

Urbuin Crimes

Rowland Atkinson,Gareth Millington

The City That Became Safe Franklin E. Zimring, 2013-11 Discusses many of the ways that New York City dropped its crime rate between the years of 1991 and 2000.

Urban Crime, Criminals, and Victims Per-Olof H. Wikström, 2012-12-06 Crime is largely an urban phenomenon, but the specifically urban and area dimensions of the social processes that are connected with crime have been seriously understated in much recent criminological work ... Such a claim could not have been made forty years ago. (Baldwin & Bottoms, 1976, p. 1). The above statement by Baldwin and Bottoms about the neglect in criminology of the urban dimension of crime was made in the mid-1970s. However, in the last decade there has been a significant upswing in theory and research on crime in the urban environment. Also, new areas of theory and research into urban crime have come into focus. (For overviews see Brantingham & Brantingham, 1984; Davidson, 1981.) One very good example of the increasing interest in urban crime is the recent volume of Crime and Justice entitled Communities and Crime (Reiss & Tonry, 1986), in which Reiss makes a strong argument for the importance of the study of crime in urban communities and for the linking of the ecological and individual traditions in theory and research on crime. A review of the literature on crime in urban environments shows, not unexpectedly, that Anglo-American research heavily dominates the scene (Wikström, 1982; 1987b). Hence, much of the experience we have on urban crime is based on North American and British research and theory.

Women and Urban Crimes Doel Mukherjee, 2005 The book deals with the magnitude of crimes against women in the developed and the developing World context. Through two empirical case studies the spatial context of crime has been explained, especially how socio-economic parameters and the environment can play a role to promote crime and disorder in a city. Crime remedy is through good legislation. NGO's working on women's issues, the government while making policies and the media need to find ways to strengthen legislation to protect the vulnerable women.

Crime in the City Lesley Williams Reid, 2003 By exploring the political and economic histories of Atlanta, Boston, Detroit, and New Orleans, the author documents how each city experienced the demise of the industrial, welfare-state political economy and the rise of the post-industrial, absentee-state political economy and how these transformations have affected urban crime rates. In addition, those cities emphasizing criminal justice expenditures at the expense of social welfare expenditures have had more crime than those cities that did not. Political and economic conditions have influenced crime rates, in sometimes surprising ways, across the post-World War II urban landscape.

Forms, Manifestations, and Characteristics of Urban Crime Marcela Márquez de Villalobos, 1982

The Urban Public Sector and Urban Crime Daryl A. Hellman, 1980

The Geography of Urban Crime David T. Herbert, 1982 This book introduces the geography of urban crime by integrating the concepts of criminology with the spatial perspective that geography brings to the study of criminal behaviour. The author begins with an examination of the sources of criminological data, and their spatial dimensions, then discusses the use of geographical approaches to study both offences and offenders in their local environment.

Breaking Rules: The Social and Situational Dynamics of Young People's Urban Crime Per-Olof H. Wikström, Dietrich Oberwittler, Kyle Treiber, Beth Hardie, 2012-05-24 Why do certain people commit acts of crime? Why does crime happen in certain places? Presenting an ambitious new study designed to test a pioneering new theory of the causes of crime, *Breaking Rules: The Social and Situational Dynamics of Young People's Urban Crime* demonstrates that these questions can only go so far in explaining why crime happens - and, therefore, in preventing it. Based on the work of the Peterborough

Adolescent and Young Adult Development Study (PADS+), *Breaking Rules* presents an analysis of the urban structure of Peterborough and its relation to young people's social life. Contemporary sciences state that behaviour is the outcome of an interaction between people and the environments to which they are exposed, and it is precisely that interaction and its relation to young people's crime involvement that PADS+ explores. Driven by a ground-breaking theory of crime, Situational Action Theory, which aims to explain why people break rules, it implements innovative methods of measuring social environments and people's exposure to them, involving a cohort of 700 young people growing up in the UK city of Peterborough. It focuses on the important adolescent time window, ages 12 to 17, during which young people's crime involvement is at its peak, using unique space-time budget data to explore young people's time use, movement patterns, and the spatio-temporal characteristics of their crime involvement. Presenting the first study of this kind, both in breadth and detail, with significant implications for policy and prevention, *Breaking Rules* should not only be of great interest to academic readers, but also to policy-makers and practitioners, interested in issues of urban environments, crime within urban environments, and the role of social environments in crime causation.

