**DJ Culture in the Mix** Bernardo Attias, Anna Gavanis, Hillegonda Rietveld, 2013-10-24 The DJ stands at a juncture of technology, performance and culture in the increasingly uncertain climate of the popular music industry, functioning both as pioneer of musical taste and gatekeeper of the music industry. Together with promoters, producers, video jockeys (VJs) and other professionals in dance music scenes, DJs have pushed forward music techniques and technological developments in last few decades, from mashups and remixes to digital systems for emulating vinyl performance modes. This book is the outcome of international collaboration among academics in the study of electronic dance music. Mixing established and upcoming researchers from the US, Canada, the UK, Germany, Austria, Sweden, Australia and Brazil, the collection offers critical insights into DJ activities in a range of global dance music contexts. In particular, chapters address digitization and performativity, as well as issues surrounding the gender dynamics and political economies of DJ cultures and practices.

*Consuming Music Together* Kenton O'Hara, Barry Brown, 2006-07-09 Listening to, buying and sharing music is an immensely important part of everyday life. Yet recent technological developments are increasingly changing how we use and consume music. This book collects together the most recent studies of music consumption, and new developments in music technology. It combines the perspectives of both social scientists and technology designers, uncovering how new music technologies are actually being used, along with discussions of new music technologies still in development. With a specific focus on the social nature of music, the book breaks new ground in bringing together discussions of both the social and technological aspects of music use. Chapters cover topics such as the use of the iPod, music technologies which encourage social interaction in public places, and music sharing on the internet. A valuable collection for anyone concerned with the future of music technology, this book will be of particular interest to those designing new music technologies, those working in the music industry, along with students of music and new technology.

**Energy Flash** Simon Reynolds, 2012-03-20 Ecstasy did for house music what LSD did for psychedelic rock. Now, in *Energy Flash*, journalist Simon Reynolds offers a revved-up and passionate inside chronicle of how MDMA ("ecstasy") and MIDI (the basis for electronica) together spawned the unique rave culture of the 1990s. England, Germany, and Holland began tinkering with imported Detroit techno and Chicago house music in the late 1980s, and when ecstasy was added to the mix in

British clubs, a new music subculture was born. A longtime writer on the music beat, Reynolds started watching—and partaking in—the rave scene early on, observing firsthand ecstasy’s sense-heightening and serotonin-surging effects on the music and the scene. In telling the story, Reynolds goes way beyond straight music history, mixing social history, interviews with participants and scene-makers, and his own analysis of the sounds with the names of key places, tracks, groups, scenes, and artists. He delves deep into the panoply of rave-worthy drugs and proper rave attitude and etiquette, exposing a nuanced musical phenomenon. Read on, and learn why nitrous oxide is called “hippy crack.”

The Oxford Handbook of Cinematic Listening Carlo Cenciarelli, 2021 The Oxford Handbook of Cinematic Listening explores the intersection between the history of listening and the history of the moving image. Featuring established and emergent scholars from musicology, film studies, and literary studies, ethnomusicology and sound studies, popular music, sociology, media and communications, and psychology, this Handbook offers a wide range of case studies and methodological perspectives on the archaeologies, aesthetics, and extensions of cinematic listening. Chapters are structured around six themes: Part I (Genealogies and Beginnings) considers film sound in light of pre-existing genres such as opera and shadow theatre, and explores changes in listening taking place at critical junctures in the early history of cinema. Part II (Locations and Relocations) focuses on specific venues and presentational practices (from roadshow movies to and contemporary live-score screenings). Part III (Representations and Re-presentations) zooms into the formal properties of specific films, analysing representations of listening on screen as well as on the role of sound as a representational surplus. Part IV (The Listening Body) focuses on cinematic sound as a powerful and sensual stimulus that has the power to engage the full body sensorium. Part V (Listening again) discusses a range of ways in which film sound is encountered and reinterpreted outside the cinema, through ancillary materials like songs and soundtrack albums, in experimental conditions, and in pedagogical contexts. Part VI (Between Media) compares the listening protocols of cinema with those of TV series and music video, promenade theatre and personal stereos, video games and Virtual Reality.
