Streaming Video Resources for Teaching, Learning, and Research Julie A. DeCesare, 2014-03-27 According to a 2012 Ithaka study, 80 percent of faculty in the humanities and 70 percent in social sciences use video, film, and non-textual resources for teaching undergraduates. Streaming video is not simply an accommodation to distance learners; rather, it's an expectation for the curriculum, and a valuable tool for teaching critical thinking skills, analysis, and the use of primary sources. This issue of Library Technology Reports will help you recommend high-quality video resources for faculty and researchers, with information on: 75 YouTube channels for teaching , learning and research 11 interdisciplinary video and multimedia sites with annotations on features and content 6 open access course collections 5 university channels and collections Using video with Moodle, Sakai, LibGuides, or WordPress Mass market video sites that offer library-friendly business models

Artificial Intelligence Supported Educational Technologies Niels Pinkwart, Sannyuya Liu, 2020-04-29 This book includes a collection of expanded papers from the 2019 Sino-German Symposium on AI-supported educational technologies, which was held in Wuhan, China, March, 2019. The contributors are distinguished researchers from computer science and learning science. The contributions are organized in four sections: (1) Overviews and systematic perspectives , (2) Example Systems, (3) Algorithms, and (4) Insights gained from empirical studies. For example, different data mining and machine learning

methods to quantify different profiles of a learner in different learning situations (including interaction patterns, cognitive modes, knowledge skills, interests and emotions etc.) as well as connections to measurements in psychology and learning sciences are discussed in the chapters.

Landmark Copyright Cases in China Luo

Dongchuan, 2018-11-20 With China's third major amendment of its Copyright Law now well underway, the international significance of China's handling of copyright matters comes into clearer focus. This book, an English translation of Chief Judge Luo Dongchuan's recent selection and detailed analysis of twenty-five landmark copyright cases decided by the Chinese courts in the past few years, provides an in-depth understanding of the fundamental theories of copyright as interpreted in current Chinese jurisprudence and of the sophisticated balance of interests among copyright owners, communicators of works and the public domain in China. Following a comprehensive introductory chapter on the Chinese copyright system, both administrative and judicial, the presentation proceeds with annotated English texts of cases that determine the nature of a copyrightable work and elaborate on how copyright may be infringed under Chinese law. The subject matter of the cases includes such typical internationally important elements as the following: • architectural works; • sport; • music videos; • typeface libraries; • technical standards; • expressions of folklore; • Internet TV; • liability of service providers; • online rebroadcast; • revision of computer software; and • layout designs of integrated circuits. In

addition to the texts and Dr. Luo's analyses, each case study includes comments from the exact judge of the particular case offering the reasoning for the decision. The value of this book to non-Chinese enterprises and individuals with Chinese connections or prospects is immeasurable. There are no peers for this book. Every professional, official, policymaker or academic interested in international copyright will welcome its prodigious first-hand communication about one of the most crucial aspects of global trade relations.

Make Tons of Money Advertising Outside the Googleverse ,

The Complete Guide to Using Google in Libraries

Carol Smallwood, 2015-03-06 From the Forward by Michael Lesk: Google has now developed services far beyond text search. Google software will translate languages and support collaborative writing. The chapters in this book look at many Google services, from music to finance, and describe how they can be used by students and other library users. Going beyond information resources, there are now successful collaboration services available from Google and others. You can make conference calls with video and shared screens using Google Hangouts, Writing documents with small numbers of colleagues often involved delays while each author in sequence took over the writing and made edits. Today Google Docs enables multiple people to edit the same document at once. An ingenious use of color lets each participant watch in real time as the other participants edit, and keeps track of who is doing what. If the goal is to create a website rather than to write a report, Google Sites is now one of the most popular platforms. Google is also involved in social networking, with services such as Google+ Other tools view social developments over time and space. The Google Trends service, for example, will show you when and where people are searching for topics. Not surprisingly, searches for “swimwear” peak in June and searches for “snowmobile” peak in January. The Complete Guide to Using Google in Libraries, Volume 2: Research, User Applications, and Networking has 30 chapters divided into four parts:

Research, User Applications, Networking, Searching. The contributors are practitioners who use the services they write about and they provide how-to advice that will help public, school, academic, and special librarians; library consultants, LIS faculty and students, and technology professionals.

Emerging Technologies for Librarians Sharon Q Yang, LiLi Li, 2015-11-28 *Emerging Technologies for Librarians: A Practical Approach to Innovation* focuses on the practical applications of emerging technologies in libraries, defining the technologies in the context of their use in real situations. Each chapter includes an overview of the use of emerging technologies in a particular work area that is followed by a list of relevant applications. Chapters cover work areas such as advertising, distance learning, metadata, and digital libraries, and also focus on applications, including mobile computing and web conferencing, followed by a conclusion. This book serves as a guide for those interested in learning about, and implementing, the available technologies that enhance library services, and also lists and discusses the types of emerging technologies that are available for a specific area of work. Discusses and reviews practical applications of emerging technologies for librarians Explores what emerging technologies are available in particular areas of library services Describes and evaluates applications Connects library work to innovations

Big Data and HPC: Ecosystem and Convergence L. Grandinetti, S.L. Mirtaheri, R. Shahbazian, 2018-08-22 Due to the increasing need to solve complex problems, high-performance computing (HPC) is now one of the most fundamental infrastructures for scientific development in all disciplines, and it has progressed massively in recent years

as a result. HPC facilitates the processing of big data, but the tremendous research challenges faced in recent years include: the scalability of computing performance for high velocity, high variety and high volume big data; deep learning with massive-scale datasets; big data programming paradigms on multi-core; GPU and hybrid distributed environments; and unstructured data processing with high-performance computing. This book presents 19 selected papers from the TopHPC2017 congress on Advances in High-Performance Computing and Big Data Analytics in the Exascale era, held in Tehran, Iran, in April 2017. The book is divided into 3 sections: State of the Art and Future Scenarios, Big Data Challenges, and HPC Challenges, and will be of interest to all those whose work involves the processing of Big Data and the use of HPC.