Task Force Report: Crime and Its Impact--an Assessment United States. Task Force on Assessment of Crime, United States. Task Force on Assessment, 1967 An overview of the urban crime problem containing the results of a number of research studies and consultant papers. This volume makes use of the results of three major public surveys to examine the problem of unreported crime, public attitudes toward crime and law enforcement, the characteristics of victims and victim-offender relationships, and a variety of other crime problems. Chapters are devoted to the special problems of the economic burden of crime, white collar crime, and an appraisal of the current national system of statistical accounting on crime and criminal justice matters. There are three appendices prepared by consultants, two methodological notes and a series of tables of crime rates for index offenses by city rank.

Runaway Wives, Urban Crimes, and Survival Tactics in Wartime Beijing, 1937-1949 Ma Zhao, 2020-05-11 From 1937 to 1949, Beijing was in a state of crisis. The combined forces of Japanese occupation, civil war, runaway inflation, and reformist campaigns and revolutionary efforts wreaked havoc on the city's economy, upset the political order, and threatened the social and moral fabric as well. Women, especially lower-class women living in Beijing's tenement neighborhoods, were among those most affected by these upheavals. Delving into testimonies from criminal case files, Zhao Ma explores intimate accounts of lower-class women's struggles with poverty, deprivation, and marital strife. By uncovering the set of everyday tactics that women devised and utilized in their personal efforts to cope with predatory policies and crushing poverty, this book reveals an urban underworld that was built on an informal economy and conducted primarily through neighborhood networks. Where necessary, women relied on customary practices, hierarchical patterns of household authority, illegitimate relationships, and criminal entrepreneurship to get by. Women's survival tactics, embedded in and reproduced by their everyday experience, opened possibilities for them to modify the male-dominated city and, more importantly, allowed women to subtly deflect, subvert, and "escape without leaving" powerful forces such as the surveillance state, reformist discourse, and revolutionary politics during and beyond wartime Beijing.

Metropolitan Crime Patterns Robert M. Figlio, Simon Hakim, George F. Rengert, 1986 This is one of the first books to examine crime trends from a metropolitan-wide perspective. Topics include: the hardening of the inner city; crime in suburbia; mobility patterns of offenders; the effect of neighbourhood characteristics on crime; variations in police expenditures, and others.

The Urban Fabric of Crime and Fear Vania Ceccato, 2012-06-21 How does the city's

urban fabric relate to crime and fear, and how is that fabric affected by crime and fear? Does the urban environment affect one's decision to commit an offence? Is there a victimisation-related inequality within cities? How do crime and fear interrelate to inequality and segregation in cities of developing countries? What are the challenges to planning cities which are both safe and sustainable? This book searches for answers to these questions in the nature of the city, particularly in the social interactions that take place in urban space distinctively guided by different land uses and people's activities. In other words, the book deals with the urban fabric of crime and fear. The novelty of the book is to place safety and security issues on the urban scale by (1) showing links between urban structure, and crime and fear, (2) illustrating how different disciplines deal with urban vulnerability to (and fear of) crime (3) including concrete examples of issues and challenges found in European and North American cities, and, without being too extensive, also in cities of the Global South.

