Discourse Analysis Barbara Johnstone, Jennifer Andrus, 2024-01-15 A new edition of the bestselling textbook on discourse analysis, ideal for undergraduate and graduate courses in linguistics and the broader humanities and social sciences Discourse Analysis explains how to collect and analyze spoken, written, and multimodal language. Now in its fourth edition, this popular textbook encourages students to think systematically and critically about different sources of discourse to better understand why spoken utterances and written texts have the meanings and uses they do. Throughout the book, the authors offer real-life examples of what discourse analysis can reveal about language, individuals, groups, and society. Student-friendly chapters describe discourse analysis with a goal of helping students master the fundamental concepts of this important area of linguistic research. Each chapter contains discussion questions that encourage students to relate the material to their own experiences, perform their own analyses, and consider important issues in research design and research ethics. The new edition of Discourse Analysis includes new discussion questions and ideas for research projects, up-to-date supplementary readings, and expanded discussions of corpus analysis methods, rhetorical legitimation, and social identities. This textbook: Teaches students to apply discourse analysis to answer research questions in disciplines across the humanities and social sciences Explains the complex relationships between discourse and various aspects of context, such as linguistic structure, participants, and prior discourse Provides instructors with the flexibility to re-order chapters to meet the needs of their students Features exercises that incorporate extensive data from a variety of languages and situations, including discourse in electronic media Contains discussion questions, activities, research projects suggestions, further readings, chapter summaries, and other pedagogical features Discourse Analysis, Fourth Edition, remains the ideal primary text for undergraduate and graduate courses in language and linguistics, language pedagogy, rhetoric and composition, and linguistic ethnography.

Thinking with Type Ellen Lupton, 2024-03-12 The essential and bestselling guide to typography from beloved design educator Ellen Lupton—revised and expanded to include new and additional voices, examples, and principles, and a wider array of typefaces. Thinking with Type is to typography what Stephen Hawking's A Brief History of Time is to physics.—I Love Typography The bestselling Thinking with Type in a revised and expanded third edition: This is the definitive guide to using typography in visual communication. Covering the essentials of typography, this book explores everything from typefaces and type families to kerning and tracking to grids and layout principles. Ellen Lupton provides clear and focused guidance on how letters, words, and paragraphs should be aligned, spaced, ordered, and shaped. Historical and contemporary examples of graphic design show how to learn the rules and how to break them. Critical essays, eye-opening diagrams, helpful exercises, and dozens of examples and illustrations show readers how to be inventive within systems that inform and communicate. Featuring 32 pages of new content, the third edition is revised and refined from cover to cover: More fonts: old fonts, new fonts, weird fonts, libre fonts, Google fonts, Adobe fonts, fonts from independent foundries, and fonts and lettering by women and BIPOC designers Introductions to diverse writing systems, contributed by expert typographers from around the world Demonstrations of basic design principles, such as visual balance, Gestalt grouping, and responsive layout Current approaches to typeface design, including Variable fonts and optical sizes Tips for readability, legibility, and accessibility Stunning reproductions from the Letterform Archive Thinking with Type is the typography book for everyone: designers, writers, editors, students, anyone who works with words on page or screen, and enthusiasts of type and lettering. Readers will also love Ellen Lupton's book Extra Bold: A Feminist, Inclusive, Anti-racist, Nonbinary Field Guide for Graphic Designers.

Digital History Daniel Cohen, Roy Rosenzweig, 2006 Selected by Choice magazine as an Outstanding Academic Title Digital History: A Guide to Gathering, Preserving, and Presenting the Past on the Web provides for the first time a plainspoken and thorough introduction to the web for historians—teachers and students, archivists and museum curators, professors as well as amateur enthusiasts—who wish to produce online historical work or to build upon and improve the projects they have already started in this important new medium. The book takes the reader step by step through planning a project, understanding the technologies involved and how to choose the appropriate ones, designing a site that is both easy to use and scholarly, digitizing materials in a way that makes them web-friendly while preserving their historical integrity, and reaching and responding to an intended audience effectively. It also explores the repercussions of copyright law and fair use for scholars in a digital age and examines more cutting-edge web techniques involving interactivity, such as sites that use the medium to solicit and collect historical artifacts. Finally, the book provides basic guidance for ensuring that the digital history the reader creates will not disappear in a few years. Throughout, Digital History maintains a realistic sense of the advantages and disadvantages of putting historical documents, interpretations, and discussions online. The authors write in a tone that makes Digital History accessible to those with little knowledge of computers, while including a host of details that more technically savvy readers will find helpful. And although the book focuses particularly on historians, those working in related fields in the humanities and social sciences will also find this to be a useful introduction. Digital History builds upon more than a decade of experience and expertise in creating pioneering and award-winning work by the Center for History and New Media at George Mason University.

X3D Don Brutzman, Leonard Daly, 2010-07-19 In the early days of the Web a need was recognized for a language to display 3D objects through a browser. An HTML-like language, VRML, was proposed in 1994 and became the standard for describing interactive 3D objects and worlds on the Web. 3D Web courses were started, several best-selling books were published, and VRML continues to be used today. However VRML, because it was based on HTML, is a stodgy language that is not easy to incorporate with other applications and has been difficult to add features to. Meanwhile, applications for interactive 3D graphics have been exploding in areas such as medicine, science, industry, and entertainment. There is a strong need for a set of modern Web-based technologies, applied within a standard extensible framework, to enable a new generation of modeling & simulation applications to emerge, develop, and interoperate. X3D is the next generation open standard for 3D on the web. It is the result of several years of development by the Web 3D Consortium's X3D Task Group. Instead of a large monolithic specification (like VRML), which requires full adoption for compliance, X3D is a component-based architecture that can support applications ranging from a simple non-interactive animation to the latest streaming or rendering applications. X3D replaces VRML, but also provides compatibility with existing VRML content and browsers. Don Brutzman organized the first symposium on VRML and is playing a similar role with X3D; he is a founding member of the consortium. Len Daly is a professional member of the consortium and both Len and Don have been involved with the development of the standard from the start. The first book on the new way to present interactive 3D content over the Web, written by two of the designers of the standard Plentiful illustrations and screen shots in the full color text Companion website with extensive content, including the X3D specification, sample code and applications, content creation tools, and demos of compatible Web browsers
