The Challenge of Crime in a Free Society United States. President's Commission on Law Enforcement and Administration of Justice,1967 This report of the President's Commission on Law Enforcement and Administration of Justice -- established by President Lyndon Johnson on July 23, 1965 - - addresses the causes of crime and delinquency and recommends how to prevent crime and delinquency and improve law enforcement and the administration of criminal justice. In developing its findings and recommendations, the Commission held three national conferences, conducted five national surveys, held hundreds of meetings, and interviewed tens of thousands of individuals. Separate chapters of this report discuss crime in America, juvenile delinquency, the police, the courts, corrections, organized crime, narcotics and drug abuse, drunkenness offenses, gun control, science and technology, and research as an instrument for reform. Significant data were generated by the Commission's National Survey of Criminal Victims, the first of its kind conducted on such a scope. The survey found that not only do Americans experience far more crime than they report to the police, but they talk about crime and the reports of crime engender such fear among citizens that the basic quality of life of many Americans has eroded. The core conclusion of the Commission, however, is that a significant reduction in crime can be achieved if the Commission's recommendations (some 200) are implemented. The recommendations call for a cooperative attack on crime by the Federal Government, the States, the counties, the cities, civic organizations, religious institutions, business groups, and individual citizens. They propose basic changes in the operations of police, schools, prosecutors, employment agencies, defenders, social workers, prisons, housing authorities, and probation and parole officers.

The Economics of Crime Rafael Di Tella,Sebastian Edwards,Ernesto Schargrodsky,2010-08-02 Crime rates in Latin America are among the highest in the world, creating climates of fear and lawlessness in several countries. Despite this situation, there has been a lack of systematic effort to study crime in the region or the effectiveness of policies designed to tackle it. The Economics of Crime is a powerful corrective to this academic blind spot and makes an important contribution to the current debate on causes and solutions by applying lessons learned from recent developments in the economics of crime. The Economics of Crime addresses a variety of topics, including the impact of kidnappings on investment, mandatory arrest laws, education in prisons, and the relationship between poverty and crime. Utilizing research from within and without Latin America, this book illustrates the broad range of approaches that have been efficacious in studying crime in both developing and developed nations. The Economics of Crime is a vital text for researchers, policymakers, and students of both crime and of Latin American economic policy.

Social Urbanism and the Politics of Violence K. Maclean,2015-01-23 Medellín, Colombia, used to be the most violent city on earth, but in recent years, allegedly thanks to its 'social urbanism' approach to regeneration, it has experienced a sharp decline in violence. The author explores the politics behind this decline and the complex transformations in terms of urban development policies in Medellín.

Cyber Criminology K. Jaishankar,2011-02-22 Victimization through the Internet is becoming more prevalent as cyber criminals have developed more effective ways to remain anonymous. And as more personal information than ever is stored on networked computers, even the occasional or non-user is at risk. A collection of contributions from worldwide experts and emerging researchers, Cyber Criminology: Exploring Internet Crimes

and Criminal Behavior explores today's interface of computer science, Internet science, and criminology. Topics discussed include: The growing menace of cyber crime in Nigeria Internet gambling and digital piracy Sexual addiction on the Internet, child pornography, and online exploitation of children Terrorist use of the Internet Cyber stalking and cyber bullying The victimization of women on social networking websites Malware victimization and hacking The Islamic world in cyberspace and the propagation of Islamic ideology via the Internet Human rights concerns that the digital age has created Approaching the topic from a social science perspective, the book explores methods for determining the causes of computer crime victimization by examining an individual's lifestyle patterns. It also publishes the findings of a study conducted on college students about online victimization. Advances in information and communications technologies have created a range of new crime problems that did not exist two decades ago. Opportunities for various criminal activities to pervade the Internet have led to the growth and development of cyber criminology as a distinct discipline within the criminology framework. This volume explores all aspects of this nascent field and provides a window on the future of Internet crimes and theories behind their origins. K. Jaishankar was the General Chair of the First International Conference of the South Asian Society of Criminology and Victimology (SASCV), held January 15-17, 2011 at the Hotel Jaipur Greens in Jaipur, Rajasthan, India.
