and apologists explore many of the most important questions about Christianity and what it has to offer the world today. What is Christianity and how is it unique among worldviews? What are some of the ideas that have influenced the way people think about it? Is there any evidence for God? Why does the resurrection matter? Many people in today's culture hold a wide variety of ideas about religion in general and Christianity in particular, some of which stem from distorted views and misunderstandings that the church can respond well to if it's well equipped. The Searching for God Study Guide will draw you and your small group into a close look at the Christian faith and how it makes better sense of the universe and human nature than two of the most common non-Christian theories: naturalism and relativism. It then examines the central event in the Christian story, the resurrection of Jesus Christ, and how to make a strong defense of this event. Holly Lazzaro expertly leads participants into deeper reflection on the insights provided in the video study by top scholars such as Lee Strobel, William Lane Craig, Gary Habermas, J. Warner Wallace, Nabeel Qureshi, Paul Copan, and many more. This video-based study is designed to be

experienced in a group setting or any small gathering and includes video teaching notes, group discussion questions, personal reflections, and Scripture readings. Searching for God Video Study (025986100711) sold separately.
