Skinflicks David Jennings,2000 So much happens to all of us every day, yet so much is often forgotten. It is easier to remember things when they rhyme; both the momentous moments and the simple ones. Life is not always an adventure. Often it is ordinary occasions and the common place events that bring us the greatest joy. Stop always looking for the next big thing, beacuse more often than not, life is just the next thing. And that next thing is what life is all about. Every rhyme contains a story; some are sincere, some are funny, some are sad, and some are reflective. There is a lesson, a moral, a tale, a smile, or a tear in every single one. They all rhyme for a reason.

Norma Kamali: I Am Invincible Norma Kamali,2021-02-02 Wit and wisdom from the innovative, influential, and empowering wellness guru and designer Norma Kamali In her first book, fashion legend Norma Kamali offers readers a stylish, inspiring, and heartfelt handbook for gliding boldly through each of life's decades with purpose and power. Manifesto, memoir, and essential guide, its pages are informed by 50 years of Kamali's twists, turns, triumphs, and failures experienced while ï▬?nding the courage and conviction to race after her dreams and never look back. At 75, Kamali looks—and acts—nearly half her age. The secret, she writes, is learning to age with power: Embracing a healthy lifestyle and looking forward to every milestone and the changes they bring, with the realization that reaching one's potential has no date. With wisdom and wit, Kamali imparts her lessons on authentic beauty, timeless style, career-building, ï▬?tness, and health through personal stories, worldly insight, and actionable advice designed to help women of every age create their happiest, healthiest, most successful and fulfilling lives.

Advances of Computational Intelligence in Industrial Systems Ying Liu,Aixin Sun,Han Tong

Loh,Wen Feng Lu,Ee-Peng Lim,2008-05-23 Computational Intelligence (CI) has emerged as a rapidly growing field over the past decade. This volume reports the exploration of CI frontiers with an emphasis on a broad spectrum of real-world applications. Such a collection of chapters has presented the state-of-the-art of CI applications in industry and will be an essential resource for professionals and researchers who wish to learn and spot the opportunities in applying CI techniques to their particular problems.

Proceedings of International Joint Conference on Advances in Computational Intelligence Mohammad Shorif Uddin,Prashant Kumar Jamwal,Jagdish Chand Bansal,2022-05-18 This book gathers outstanding research papers presented at the 5th International Joint Conference on Advances in Computational Intelligence (IJCACI 2021), held online during October 23–24, 2021. IJCACI 2021 is jointly organized by Jahangirnagar University (JU), Bangladesh, and South Asian University (SAU), India. The book presents the novel contributions in areas of computational intelligence and it serves as a reference material for advance research. The topics covered are collective intelligence, soft computing, optimization, cloud computing, machine learning, intelligent software, robotics, data science, data security, big data analytics, and signal and natural language processing.

Coming Attractions Robert J. Stoller,I. S. Levine,1996-03-01 What do porn films tell us about our own erotic impulses? What can we learn about our culture's sexual attitudes, fears, and fantasies from the ways that porn films are designed and produced? In this book, Dr. Robert J. Stoller, one of the world's leading experts on human sexual behavior, joins with I. S. Levine, a professional writer with long experience in X-rated video making, to examine the ideas and psychological makeup of the participants in an adult heterosexual X-rated video, Stairway to Paradise. Their interviews with performers, writers, directors, producers, and technicians provide extraordinary insights into the technical aspects of this type of video, the motivations and backgrounds of the people involved, and the porn industry's view of the video's intended audience. Stoller, Levine, and the porn filmmakers have wide-ranging discussions about the aesthetics, ethics, and etiquette of the porn industry; the hostility that Dr. Stoller claimed underlies all erotic excitement; the liberating—and educational—function of porn in a puritanical culture; the misconceptions of antiporn crusaders; the impact of aids on the participants; and the future of the porn film industry. The authors hope that if we understand how and why a pornographic work is created, we will be better able to understand the implications of the legal and moral issues it raises.

Computer Vision — ECCV 2020 Andrea Vedaldi,Horst Bischof,Thomas Brox,Jan-Michael

Frahm,2020-10-29 The 30-volume set, comprising the LNCS books 12346 until 12375, constitutes the refereed proceedings of the 16th European Conference on Computer Vision, ECCV 2020, which was planned to be held in Glasgow, UK, during August 23-28, 2020. The conference was held virtually due to the COVID-19 pandemic. The 1360 revised papers presented in these proceedings were carefully reviewed and selected from a total of 5025 submissions. The papers deal with topics such as computer vision; machine learning; deep neural networks; reinforcement learning; object recognition; image classification; image processing; object detection; semantic segmentation; human pose estimation; 3d reconstruction; stereo vision; computational photography; neural networks; image coding; image reconstruction; object recognition; motion estimation.

Dynamic Mode Decomposition J. Nathan Kutz,Steven L. Brunton,Bingni W. Brunton,Joshua L. Proctor,2016-11-23 Data-driven dynamical systems is a burgeoning field?it connects how measurements of nonlinear dynamical systems and/or complex systems can be used with well-established methods in dynamical systems theory. This is a critically important new direction because the governing equations of many problems under consideration by practitioners in various scientific fields are not typically known. Thus, using data alone to help derive, in an optimal sense, the best dynamical system representation of a given application allows for important new insights. The recently developed dynamic mode decomposition (DMD) is an innovative tool for integrating data with dynamical systems theory. The DMD has deep connections with traditional dynamical systems theory and many recent innovations in compressed sensing and machine learning. Dynamic Mode Decomposition: Data-Driven Modeling of Complex Systems, the first book to address the DMD algorithm, presents a pedagogical and comprehensive approach to all aspects of DMD currently developed or under development; blends theoretical development, example codes, and applications to showcase the theory and its many innovations and uses; highlights the numerous innovations around the DMD algorithm and demonstrates its efficacy using example problems from engineering and the physical and biological sciences; and provides extensive MATLAB code, data for intuitive examples of key methods, and graphical presentations.

