How to Edit Videos That People Want to Watch Rachel Bastarache Bogan, 2017-07 Go beyond what buttons to push on your computer and what trendy effects to use in your videos. Transform your editing with skills that you can apply to any project, no matter what software program you use. Whether you run a video production studio or you're an independent freelancer, a YouTuber or in-house content creator, this short, easy-to-read and easy-to-apply book will give you the tools you need to assemble your videos quickly and powerfully. Apply these skills whether you're editing videos for web, social media, corporate businesses or non-profits. Discover why an edit point works or doesn't, what kinds of edits to use, when to cut your footage to the best advantage, where to use effects and transitions, and how to weave everything together into a compelling story for your audience. Learn how to cut and make videos that keep your audience engaged and watching until the very last frame. Author and professional editor, Rachel Bastarache Bogan, has spent the last ten years working with video producers, directors and editors across the United States and Canada. In this book she shares her

decade of editing experience and gives you the tools and theory to create videos that keep audiences watching again and again.

Blender for Video Production Quick Start Guide Allan Brito, 2018-11-30 Use Blender to edit and produce video for YouTube or any other social media platforms Key Features Use the Blender Video editing toolkit and UI Make 3D info-graphics and interactive video with the latest Blender toolkit Prepare a video production with live markings for tracking Book Description One of the critical components of any workflow related to video production is a reliable tool to create and edit media such as video and audio. In most cases, you will find video producers using software that can only cut and mount video in

a traditional way. What if you could use a software that offers not only options to edit and cut video, but also create 3D content and animation? With Blender, you can make use of a fantastic set of tools to edit and cut video, and also produce 3D content that will enable you to take your productions to the next level. Do you want to take footage from a camera and cut or add sound and titles? This book will show you how Blender can do that for you! You will learn to add 3D virtual objects to the same footage that will help you to create a full 3D environment. Using some camera tricks, you can even turn Blender into a powerful 2.5D animation software to create compelling infographics to produce educational, marketing, and instructional videos. You will also learn how to work with motion tracking to mix live-action footage with virtual objects. You will then learn how to use the video editing capabilities of Blender and match 3D content to your project for YouTube or any other media. Toward the end of the book, you will export the project to YouTube using optimal settings for the best performance in the platform. What you will learn

Import video and audio footage to Blender
Use the Video Sequencer Editor to manipulate footage
Prepare a project related to video in Blender

Cross-Cultural Filmmaking Ilisa Barbash, Lucien Taylor, 2023-09-01 This extraordinary handbook was inspired by the distinctive concerns of anthropologists and others who film people in the field. The authors cover the practical, technical, and theoretical aspects of filming, from fundraising to exhibition, in lucid and complete detail—information never before assembled in one place. The first section discusses filmmaking styles and the assumptions that frequently hide unacknowledged behind them,

as well as the practical and ethical issues involved in moving from fieldwork to filmmaking. The second section concisely and clearly explains the technical aspects, including how to select and use equipment, how to shoot film and video, and the reasons for choosing one or the other, and how to record sound. Finally, the third section outlines the entire process of filmmaking: preproduction, production, postproduction, and distribution. Filled with useful illustrations and covering documentary and ethnographic filmmaking of all kinds, Cross-Cultural Filmmaking will be as essential to the anthropologist or independent documentarian on location as to the student in the classroom.
