Tom Miller

Virtual Cities Konstantinos Dimopoulos, 2020-11-12 Virtual cities are places of often-fractured geographies, impossible physics, outrageous assumptions and almost untamed imaginations given digital structure. This book, the first atlas of its kind, aims to explore, map, study and celebrate them. To imagine what they would be like in reality. To paint a lasting picture of their domes, arches and walls. From metropolitan sci-fi open worlds and medieval fantasy towns to contemporary cities and glimpses of gothic horror, author and urban planner Konstantinos Dimopoulos and visual artist Maria Kallikaki have brought to life over forty game cities. Together, they document the deep and exhilarating history of iconic gaming landscapes through richly illustrated commentary and analysis. *Virtual Cities* transports us into these imaginary worlds, through cities that span over four decades of digital history across literary and gaming genres. Travel to fantasy cities like World of Warcraft's Orgrimmar and Grim Fandango's Rubacava; envision what could be in the familiar cities of Assassin's Creed's London and Gabriel Knight's New Orleans; and steal a glimpse of cities of the future, in Final Fantasy VII's Midgar and Half-Life 2's City 17. Within, there are many more worlds to discover - each formed in the deepest corners of the imagination, their immense beauty and complexity astounding for artists, game designers, world builders and, above all, anyone who plays and cares about video games.

Virtual Cities: An Atlas & Exploration of Video Game Cities Konstantinos Dimopoulos, 2020-11-10 Immerse yourself in 45 spectacularly imagined virtual cities, from Arkham City to Whiterun, in this beautifully illustrated unofficial guide. Spanning decades of digital history, this is the ultimate travel guide and atlas of the gamer imagination. Dimopoulos invites readers to share his vision of dozens of different gaming franchises like never before: discover Dimopoulos's Half-Life 2's City 17, Yakuza

0's Kamurocho, Fallout's New Vegas, Super Mario Odyssey's New Donk City, and many more. Each chapter of this virtual travel guide consists of deep dives into the history and lore of these cities from an in-universe perspective. Illustrated with original color ink drawings and—of course—gorgeous and detailed maps, readers can explore the nostalgic games of their youth as well as modern hits. Sidebars based on the author's research tell behind-the-scenes anecdotes and reveal the real-world stories that inspired these iconic virtual settings. With a combination of stylish original maps, illustrations, and insightful commentary and analysis, this is a must-have for video game devotees, world-building fans, and game design experts.

Underground Australia Michael McKernan, 2013-10-01 In the bowels of a Sydney pub, the publican poses with his hand in chains: a reminder of the time when the underground store was a convict cell. A family, thrown out of home during the Great Depression, set up house in a cave. Women sort mushrooms in a disused railway tunnel in 1950s; a jazz band rehearses beneath the Royal George Hotel. As people go about their busy lives, beneath their feet members of the Cave Clan clamber through shadowy stormwater tunnels. Written by historian Michael McKernan, *Underground Australia* is illustrated with photographs from the National Library of Australia. With images by some of the country's best-known photographers, including Jeff Carter, Wolfgang Sievers and Frank Hurley, this book will take you on a journey to an amazing underground world.

Virtual Reality Jae-Jin Kim, 2011-01-08 Technological advancement in graphics and other human motion tracking hardware has promoted pushing virtual reality closer to reality and thus usage of virtual reality has been extended to various fields. The most typical fields for the application of virtual reality are medicine and engineering. The reviews in this book describe the latest virtual reality-related knowledge in these two fields such as: advanced human-computer

interaction and virtual reality technologies, evaluation tools for cognition and behavior, medical and surgical treatment, neuroscience and neuro-rehabilitation, assistant tools for overcoming mental illnesses, educational and industrial uses. In addition, the considerations for virtual worlds in human society are discussed. This book will serve as a state-of-the-art resource for researchers who are interested in developing a beneficial technology for human society.

Advances in Human Factors and Systems Interaction Isabel L. Nunes, 2018-06-25 This book reports on cutting-edge research into innovative system interfaces, highlighting both lifecycle development and human-technology interaction, especially in virtual, augmented and mixed-reality systems. It describes advanced methodologies and tools for evaluating and improving interface usability and discusses new models, as well as case studies and good practices. The book addresses the human, hardware, and software factors in the process of developing interfaces for optimizing total system performance, particularly innovative computing technologies for teams dealing with dynamic environments, while minimizing total ownership costs. It also highlights the forces currently shaping the nature of computing and systems, including the need for decreasing hardware costs; the importance of portability, which translates to the modern tendency toward hardware miniaturization and technologies for reducing power requirements; the necessity of a better assimilation of computation in the environment; and social concerns regarding access to computers and systems for people with special needs. The book, which is based on the AHFE 2018 International Conference on Human Factors and Systems Interaction, held on July 21-25, 2018, in Orlando, Florida, USA, offers a timely survey and practice-oriented guide for systems interface users and developers alike.