Encounters in Video Art in Latin America Elena Shtromberg ,Glenn Phillips,2023-02-14 With insightful essays and interviews, this volume examines how artists have experimented with the medium of video across different regions of Latin America since the 1960s. The emergence of video art in Latin America is marked by multiple points of development, across more than a dozen artistic centers, over a period of more than twenty-five years. When first introduced during the 1960s, video was seen as

empowering: the portability of early equipment and the possibility of instant playback allowed artists to challenge and at times subvert the mainstream media. Video art in Latin America was—and still is—closely related to the desire for social change. Themes related to gender, ethnic, and racial identity as well as the consequences of social inequality and ecological disasters have been fundamental to many artists' practices. This compendium explores the history and current state of artistic experimentation with video throughout Latin America. Departing from the relatively small body of existing scholarship in English, much of which focuses on individual countries, this volume approaches the topic thematically, positioning video artworks from different periods and regions throughout Latin America in dialogue with each other. Organized in four broad sections—Encounters, Networks and Archives, Memory and Crisis, and Indigenous Perspectives—the book's essays and interviews encourage readers to examine the medium of video across varied chronologies and geographies.

The Bullet Journal Method Ryder Carroll,2018-10-23 New York Times bestseller! There's a reason this system for time management, goal setting, and intentional living has been adopted by millions around the globe: it works. Not only will you get more done, but you'll get the right things done. All you need is a pen, paper, and five spare minutes a day. In The Bullet Journal Method, Ryder Carroll, the system's founder, provides an essential guide to avoiding all-too-common beginner mistakes and building a core discipline from which you can personalize your practice. You'll not only learn to organize your tasks, but to focus your time and energy in pursuit of what's truly meaningful to you by following three simple steps: * Track the past. Create a clear and comprehensive record of your thoughts. * Order the present. Find daily calm and clarity by tackling your to-do list in a more mindful, systematic, and productive way. * Design the future. Transform your vague curiosities into meaningful goals, and then break those goals into manageable action steps that lead to big change. Whether you're a frustrated list maker, an overwhelmed multitasker, or a creative who needs some structure, The Bullet Journal Method will help you go from passenger to pilot of your own life.

The Oxford Compendium of Visual Illusions Arthur Gilman Shapiro,Dejan Todorovi⬚,2017 Visual illusions are compelling phenomena that draw attention to the brain's capacity to construct our

perceptual world. The Compendium is a collection of over 100 chapters on visual illusions, written by the illusion creators or by vision scientists who have investigated mechanisms underlying the phenomena. --

Practical Pathology Informatics John Sinard,2006-03-14 Practical Pathology Informatics introduces and demystifies a variety of topics in the broad discipline of pathology informatics with a focus on issues of particular relevance to the practicing anatomic pathologist. Early chapters contain basic information about computers and databases which is applicable to any discipline, with the later chapters containing more anatomic pathology specific topics. Chapters can be read in any order and are divided into short sections. Organized in an easy-to-read format, the book is aimed at providing pathologists and pathology residents with the practical information they need to make intelligent, informed decisions about the deployment and use of information technology tools in their day-to-day practice, and ultimately, better position themselves for informed decision making and intelligent communication with the information systems groups at their institutions. John Sinard, MD, PhD is Associate Professor of Pathology in the Department of Pathology and Director, Pathology Informatics Program at Yale University School of Medicine in New Haven, Connecticut.

AI 2003: Advances in Artificial Intelligence Tamas D. Gedeon,Lance C.C. Fung,2003-12-01 Consider the problem of a robot (algorithm, learning mechanism) moving along the real line attempting to locate a particular point ? . To assist the me- anism, we assume that it can communicate with an Environment ("Oracle") which guides it with information regarding the direction in which it should go. If the Environment is deterministic the problem is the "Deterministic Point - cation Problem" which has been studied rather thoroughly [1]. In its pioneering version [1] the problem was presented in the setting that the Environment could charge the robot a cost which was proportional to the distance it was from the point sought for. The question of having multiple communicating robots locate a point on the line has also been studied [1, 2]. In the stochastic version of this problem, we consider the scenario when the learning mechanism attempts to locate a point in an interval with stochastic (i. e. , possibly erroneous) instead of deterministic responses from the environment. Thus when it should really be moving to the "right" it may be advised to move to the "left" and vice versa. Apart from the problem being of importance in its own right, the stoch- tic pointlocationproblemalsohas potentialapplications insolvingoptimization problems. Inmanyoptimizationsolutions–forexampleinimageprocessing,p- tern recognition and neural computing [5,

Proceedings of 2021 Chinese Intelligent Systems Conference Yingmin Jia,Weicun Zhang,Yongling Fu,Zhiyuan Yu,Song Zheng,2021-10-07 This book presents the proceedings of the 17th Chinese Intelligent Systems Conference, held in Fuzhou, China, on Oct 16-17, 2021. It focuses on new theoretical results and techniques in the field of intelligent systems and control. This is achieved by providing in-depth study on a number of major topics such as Multi-Agent Systems, Complex Networks, Intelligent Robots, Complex System Theory and Swarm Behavior, Event-Triggered Control and Data-Driven Control, Robust and Adaptive Control, Big Data and Brain Science, Process Control, Intelligent Sensor and Detection Technology, Deep learning and Learning Control Guidance, Navigation and Control of Flight Vehicles and so on. The book is particularly suited for readers who are interested in learning intelligent system and control and artificial intelligence. The book can benefit researchers, engineers, and graduate students.