Urban Crime and Social Disorganization in China Haiyan Xiong, 2015-10-19 The book selects Guangzhou, which has the highest crime rate in China, as a research site to study patterns of crime and social disorganization. It combines methods of content analyses with ethnographic fieldwork. The research first selected 1422 crime cases reported by the influential Southern Metropolis Daily in 2013 to identify the general crime-distribution pattern. The findings suggest that both spatial and demographic-density distribution of criminal cases in Guangzhou show a gradient circle pattern from city center to suburb. Focusing on three selected typical communities, the thesis finds important patterns of crime and social disorganization that are very different from Western research. These findings are organized according to major correlates of social disorganization, including unemployment, marriage and family, residential stability, ethnic heterogeneity, social equality, social capital, social control, social isolation and social exclusion, community cohesion, trust and fear, traditions, morals and beliefs, language. These findings extend and elaborate Social Disorganization Theory in urban China. This book can be used as a textbook for college and Ph.D. students majoring in law and sociology, as well as a reference book for professionals in related fields. Although academic, this book is written in such a way that it will also appeal to a general audience.

Crimes of Style Jeff Ferrell, 2021-11-30 First published in 1993, *Crimes of Style* investigates the politics of culture and crime through an in-depth case study of graffiti in Denver and the official response to it. Focusing on the most prevalent form of graffiti writing in Denver, the book provides a detailed consideration of the social and cultural circumstances that surround its creation. It explores the national and international development and reception of hip hop graffiti that provided the context in which Denver's hip hop graffiti emerged. It also examines the reaction of Denver's corporate and political community, highlighting the establishment of campaigns to criminalise it and identifying both Denver's graffiti scene and the response to it as interwoven with broader cultural processes. Most significantly, the book puts forward the circumstances surrounding the phenomenal growth of, and subsequent attempts to suppress, hip hop graffiti as indicative of injustice and inequality within the United States.

Urban Crime Prevention, Surveillance, and Restorative Justice Paul Knepper, Jonathan Doak, Joanna Shapland, 2009-01-15 Crime prevention, surveillance, and restorative justice have transformed the response to crime in recent years. Each has had a significant impact on policy, introducing new concepts and reassessing traditional aims and priorities. While such efforts attract a great deal of criminological interest, they tend to be discussed within separate and discrete literatures, rather than as part of a cohesive and concerted effort. *Urban Crime Prevention, Surveillance, and Restorative Justice: Effects of Social Technologies* examines these emerging trends which are increasingly being contemplated by police, courts, and corrections agencies, and explores how these three

concepts are changing national and international policies concerning crime. Going beyond the conventional methods for crime reduction The book addresses these topics within a larger framework of social technology, defined as coordinated action derived from an organized field of knowledge to achieve a particular result. It focuses on efforts aimed at reducing and responding to crime without reliance on the conventional criminal justice practices of police and prisons. The contributors discuss diffusion of knowledge about crime through media and criminological research, surveillance technologies and their effect on crime, and finally, the concept of restorative justice, with an emphasis on juvenile justice and its relationship to social regulations in general. Comprising the contributions of numerous experts in the field of criminology, the book asks What is the interaction between knowledge, planning, and social repercussions? The answer to this question forms a valuable basis from which to evaluate proposals for social improvements related to crime.

Urban Criminology Rowland Atkinson, Gareth Millington, 2018-11-08 *Urban Criminology* offers an accessible analysis of our urban condition, viewed through the prism of crime, disorder and social harm. This book gathers cutting-edge treatments, research field reports and critical examinations of crime and harm in cities, from the disciplines of urban studies and criminology. The social, economic and political composition of cities and the various inequalities that mark out and drive the problem of crime in many cities today are foregrounded. Readers follow a series of thematic engagements, generating a deeper understanding of a range of key areas that include problems of violence, social and spatial divisions, housing, policing and the role of the urban economy in issues of financial crime. This book comes at a time of rising crime in many cities and complex responses by city administrations and communities. It presents a critical, political thesis – that crime in cities must be understood with reference to the varying social structures, political forces and economic opportunities of cities. These influences intersect to produce dramatic variations in victimisation and attempts at social control, often felt most strongly around class and gender divisions. To understand crime, we must better understand the life of the city. *Urban Criminology* seeks to present an integrated framework that brings to life these key issues and seeks to enthuse students of our urban condition – to locate the harms within it and to identify ways of reducing the risk of crime. This book is ideal reading for all students with an interest in cities, crime, community life, urban sociology and urban cultures.