Virtual Reality in Geography Peter Fisher, David Unwin, 2001-11-22 Virtual Reality in Geography

covers through the window VR systems, fully immersive VR systems, and hybrids of the two types. The authors examine the Virtual Reality Modeling Language approach and explore its deficiencies when applied to real geographic environments. This is a totally unique book covers all the major uses and methods of virtual reality used by geographers. The authors have produced a CDROM that comes with the book of virtual reality images that will be a fascinating companion to the text. This book will be of great interest to geographers, computer scientists and all those interested in multimedia and computer graphics.

Clown of the City Stephan de Beer, 2020-11-25 At opening this book, everything one has learned or thought about “urban ministry” is challenged, and changed. Stephan de Beer offers a fresh, exciting and thoroughly engaging approach. The title is enticing and playful, but the book is a serious grappling with the daunting realities of a shadowed, marginalised, urban life. It does not theorise or pontificate about a concept. The author is not a distant, neutral observer. He is an engaged minister to the people, a struggler in their struggles, prophet to the powerful. This book invites the reader to join the people of the cities under siege by failed policies, empty promises, and disastrous politics, in their struggles for meaningful life, and it makes a powerful, persuasive case. Stephan de Beer has offered us a great gift and a wonderful opportunity to think and hope anew, and differently, about the life, reality, and future of the city.

Hacking Planet Earth Thomas M. Kostigen, 2021-10-12 An exploration of the cutting-edge technology that will enable us to confront the realities of climate change. For decades scientists and environmentalists have sounded the alarm about the effects of global warming. We are now past the tipping point. As floods, storms, and extreme temperatures become our daily reality, Reduce, Reuse, Recycle efforts aren't enough anymore. In *Hacking Planet Earth*, New York Times bestselling author

Thomas Kostigen takes readers to the frontlines of geoengineering projects that scientists, entrepreneurs, engineers, and other visionaries around the world are developing to solve the problems associated with climate change. From giant parasols hovering above the Earth to shield us from an unforgiving sun, to lasers shooting up into clouds to coax out much-needed water, Kostigen introduces readers to this inspiring work and the people who are spearheading it. These futurist, far-thinking, world-changing ideas will save us, and Hacking Planet Earth offers readers their new vision for the future.

Application of Intelligent Systems in Multi-modal Information Analytics Vijayan Sugumaran, A. G. Sreedevi, Zheng Xu, 2022-05-07 This book provides comprehensive coverage of the latest advances and trends in information technology, science, and engineering. Specifically, it addresses a number of broad themes, including multimodal informatics, data mining, agent-based and multi-agent systems for health and education informatics, which inspire the development of intelligent information technologies. The contributions cover a wide range of topics such as AI applications and innovations in health and education informatics; data and knowledge management; multimodal application management; and web/social media mining for multimodal informatics. Outlining promising future research directions, the book is a valuable resource for students, researchers, and professionals and a useful reference guide for newcomers to the field. This book is a compilation of the papers presented in the 4th International Conference on Multi-modal Information Analytics, held online, on April 23, 2022.

Adventures in the Anthropocene Gaia Vince, 2014-10-20 A science journalist travels the world to explore humanity's ecological devastation—and its potential for renewal in this “compelling read” (Guardian, UK). We live in times of profound environmental change. According to a growing

scientific consensus, the dramatic results of man-made climate change have ushered the world into a new geological era: the Anthropocene, or Age of Man. As an editor at Nature, Gaia Vince couldn't help but wonder if the greatest cause of this dramatic planetary change—humans' singular ability to adapt and innovate—might also hold the key to our survival. To investigate this provocative question, Vince travelled the world in search of ordinary people making extraordinary changes to the way they live—and, in many cases, finding new ways to thrive. From Nepal to Patagonia and beyond, Vince journeys into mountains and deserts, forests and farmlands, to get an up close and personal view of our changing environment. Part science journal, part travelogue, *Adventures in the Anthropocene* recounts Vince's journey, and introduces an essential new perspective on the future of life on Earth.

City P.D. Smith, 2012-06-19 For the first time in the history of the planet, more than half the population - 3.3 billion people - are now living in cities. Two hundred years ago only 3 per cent of the world's population were urbanites, a figure that had remained fairly stable (give or take the occasional plague) for about 1000 years. By 2030, 60 per cent of us will be urban dwellers. *City* is the ultimate handbook for the archetypal city and contains main sections on 'History', 'Customs and Language', 'Districts', 'Transport', 'Money', 'Work', 'Tourist Sites', 'Shops and markets', 'Nightlife', etc., and mini-essays on anything and everything from Babel, Tenochtitlán and Ellis Island to Beijing, Mumbai and New York, and from boulevards, suburbs, shanty towns and favelas, to skylines, urban legends and the sacred. Drawing on a wide range of examples from cities across the world and throughout history, it explores the reasons why people first built cities and why urban populations are growing larger every year. *City* is illustrated throughout with a range of photographs, maps and other illustrations.

