Tussenrapportage Validatie Onderwijsvernieuwingen (Validation Assistant in Instructional Design). ,2007 The purpose of this article is to introduce and demonstrate an effective tool that supports instructors in developing educational programs for training and instruction. Due to periodical job rotation within the military, instructional developers are not always experts in their field and are consequently unaware of the types of educational concepts that are available to teach with. This supportive tool has been developed over the course of several years, incorporating both theoretical and practical criteria related to selecting a suitable concept for an educational program. It aims to support instructors in selecting suitable educational concepts for their specific needs. Subsequently, it provides support in the actual concretization of the concepts. In continuance of two pilots, the tool has been tested by 29 instructors in training. This demonstrates very high potential for the use of the tool. It can be concluded that, with some refinements, it is well adapt at providing support for the development of new educational programs.

Recepteerkunde Yvonne Bouwman-Boer,Paul Le Brun,Christien Oussoren,Ria Tel,Herman Woerdenbag,2010-01-18 Recepteerkunde is compleet vernieuwd en helemaal bij de tijd. Van een vraag van de arts tot quality by design, van mortier tot autoclaaf, van ingangs-tot eindcontrole, van recept tot productdossier, van apotheek tot thuiszorg, het komt allemaal aan de orde. Zowel voor de specialist als voor de generalist is Recepteerkunde onmisbaar.Voor de apotheek was de kleinschalige bereiding vanouds de core business, tot steeds meer apotheken de bereiding gingen uitbesteden. Het klassieke bereiden uit grondstoffen is een specialisme geworden. Maar elke apotheek heeft te maken met productzorg: beschikbaarheid. Bewaren en bewerken van handelspreparaten. Ook voor toediening gereed maken (VTGM) gebeurt in elke apotheek, elke dag, met toewijding en kennis van zaken.Recepteerkunde is een naslagwerk voor iedereen die betrokken is bij de bereiding en aflevering van geneesmiddelen: openbare apothekers, ziekenhuisapothekers, industrieapothekers en apothekersassistenten. Tevens is het een leerboek voor studenten farmacie. Wie zelf bereidt uit grondstoffen op kleine of grote schaal, of handelspreparaten aanpast, kan niet zonder Recepteerkunde, maar ook zij die bereidingen van anderen afleveren op preparaten voor toediening gereed maken, vinden er noodzakelijke informatie.

Imaging fibres in the brain Michiel Kleinnijenhuis,2014-05-19 In these times where connectionist accounts of brain function are gaining in popularity, there is a need for reliable tools for determining anatomical connectivity in the living human brain. The technique of choice is diffusion MRI, but it is debatable whether this tool is suitable for mapping all but the major pathways. The thesis describes my contribution to the development and validation of tools to map the connections in the human brain. To honour the giants whose shoulders we stand on, and to provide neuroanatomical background, the thesis starts with a historical essay on connectional neuroanatomy. MRI techniques are introduced, focusing on the two modalities most relevant to the topic: diffusion MRI and susceptibility MRI. The thesis starts with proposing a novel tractography method: Structure Tensor Informed Fibre Tractography (STIFT). With STIFT, the strengths of diffusion MRI (angular resolution) and susceptibility MRI (spatial resolution) are harnessed in one technique. It provides improved spatial specificity of the resulting tracts. Furthermore, in regions with complex fibre configurations, STIFT is able to distinguish between crossing and kissing fibres. Although the method might not be applicable to all tracts in the brain, STIFT is expected to be a useful addition to the tractographer's toolkit. The focus then shifts to the cortex. Cortical diffusion imaging becomes increasingly relevant now that high resolutions can be achieved in vivo, which perhaps allows fibres to be tracked into the cortex. By imaging human tissue samples of the primary visual cortex ex vivo on preclinical MR systems, it was demonstrated that cortical diffusion properties are layer-specific. While infra- and supragranular layers show anisotropic diffusion tensors oriented radially to the cortical sheet, the stria of Gennari has low anisotropy. Additionally, the thesis has shown that cortical layers could be better distinguished with the biophysical model NODDI than with conventional diffusion models. In that investigation, diffusion MRI and histology both suggested that fibre dispersion patterns at the grey-white matter boundary vary over the folding cortical sheet. The gyral fibre configurations were investigated further by high resolution diffusion tensor imaging at 7T in vivo. A characteristic pattern of fibre anatomy of the gyrus was derived, in which we observed variations of tensor anisotropy and radially with cortical curvature, not only in the white matter, but also within the cortex. This set of experiments has considerable implications for tractography, suggesting that (artefactual) biases towards particular locations on the cortical sheet might exist; that models should be designed to capture a variety of dispersion and crossing patterns for tracking fibres in the gyrus; and that intracortical tractography might one day be feasible. The neuroanatomical teaching tools that are described in the final part of the thesis were created by combining white matter dissection, plastination and tractography. The plastinated prosections have considerable advantages over formalin-fixed specimens because they are durable, non-toxic and easy to handle. These tools might inspire new generations of students to take up research in connectional neuroanatomy.

