Blender for Video Production Quick Start Guide

Allan Brito, 2018-11-30 Use Blender to edit and produce video for YouTube or any other social media platforms Key Features Use the Blender Video editing toolkit and UI Make 3D info-graphics and interactive video with the latest Blender toolkit Prepare a video production with live markings for tracking Book Description One of the critical components of any workflow related to video production is a reliable tool to create and edit media such as video and audio. In most cases, you will find video producers using software that can only cut and mount video in a traditional way. What if you could use a software that offers not only options to edit and cut video, but also create 3D content and animation? With Blender, you can make use of a fantastic set of tools to edit and cut video, and also produce 3D content that will enable you to take your productions to the next level. Do you want to take footage from a camera and cut or add sound and titles? This book will show you how Blender can do that for you! You will learn to add 3D virtual objects to the same footage that will help you to create a full 3D environment. Using some camera tricks, you can even turn Blender into a powerful 2.5D animation software to create compelling infographics to produce educational, marketing, and instructional videos. You will also learn how to work with motion tracking to mix live-action footage with virtual objects. You will then learn how to use the video editing capabilities of Blender and match 3D content to your project for YouTube or any other media. Toward the end of the book, you will export the project to YouTube using optimal settings for the best performance in the platform. What you will learn Import video and audio

Human-Computer Interaction - INTERACT 2009

Tom Gross, Jan Gulliksen, Paula Kotzé, Lars

Oestreicher, Philippe Palanque, Raquel Oliveira

Prates, Marco Winckler, 2009-08-18 INTERACT 2009 was

the 12th of a series of INTERACT international conferences supported by the IFIP Technical Committee 13 on

Human-Computer Interaction. This year, INTERACT was held in Uppsala (Sweden), organized by the Swedish

Interdisciplinary Interest Group for Human-Computer Interaction (STIMDI) in cooperation with the Department

of Information Technology at Uppsala University. Like its predecessors, INTERACT 2009 highlighted, both to the

academic and to the industrial world, the importance of the human-computer interaction (HCI) area and its most

recent breakthroughs on current applications. Both experienced HCI researchers and professionals, as well as

newcomers to the HCI field, interested in designing or evaluating interactive software, developing new interaction

technologies, or investigating overarching theories of HCI, found in INTERACT 2009 a great forum for communication

with people of similar interests, to encourage collaboration and to learn. INTERACT 2009 had Research and Practice

as its special theme. The reason we selected this theme is that the research within the field has drifted away from the

practical applicability of its results and that the HCI practice has come to disregard the knowledge and

development within the academic community.