The Moon Pool Max McCoy, "A great book! Compelling stuff."—Bob Barth, Sealab aquanaut

THE MOON POOL A one-of-a-kind underwater thriller. The sinister beauty of the underwater world is painted in hues that only an avid diver and inspired novelist could capture.—Dr. John Clarke, Navy experimental dive researcher Time is running out for Jolene. She's trapped by a madman, held captive, naked, waiting only for her worst nightmares to become reality. Her captor will keep her alive for twenty-eight days, hidden in an underwater city 400 feet below the surface. Then she will die horribly—like the others.... Jolene's only hope is Richard Dahlgren, a private underwater crime scene investigator. He has until the next full moon before Jolene becomes just another hideous trophy in the killer's surreal underwater lair. But Dahlgren has never handled a case where the victim is still alive. And the killer has never allowed a victim to escape. Max McCoy is an award-winning novelist, investigative journalist and an Advanced Open Water scuba diver. With The Moon Pool he has combined all three talents to create a thrilling novel that will carry readers to an underwater world of beauty, wonder . . . and breathtaking suspense.

Revenge of the Saguaro Tom Miller, 2010-03-01 Tom Miller's Southwest is a vortex of cockfights and cantinas, of black velvet paintings and tacky bolo ties, of eco-militants, border-crossers, and eccentric characters whose outlook is as spare and elemental as the desert that surrounds them. This is Miller's turf. With wit and insight, he reveals how the clichés of romanticism and capitalism have run amuck in his homeland. When a saguaro cactus outside Phoenix kills its own assassin, it becomes clear that no other guide to the Southwest manifests such a clear moral vision while reveling in the joy of this magnificent land and its people. Originally published by National Geographic as Jack Ruby's Kitchen Sink, it received the Gold Award for Best Travel Book in 2000 from the Society of American Travel Writers. Tom Miller has been writing about the American Southwest and Latin America for more than three decades. His ten books include The Panama Hat

Trail, which follows the making and marketing of one Panama hat, and Trading with the Enemy, which Lonely Planet says may be the best travel book about Cuba ever written. Miller began his journalism career in the underground press of the late '60s and early '70s, and has written articles for The New York Times, The Washington Post, The New Yorker, Smithsonian Magazine, Natural History, and Rolling Stone. He lives in Tucson, Arizona, with his wife, Regla.

The Internet City AHARON. KELLERMAN, 2019 Exploring the history of the Internet, from pre-conception, to the possibilities of an Internet-based future, The Internet City presents ways in which the Internet and urban life intersect. The book interprets how the contemporary city is becoming fully based on Internet technologies in all of its major dimensions: the daily activities of urbanites and urban companies, the operations of urban systems, and the functioning of the upcoming driverless vehicles.

AC/E Digital Culture Annual Report Robin Good, Roberto Carreras, Eva Snijders, Antonio Rojas Castro, Pedro Diezma, Ximo Lizana, Clara Fernández Vara, David Ruiz Torres, 2017-05-22 Acción Cultural Española's fourth edition of the AC/E Digital Culture Annual Report follows an editorial policy of familiarising professionals of the culture sector with the main digital trends they need to be aware of over the coming years. Since 2015, a committee has been advising us on the choice of subjects and authors for the first part of the report. This year, a group of experts analyse issues such as content curation as a means of tackling digital overload, neuroscience applied to technology, the latest advances in artificial intelligence, the Internet of Things and Big Data applied to culture, and the use of digital technology in music. Each year's edition also includes a field study: the Focus, which reports on cases of good practice in digital technology in a specific discipline. The first edition examined the impact of digital in the world of the performing arts; the second focused on museums;

and the third on the use of digital devices at fifty Spanish and international culture festivals. This fourth edition surveys in depth the use of digital technology in the conservation, analysis and dissemination of our cultural heritage. This sector is rapidly growing, leading to a radical change in methodologies and formats which the author, David Ruiz Torres, analyses exhaustively.

Digital Cities Toru Ishida, Katherine Isbister, 2003-06-26 On the way towards the Information Society, global networks such as the Internet, together with mobile computing, have made wide-area computing over virtual communities a reality. Digital city projects, with the goal of building platforms to support community networking, are going on worldwide. This is the first book devoted to digital cities. It is based on an international symposium held in Kyoto, Japan, in September 1999. The 34 revised full papers presented were carefully selected for inclusion in the book; they reflect the state of the art in this exciting new field of interdisciplinary research and development. The book is divided into parts on design and analysis, digital city experiments, community network experiments, applications, visualization technologies, mobile technologies, and social interaction and communityware.

