Secret Lives of Great Authors Robert Schnakenberg, 2014-03-18 Strange-but-true tales of murderers, adulterers, drug addicts, and other literary legends. With outrageous and uncensored profiles of everyone from William Shakespeare to Thomas Pynchon, *Secret Lives of Great Authors* tackles all the tough questions your high school teachers were afraid to ask: What's the deal with Lewis Carroll and little girls? Is it true that J. D. Salinger drank his own urine? How many women—and men—did Lord Byron actually sleep with? And why was Ayn Rand such a big fan of Charlie's Angels? Classic literature was never this much fun in school!

The Essentials of Technical Communication Elizabeth Tebeaux, Sam Dragga, 2020-11-04 In today's complex workplace, no one wants to read what you write. *The Essentials of Technical Communication*, Fifth Edition, was developed with this principle in mind. The respected author team continues to provide students with accessible and comprehensive instructions for planning, drafting, and revising technical documents that are clear and concise. Divided into two flexible parts--Principles and Applications--the text lays a strong foundation in the rhetoric principles

before examining the principle types of workplace documents with checklists for use in preparing them.

Microsoft on Trial Luca Rubini, 2010-01-01 *Microsoft on Trial* analyses the antitrust cases that have involved Microsoft in both sides of the Atlantic and offers a thorough and timely discussion on the regulation of unilateral behaviour in a topical sector. This fascinating and highly topical book facilitates discussion on the difficult technical, legal and economic issues with respect to innovation, competition and welfare raised, through the span of more than a decade, by the US and EC Microsoft antitrust cases. It assesses their impact on the evolution of EC and US laws on competition and intellectual property in the IT sector and beyond.

The Foundations of European Union Competition Law Renato Nazzini, 2011-12-01 Article 102 TFEU prohibits the abuse of a dominant position as incompatible with the internal market. Its application in practice has been controversial with goals as diverse as the preservation of an undistorted competitive process, the protection of economic freedom, the maximisation of consumer welfare, social welfare, or economic efficiency all cited as possible or desirable objectives. These conflicting aims have raised complex questions as to how abuses can be assessed and how a dominant position should be defined. This book addresses the conceptual problems underlying the tests to be applied under Article 102 in light of the objectives of EU competition law. Adopting an interdisciplinary approach, the book covers all the main issues relating to Article 102, including its objectives, its relationship with other principles and provisions of EU law, the criteria for the assessment of individual abusive practices, and the definition of dominance. It provides an in-depth doctrinal and normative commentary of the case law with the aim of

establishing an intellectually robust and practically workable analytical framework for abuse of dominance.

Uncertainty Jonathan Fields,2012-11-06 Jonathan Fields knows the risks-and potential power-of uncertainty. He gave up a six-figure income as a lawyer to make \$12 an hour as a personal trainer. Then, married with a 3-month old baby, he signed a lease to launch a yoga center in the heart of New York City. . . the day before 9/11. But he survived, and along the way he developed a fresh approach to transforming uncertainty, risk of loss, and exposure to judgment into catalysts for innovation, creation, and achievement. In business, art, and life, creating on a world-class level demands bold action and leaps of faith in the face of great uncertainty. But that uncertainty can lead to

fear, anxiety, paralysis, and destruction. It can gut creativity and stifle innovation. It can keep you from taking the risks necessary to do great work and craft a deeply-rewarding life. And it can bring companies that rely on innovation grinding to a halt. That is, unless you know how to use it to your advantage. Fields draws on leading-edge technology, cognitive science, and ancient awareness-focusing techniques in a fresh, practical, nondogmatic way. His approach enables creativity and productivity on an entirely different level and can turn the once-tortuous journey into a more enjoyable quest.

Heritage Building Information Modelling Yusuf Arayici, John Counsell, Lamine Mahdjoubi, Gehan Ahmed Nagy, Soheir Hawas, Khaled Dweidar, 2017-02-10 Building Information Modelling (BIM) is being debated, tested and implemented wherever you look across the built environment sector. This book is about Heritage Building Information Modelling (HBIM), which necessarily differs from the commonplace applications of BIM to new construction. Where BIM is being used, the focus is still very much on design and construction. However, its use as an operational and management tool for existing buildings, particularly heritage buildings, is lagging behind. The first of its kind, this book aims to clearly define the scope for HBIM and present cutting-edge research findings alongside international case studies, before outlining challenges for the future of HBIM research and practice. After an extensive introduction to HBIM, the core themes of the book are arranged into four parts: Restoration philosophies in practice Data capture and visualisation for maintenance and repair Building performance Stakeholder engagement This book will be a key reference for built

environment practitioners, researchers, academics and students engaged in BIM, HBIM, building energy modelling, building surveying, facilities management and heritage conservation more widely.

A Handbook of European Software Law Michael Lehmann, Colin Tapper, 1993 This is the first comprehensive examination of the EC Council Directive on the Legal Protection of Computer Programs. Written by a highly qualified team of experts including lawyers, professors, and members of the EC Commission, A Handbook of European Software Law is an indispensable, easy-to-use reference that provides both an overview of the law in each jurisdiction as well as full reports from each of the EC member states. The editors address the legislative history of the Directive, its importance in the UK and as seen from the US, the international effect of the Directive, and its significance within the general European framework for the protection of intellectual property. This authoritative handbook is an invaluable reference for lawyers specializing in computer law, software law, intellectual property law, and EC law, lawyers representing computer software and hardware designers and manufacturers, as well as professors and researchers of intellectual property law.

The Economic Characteristics of Developing Jurisdictions Michal S. Gal, Mor Bakhoun, Josef Drexler, Eleanor M. Fox, David J. Gerber, 2015-06-29 There is ongoing debate as to what competition law and policy is most suitable for developing jurisdictions. This book argues that the unique characteristics of developing jurisdictions matter when crafting and enforcing competition law and these should

brings together a total of six papers in an interdisciplinary way at the border of natural disasters and cultural heritage. There is a need for studying and documenting cultural heritage in Arctic landscapes, as these are the most affected by climate change.
