DJ Culture in the Mix Bernardo Attias,Anna Gavanas,Hillegonda Rietveld,2013-10-24 The DJ stands at a juncture of technology, performance and culture in the increasingly uncertain climate of the popular music industry, functioning both as pioneer of musical taste and gatekeeper of the music industry. Together with promoters, producers, video jockeys (VJs) and other professionals in dance music scenes, DJs have pushed forward music techniques and technological developments in last few decades, from mashups and remixes to digital systems for emulating vinyl performance modes. This book is the outcome of international collaboration among academics in the study of electronic dance music. Mixing established and upcoming researchers from the US, Canada, the UK, Germany, Austria, Sweden, Australia and Brazil, the collection offers critical insights into DJ activities in a range of global dance music contexts. In particular, chapters address digitization and performativity, as well as issues surrounding the gender dynamics and political economies of DJ cultures and practices.

Advances in Web Intelligence Ernestina Menasalvas, Javier Segovia, Piotr S. Szczepaniak, 2003-08-03 We are pleased to present the proceedings of the 2003 Atlantic Web Intelligence Conference, AWIC 2003. The conference was located in Madrid, Spain during May 5–6, 2003, organized locally by the Technical University of Madrid. AWIC 2003 aimed to be the first of a series of conferences on Web Intelligence, to be celebrated annually, alternatively in Europe and America, starting in Madrid. It was born as an activity of the recently created WIC-Poland Research Centre and the WIC-Spain Research Centre, both belonging to the Web Intelligence Consortium (WIC) (<http://wi-consortium.org>). AWIC 2003 was supported with grants from the Spanish Ministry for Science and Technology and the European Network of Excellence in Knowledge Discovery, KDDNet. AWIC 2003 brought together scientists, engineers, computer users, and students to exchange and share their experiences, new ideas, and research results about all aspects (theory, applications, and tools) of artificial intelligence techniques applied to Web-based systems, and to discuss the practical challenges encountered and the solutions adopted. Almost 70 contributions were submitted. After a preliminary evaluation, 60 of these papers were accepted to the conference and were assigned at least two reviewers from the international program committee. Out of this 60, 33 were conditionally accepted, and 32 of them were finally accepted after the conditions set by the reviewers had been met, which resulted in an acceptance ratio of 45%.

Beyond the Screen Jörgen Schäfer, Peter Gendolla, 2015-07-31 While literature in computer-based and networked media has so far been experienced by looking at the computer screen and by using keyboard and mouse, nowadays human-machine interactions are organized by considerably more complex interfaces. Consequently, this book focuses on literary processes in interactive installations, locative narratives and immersive environments, in which active engagement and bodily interaction is required from the reader to perceive the literary text. The contributions from internationally renowned scholars analyze how literary structures, interfaces and genres change, and how transitory aesthetic experiences can be documented, archived and edited.

Engaging Students with Music Education Pete Dale,2017-03-27 Engaging Students with Music Education is a groundbreaking book about using DJ decks and urban music in mainstream schools to re-engage disaffected learners and develop a curriculum which better reflects overall contemporary tastes. Many young learners are 'at risk' of exclusion; this book argues that for such individuals, the implications of such a shift in the music curriculum could be especially positive. Drawing extensively on the author's own wealth of teaching experience, and bridging the gap between practice and theory, this book demonstrates through case studies that DJ decks can prove extremely valuable in mainstream classroom situations across the secondary school age ranges. Addressing challenging and crucial topics, combining rigorous theoretical analysis with practical suggestions, the book addresses questions such as: Are DJ decks actually a musical instrument, and are they suitable for classroom teaching? Will Ofsted's school inspectors approve of music teaching involving DJ decks and urban music? If we bring urban music into the classroom, will this further marginalise classical music? Are DJing and MCing skills recognised within examination specifications, at least in the UK? Current teachers will find the practical advice on how to incorporate DJ decks and urban music into their classroom especially helpful, whilst educational researchers will be captivated by the critical discussion of the child-centred tradition and a theoretical approach which stretches from 'continental' philosophy to practice-based reflection. With an insistence that the starting point for music education should always be the interests and experiences of the learners, this book is essential reading for those music teachers and researchers interested in the benefits of non-standard music-making in the classroom.
