The City That Became Safe Franklin E. Zimring, 2013-11 Discusses many of the ways that New York City dropped its crime rate between the years of 1991 and 2000.

Urban Crime, Criminals, and Victims Per-Olof H. Wikström, 2012-12-06 Crime is largely an urban phenomenon, but the specifically urban and area dimensions of the social processes that are connected with crime have been seriously understated in much recent criminological work ... Such a claim could not have been made forty years ago. (Baldwin & Bottoms, 1976, p. 1). The above statement by Baldwin and Bottoms about the neglect in criminology of the urban dimension of crime was made in the mid-1970s. However, in the last decade there has been a significant upswing in theory and research on crime in the urban environment. Also, new areas of theory and research into urban crime have come into focus. (For overviews see Brantingham & Brantingham, 1984; Davidson, 1981.) One very good example of the increasing interest in urban crime is the recent volume of *Crime and Justice* entitled *Communities and Crime* (Reiss & Tonry, 1986), in which Reiss makes a strong

argument for the importance of the study of crime in urban communities and for the linking of the ecological and individual traditions in theory and research on crime. A review of the literature on crime in urban environments shows, not unexpectedly, that Anglo-American research heavily dominates the scene (Wikstrom, 1982; 1987b). Hence, much of the experience we have on urban crime is based on North American and British research and theory.

Crime in the City Lesley Williams Reid, 2003 By exploring the political and economic histories of Atlanta, Boston, Detroit, and New Orleans, the author documents how each city experienced the demise of the industrial, welfare-state political economy and the rise of the post-industrial, absentee-state political economy and how these transformations have affected urban crime rates. In addition, those cities emphasizing criminal justice expenditures at the expense of social welfare expenditures have had more crime than those cities that did not. Political and economic conditions have influenced crime rates, in sometimes surprising ways, across the post-World War II urban landscape.

The Urban Fabric of Crime and Fear Vania Ceccato, 2012-06-21 How does the city's urban fabric

relate to crime and fear, and how is that fabric affected by crime and fear? Does the urban environment affect one's decision to commit an offence? Is there a victimisation-related inequality within cities? How do crime and fear interrelate to inequality and segregation in cities of developing countries? What are the challenges to planning cities which are both safe and sustainable? This book searches for answers to these questions in the nature of the city, particularly in the social interactions that take place in urban space distinctively guided by different land uses and people's activities. In other words, the book deals with the urban fabric of crime and fear. The novelty of the book is to place safety and security issues on the urban scale by (1) showing links between urban structure, and crime and fear, (2) illustrating how different disciplines deal with urban vulnerability to (and fear of) crime (3) including concrete examples of issues and challenges found in European and North American cities, and, without being too extensive, also in cities of the Global South.

Urban Crime Prevention, Surveillance, and Restorative Justice Paul Knepper, Jonathan

Doak, Joanna Shapland, 2009-01-15 Crime prevention, surveillance, and restorative justice have

transformed the response to crime in recent years. Each has had a significant impact on policy, introducing new concepts and reassessing traditional aims and priorities. While such efforts attract a great deal of criminological interest, they tend to be discussed within separate and discrete literatures, rather than as part of a cohesive and concerted effort. Urban Crime Prevention, Surveillance, and Restorative Justice: Effects of Social Technologies examines these emerging trends which are increasingly being contemplated by police, courts, and corrections agencies, and explores how these three concepts are changing national and international policies concerning crime. Going beyond the conventional methods for crime reduction The book addresses these topics within a larger framework of social technology, defined as coordinated action derived from an organized field of knowledge to achieve a particular result. It focuses on efforts aimed at reducing and responding to crime without reliance on the conventional criminal justice practices of police and prisons. The contributors discuss diffusion of knowledge about crime through media and criminological research, surveillance technologies and their effect on crime, and finally, the concept of restorative justice, with an emphasis

on juvenile justice and its relationship to social regulations in general. Comprising the contributions of numerous experts in the field of criminology, the book asks What is the interaction between knowledge, planning, and social repercussions? The answer to this question forms a valuable basis from which to evaluate proposals for social improvements related to crime.

The Geography of Urban Crime David T. Herbert, 1982 This book introduces the geography of urban crime by integrating the concepts of criminology with the spatial perspective that geography brings to the study of criminal behaviour. The author begins with an examination of the sources of criminological data, and their spatial dimensions, then discusses the use of geographical approaches to study both offences and offenders in their local environment.