Cities and Cinema Barbara Mennel, 2008-03-19 Films about cities abound. They provide fantasies for those who recognize their city and those for whom the city is a faraway dream or nightmare. How does cinema rework city planners' hopes and city dwellers' fears of modern urbanism? Can an analysis of city films answer some of the questions posed in urban studies? What kinds of vision for the future and images of the past do city films offer? What are the changes that city films have undergone? *Cities and Cinema* puts urban theory and cinema studies in dialogue. The book's first section analyzes three important genres of city films that follow in historical sequence, each associated with a particular city, moving from the city film of the Weimar Republic to the film noir

associated with Los Angeles and the image of Paris in the cinema of the French New Wave. The second section discusses socio-historical themes of urban studies, beginning with the relationship of film industries and individual cities, continuing with the portrayal of war torn and divided cities, and ending with the cinematic expression of utopia and dystopia in urban science fiction. The last section negotiates the question of identity and place in a global world, moving from the portrayal of ghettos and barrios to the city as a setting for gay and lesbian desire, to end with the representation of the global city in transnational cinematic practices. The book suggests that modernity links urbanism and cinema. It accounts for the significant changes that city film has undergone through processes of globalization, during which the city has developed from an icon in national cinema to a privileged site for transnational cinematic practices. It is a key text for students and researchers of film studies, urban studies and cultural studies.

Cities Interrupted Shirley Jordan, Christoph Lindner, 2016-02-25 *Cities Interrupted* explores the potential of visual culture – in the form of photography, film, performance, architecture, urban design, and mixed media – to strategically interrupt processes of globalization in contemporary urban spaces. Looking at cities such as Amsterdam, Beijing, Doha, London, New York, and Paris, the book brings together original essays to reveal how the concept of 'interruption' in global cities enables new understanding of the forms of space, experience, and community that are emerging in today's rapidly transforming urban environments. The idea of 'interruption' addressed in this book refers to deliberate interventions in the spaces and communities of contemporary cities – interventions that seek to disrupt or destabilize the experience of everyday urban life through creative practice. Interruption is used as an analytic and conceptual tool to challenge – and explore alternatives to – the narratives of speed, hyper-mobility, rapid growth, and incessant exchange and

flow that have dominated critical thinking on global cities. Bringing art and creative practice into the centre of discussions about the future of cities, alongside discussions of development, design, justice, health, sustainability, technology, and citizenship, this book is essential reading for anyone working at the intersections of a range of urban, cultural and visual fields, including urban studies, urban design and architecture, visual studies, cultural studies, media studies, art history, and social and cultural geography.

The Cinema of the Precariat Thomas Zaniello, 2020-02-20 *The Cinema of the Precariat* is the first book to lay out the incredible range of the precariat (the social class suffering from precarity) as well as a detailed report on the cinematic record of their work and lives. It discusses a thorough and definitive selection of more than 250 films and related visual media that take the measure of the precariat worldwide. For example, thousands of Haitians, including children, harvest sugar cane in the Dominican Republic (*The Price of Sugar*), while illegal Afghan refugees work in Iran (*Delbaran*). More familiar are the millions of Latino immigrants, legal or not, of all ages, that work in the United States (*Food Chains*). Each chapter focuses on a sub-class of the precariat or a contested zone of labor or the evolving political manifestation of the struggles of the unorganized and the dispossessed. Among the hundreds of bewildering film choices available nowadays this book offers the reader reliable guidance to the films bringing to life the economic, political, and social dilemmas faced by millions of the world's global workforce and their families.

The Traveler's Guide to Damanhur Esperide Ananas, Stambecco Pesco, 2008-12-02 Ecotourism, spa retreats, and spiritual travel are more popular than ever, catering to increasing numbers of travelers who want to learn and grow while vacationing. Damanhur, Italy's famous center for art, culture, peace studies, and community building, is poised to become a major

destination for such tourists. The Traveler's Guide to Damanhur is divided into three parts, each focusing on a different aspect of visiting Damanhur and its renowned Temples of Humankind. Part one covers practical information on Damanhur and the essentials of traveling in the surrounding Piedmont region of Italy, including details on transportation, lodgings, places to visit, restaurants and wineries, shopping; classes, workshops, festivals, and other public events; and recommended spa treatments and massage therapists. In part two, the history of the Damanhurian community is given a fun treatment in a comic book insert that puts it in a mythic context, linked to Earth and the Galaxy.