De keten uitgedaagd R. van Wijk,N. Bharosa,M.F.W.H.A. Janssen,2014-03-16 Verantwoording is een maatschappelijk vraagstuk van de eerste orde, maar ook een bron van groeiende zorg en irritatie voor veel organisaties. In 2004 startten het ministerie van Financiën en het ministerie van Justitie een onderzoek naar de mogelijke toepassing van eXtensible Business Reporting Language (XBRL) als uniforme gegevensstandaard voor verantwoording. In 2006 lag er een architectuur voor Standard Business Reporting. In 2007 werden de eerste berichten in XBRL via een generieke voorziening succesvol bij de Belastingdienst en de Kamer van Koophandel afgeleverd. Eind 2009 werd er serieus ingezet op de grootschalige transitie van informatieketens. Sinds 2013 biedt Logius met Standard Business Reporting een werkende en efficiënte standaardoplossing voor massale verantwoording._x000D_ De keten uitgedaagd - Besturen en verantwoorden in een wereld vol ICT beschrijft de weg die Standard Business Reporting heeft afgelegd van opgave tot oplossing. Specialisten uit de praktijk én wetenschappers geven een gefundeerd en gedetailleerd inzicht in de uitdagingen die komen kijken bij de transitie van informatieketens. In haar veelzijdigheid is het boek exemplarisch voor de benodigde paradigmaverschuivingen binnen het veranderdomein. Het boek biedt bovendien alle praktische informatie die partijen nodig hebben om de SBR-oplossingen toe te passen in het eigen domein._x000D_ Het is inmiddels algemeen bekend dat het bij grootschalige ICT-programma's om veel meer draait dan techniek alleen. Met Standard Business Reporting als toonbeeld van een domein waarin informatieketens grondig werden aangepakt, is De keten uitgedaagd een niet te missen handboek voor bestuurders en programmamanagers die willen besturen en verantwoorden in een wereld vol ICT.

A Functional Legal Design for Reliable Electricity Supply Hamilcar Pieter Anton Knops,2008 The liberalization and international integration of electricity markets have led to a dramatic

increase in the complexity of the electricity sector. Rather than hierarchical control, it is the legal framework ('rules of the game') that determines the behavior of actors such as power generators, traders, and network operators. Because of the unusual technical and economic characteristics of electricity markets, their performance is very sensitive to the formulation of the legal framework. Still, a structured approach to formulating the legal framework has not yet been developed. A Functional Legal Design for Reliable Electricity Supply meets this demand. Many questions need to be answered in the design of a legal framework for the electricity industry and often they are interdependent. This study proposes a design method for the analysis and design of the legal organization of a technically complex sector, such as the electricity industry. The method takes into account the relevant policy goals, legal constraints, and technical characteristics. While the method is developed for electricity markets, it can be applied to other technically complex infrastructures as well. The proposed method is applied to several critical cases, such as the security of electricity supply, operational security in large networks, congestion management, and the question of how to deal with merchant transmission investment. In addition to validating the proposed method, these case studies offer a wealth of practical information about the policy choices for restructuring the electricity industry.

Handboek Persoonlijkheidspathologie E. H. M. Eurelings-Bontekoe, W. M. Snellen, R. Verheul, 2009-09-08 Het Handboek persoonlijkheidspathologie is, zeker in het Nederlandse taalgebied, het enige in zijn soort. Het voorziet in een behoefte omdat de ontwikkelingen op dit gebied een hoge vlucht hebben genomen, zowel wat betreft diagnostiek als behandeling. Al langere tijd staat de DSM-IV ter discussie omdat deze onvoldoende recht doet aan de heterogeniteit binnen groepen cliënten met een en dezelfde persoonlijkheidsstoornis. De visie achter deze uitgave is een brede en geïntegreerde kijk op persoonlijkheidspathologie. Het handboek bestrijkt dan ook het gehele terrein van de (complexe) persoonlijkheidspathologie en -problematiek. Vele experts hebben vanuit uiteenlopende referentiekaders en diagnostische en behandelmethodieken een bijdrage geleverd aan dit boek, vanuit de recente wetenschappelijke bevindingen en inzichten. Hierdoor ontstaat een rijk overzicht van de huidige state of the art van het domein van de persoonlijkheidspathologie. Zo wordt ruim aandacht besteed aan de invloed van gen-omgevingstransactie op het ontstaan van persoonlijkheidspathologie en aan neurofysiologische correlaten van persoonlijkheidspathologie. Ook is aandacht voor de voorlopers van ernstige persoonlijkheidsproblematiek in de vroege ontwikkeling van het kind.
