Instrumentación electrónica: transductores y acondicionadores de señal Mercedes Granda Miguel, Elena Mediavilla Bolado, 2015-04-21 Reúne este texto, en versión digital, los apuntes de teoría y los problemas que constituyen el contenido básico de dos asignaturas cuatrimestrales troncales con igual denominación, Instrumentación Electrónica, correspondientes a los Planes de Estudios de Ingeniero Técnico de Telecomunicación en Sistemas Electrónicos, del año 1992, y, de 1995, de Ingeniero Técnico Industrial en Electrónica Industrial, de la Universidad de Cantabria ambos. Nuestra intención al publicar este libro es proporcionar al estudiante una información seleccionada, sintetizada y organizada sobre la materia que se aborda en los programas de ambas asignaturas, de forma que le sirva como fuente de consulta rápida de contenidos. En la primera parte del libro, se realiza una introducción a la Instrumentación Electrónica y se estudian métodos estadísticos para analizar los datos experimentales y determinar los errores, la precisión y la incertidumbre de la medida. La segunda parte del libro se dedica a estudiar circuitos acondicionadores de señal, básicamente amplificadores y filtros analógicos, tanto los realizados con elementos discretos como los que utilizan circuitos integrados disponibles comercialmente, y se analizan los parámetros de comportamiento real en estos circuitos y los errores que pueden generar en el proceso de medida. La tercera parte del libro se dedica a estudiar los transductores, clasificándolos de acuerdo con la magnitud que permiten medir, así como las técnicas de acondicionamiento adecuadas para obtener una señal apta para ser procesada posteriormente.

Diseño y construcción de un espectrómetro óptico por USB Yohan Pérez-Moret, 2012-01-22 En este libro se esboza el desarrollo de un espectrómetro óptico para el estudio del plasma inducido por láser. El instrumento se diseñó utilizando un banco óptico tipo Czerny-Turner con red de difracción plana; un detector óptico de arreglo lineal o CCD modelo ILX511 con 2048 celdas fotosensibles, un microcontrolador programable PIC18F4550 y un módulo de memoria de acceso aleatorio. El código del microcontrolador fue escrito en lenguaje C con el compilador CCS 4.018. Los datos espectrales adquiridos por el instrumento son enviados hacia una computadora personal, a través del bus serie universal USB. Para esto último se diseñaron instrumentos virtuales bajo la programación gráfica de LabVIEW 8. La calibración del instrumento se realizó con lámparas espectrales de mercurio y sodio. Finalmente, se midieron los espectros de emisión de muestras de cobre, magnesio y plomo. Tales mediciones fueron comparadas con las de un espectrómetro óptico comercial.

The Culture of Diagram John Bender, Michael Marrinan, 2010-01-20 The Culture of Diagram is about visual thinking. Exploring a terrain where words meet pictures and formulas meet figures, the book foregrounds diagrams as tools for blurring those boundaries to focus on the production of knowledge as process. It outlines a history of convergence among diverse streams of data in real-time: from eighteenth-century print media and the diagrammatic procedures in the pages of Diderot's Encyclopedia to the paintings of Jacques-Louis David and mathematical devices that reveal the unseen worlds of quantum physics. Central to the story is the process of correlation, which invites observers to participate by eliciting leaps of imagination to fill gaps in data, equations, or sensations. This book traces practices that ran against the grain of both Locke's clear and distinct ideas and Newton's causality—practices greatly expanded by the calculus, probabilities, and protocols of data sampling. Today's digital technologies are rooted in the ability of high-speed computers to correct errors when returning binary data to the human sensorium. High-tech diagrams echo the visual structures of the Encyclopedia, arraying packets of dissimilar data across digital spaces instead of white paper. The culture of diagram broke with the certainties of eighteenth-century science to expand the range of human experience. Speaking across disciplines and discourses, Bender and Marrinan situate our modernity in a new and revealing light.

Possible Worlds in Video Games: From Classic Narrative to Meaningful Actions Antonio José Planells de la Maza,2017-11-21 In current digital games, classic fictional worlds are transformed into ludofictional worlds, spaces rich in characters and emotions that are especially affected by the intervention of a player. In this book, we propose a model, inspired by the Semantics of Fiction and Possible Worlds, which is oriented to the analysis of video games as integrated systems.

New Literary Hybrids in the Age of Multimedia Expression Marcel Cornis-Pope,2014-11-15 Begun in 2010 as part of the “Histories of Literatures in European Languages” series sponsored by the International Comparative Literature Association, the current project on New Literary Hybrids in the Age of Multimedia Expression recognizes the global shift toward the visual and the virtual in all areas of textuality: the printed, verbal text is increasingly joined with the visual, often electronic, text. This shift has opened up new domains of human achievement in art and culture. The international roster of 24 contributors to this volume pursue a broad range of issues under four sets of questions that allow a larger conversation to emerge, both inside the volume’s sections and between them. The four sections cover, 1) Multimedia Productions in Theoretical and Historical Perspective; 2) Regional and Intercultural Projects; 3) Forms and Genres; and, 4) Readers and Rewriters in Multimedia Environments. The essays included in this volume are examples of the kinds of projects and inquiries that have become possible at the interface between literature and other media, new and old. They emphasize the extent to which hypertextual, multimedia, and virtual reality technologies have enhanced the sociality of reading and writing, enabling more people to interact than ever before. At the same time, however, they warn that, as long as these technologies are used to reinforce old habits of reading/ writing, they will deliver modest results. One of the major tasks pursued by the contributors to this volume is to integrate literature in the global informational environment where it can function as an imaginative partner, teaching its interpretive competencies to other components of the cultural landscape.