Urban Crime and Social Disorganization in China Haiyan Xiong, 2015-10-19 The book selects Guangzhou, which has the highest crime rate in China, as a research site to study patterns of crime and social disorganization. It combines methods of content analyses with ethnographic fieldwork. The research first selected 1422 crime cases reported by the influential Southern Metropolis Daily in 2013 to identify the general crime-distribution pattern. The findings suggest that both spatial and

demographic-density distribution of criminal cases in Guangzhou show a gradient circle pattern from city center to suburb. Focusing on three selected typical communities, the thesis finds important patterns of crime and social disorganization that are very different from Western research. These findings are organized according to major correlates of social disorganization, including unemployment, marriage and family, residential stability, ethnic heterogeneity, social equality, social capital, social control, social isolation and social exclusion, community cohesion, trust and fear, traditions, morals and beliefs, language. These findings extend and elaborate Social Disorganization Theory in urban China. This book can be used as a textbook for college and Ph.D. students majoring in law and sociology, as well as a reference book for professionals in related fields. Although academic, this book is written in such a way that it will also appeal to a general audience.

Breaking Rules: The Social and Situational Dynamics of Young People's Urban Crime Per-Olof H. Wikström, Dietrich Oberwittler, Kyle Treiber, Beth Hardie, 2012-05-24 Why do certain people commit acts of crime? Why does crime happen in certain places? Presenting an ambitious new study designed to

test a pioneering new theory of the causes of crime, *Breaking Rules: The Social and Situational Dynamics of Young People's Urban Crime* demonstrates that these questions can only go so far in explaining why crime happens - and, therefore, in preventing it. Based on the work of the Peterborough Adolescent and Young Adult Development Study (PADS+), *Breaking Rules* presents an analysis of the urban structure of Peterborough and its relation to young people's social life. Contemporary sciences state that behaviour is the outcome of an interaction between people and the environments to which they are exposed, and it is precisely that interaction and its relation to young people's crime involvement that PADS+ explores. Driven by a ground-breaking theory of crime, Situational Action Theory, which aims to explain why people break rules, it implements innovative methods of measuring social environments and people's exposure to them, involving a cohort of 700 young people growing up in the UK city of Peterborough. It focuses on the important adolescent time window, ages 12 to 17, during which young people's crime involvement is at its peak, using unique space-time budget data to explore young people's time use, movement patterns, and the spatio-

temporal characteristics of their crime involvement. Presenting the first study of this kind, both in breadth and detail, with significant implications for policy and prevention, *Breaking Rules* should not only be of great interest to academic readers, but also to policy-makers and practitioners, interested in issues of urban environments, crime within urban environments, and the role of social environments in crime causation.

Task Force Report: Crime and Its Impact--an Assessment United States. Task Force on Assessment of Crime, United States. Task Force on Assessment, 1967 An overview of the urban crime problem containing the results of a number of research studies and consultant papers. This volume makes use of the results of three major public surveys to examine the problem of unreported crime, public attitudes toward crime and law enforcement, the characteristics of victims and victim-offender relationships, and a variety of other crime problems. Chapters are devoted to the special problems of the economic burden of crime, white collar crime, and an appraisal of the current national system of statistical accounting on crime and criminal justice matters. There are three appendices prepared by

consultants, two methodological notes and a series of tables of crime rates for index offenses by city rank.

Writers covered include Eugène Sue, George Reynolds, Paul Féval, George Lippard, “Ned Buntline” and Donald Cameron.

Urban Crime Prevention Miguel Saraiva, 2022-10-28 This book provides an original cross-thematic

and wide scope review of crime prevention processes in urban areas that are explicitly based on the cooperation between different scientific and professional fields. Focusing primarily on environmental and community-based crime prevention, this book compiles a peer-reviewed collection of papers and prospective essays that explore how, and to what extent, multi-disciplinarity can be used as a cornerstone for achieving safer cities. Relying on the input from specialists, researchers, decision-makers, and practitioners from around the world, it covers the various stages from theory to implementation, by discussing theoretical stances, interpreting policy and planning guidelines, uncovering unique educational experiences, and narrating insights and lessons learned from innovative research and practice. Hence, it provides vivid discussions and invaluable insights into processes of partnership building, planning, and management, oriented towards establishing successful mechanism for preventing crime and reducing feelings of insecurity in urban areas.

Violence and Theft Eric H. Monkkonen, 1992 Part of a series examining the history of crime and justice in America, this volume attempts to provide an understanding of violence in its historical context. The contributors examine criminal patterns, urban crime, collective violence and homicide.

Urban Crime Prevention ,2002-01-01 This publication takes an integrated approach to combating urban crime and insecurity. Favouring long-term preventive measures over repressive ones, it promotes partnerships designed to tackle crime prevention on several fronts, bringing together the police, the media, schools, the business community, urban planners and local communities. The guide highlights the fact that effective crime prevention is the domain of local authorities, and finds that the consultation and participation of local inhabitants in social and environmental development schemes is particularly important, in order to promote a sense of social cohesion within the community and help to restore lost confidence in the ability of public authorities to deal with crime.
