Security Threats and Public Perception Elizaveta Gaufman, 2016-10-27 Countless attempts at analyzing Russia's actions focus on Putin to understand Russia's military imbroglio in Ukraine, hostility towards America, and disdain of 'Gayropa'. This book invites its readers to look beyond the man and delve into the online lives of millions of Russians. It asks not the question of what the threats are to Russia's security, but what they are perceived to be by digital Russia. The author examines how enemy images are manufactured, threats magnified, stereotypes revived, memories implanted and fears harnessed. It looks at the legacy of the Soviet Union in shaping discussions ranging from the Ukraine crisis to the Pussy Riots trial, and explores the complex inter-relation between enemy images at the governmental level and their articulation by the general public. By drawing on the fields of

international relations, memory studies, visual studies, and big data, this book addresses the question of why securitization succeeds – and why it fails. Security theory meets the visual turn and goes to Russia, where old tsarist and Soviet tropes are flooding the internet in support of Putin's neo-tsarism. A magical mystery tour that comes recommended. Iver B. Neumann, author of *Russia and the Idea of Europe* “The novelty of her approach is in going beyond the traditional top down perspective and capturing the receptivity and contribution of various social groups to securitized discourses.” Andrei P. Tsygankov, author of *Russia's Foreign Policy: Change and Continuity in National Identity*. “When do scary proclamations of security threats attract an audience? When does securitization work? ‘Security Threats and Public Perception’ combines in-depth analysis of the Ukraine Crisis in the Russian digital media with discourse theory to make an innovative argument about how and when people believe that they are insecure. A must read!” Laura Sjoberg, Assistant Professor of Political Science, University of Florida, USA

Computer Vision -- ACCV 2009 Hongbin Zha, Rin-ichiro Taniguchi, Stephen Maybank, 2010-05-09 It gives us great pleasure to present the proceedings of the 9th Asian Conference on Computer Vision (ACCV 2009), held in Xi'an, China, in September 2009. This was the first ACCV conference to take place in mainland China. We received a total of 670 full submissions, which is a new record in the ACCV series. Overall, 35 papers were selected for oral presentation and 131 as posters, yielding acceptance rates of 5.2% for oral, 19.6% for poster, and 24.8% in total. In the paper reviewing, we continued the tradition of previous ACCVs by conducting the process in a double-blind manner. Each of the 33 Area Chairs received a pool of about 20 papers and nominated a number of potential reviewers for each paper. Then, Program Committee Chairs allocated at least three reviewers to each paper, taking into consideration any conflicts of interest and the balance of loads.

Once the reviews were finished, the Area Chairs made summary reports for the papers in their pools, based on the reviewers' comments and on their own assessments of the papers.

101 Design Methods Vijay Kumar, 2012-10-11 The first step-by-step guidebook for successful innovation planning Unlike other books on the subject, 101 Design Methods approaches the practice of creating new products, services, and customer experiences as a science, rather than an art, providing a practical set of collaborative tools and methods for planning and defining successful new offerings. Strategists, managers, designers, and researchers who undertake the challenge of innovation, despite a lack of established procedures and a high risk of failure, will find this an invaluable resource. Novices can learn from it; managers can plan with it; and practitioners of innovation can improve the quality of their work by referring to it.

Data Smart John W. Foreman, 2013-10-31 Data Science gets thrown around in the press like it's magic. Major retailers are predicting everything from when their customers are pregnant to when

they want a new pair of Chuck Taylors. It's a brave new world where seemingly meaningless data can be transformed into valuable insight to drive smart business decisions. But how does one exactly do data science? Do you have to hire one of these priests of the dark arts, the data scientist, to extract this gold from your data? Nope. Data science is little more than using straight-forward steps to process raw data into actionable insight. And in *DataSmart*, author and data scientist John Foreman will show you how that's done within the familiar environment of a spreadsheet. Why a spreadsheet? It's comfortable! You get to look at the data every step of the way, building confidence as you learn the tricks of the trade. Plus, spreadsheets are a vendor-neutral place to learn data science without the hype. But don't let the Excel sheets fool you. This is a book for those serious about learning the analytic techniques, the math and the magic, behind big data. Each chapter will cover a different technique in a spreadsheet so you can follow along: Mathematical optimization, including non-linear programming and genetic algorithms; Clustering via k-means, spherical k-means, and graph modularity; Data mining in graphs, such as outlier detection; Supervised AI through logistic regression, ensemble models, and bag-of-words models; Forecasting, seasonal adjustments, and prediction intervals through monte carlo simulation; Moving from spreadsheets into the R programming language. You get your hands dirty as you work alongside John through each technique. But never fear, the topics are readily applicable and the author laces humor throughout. You'll even learn what a dead squirrel has to do with optimization modeling, which you no doubt are dying to know.

Designing Service Machines Ram Babu Roy, Paul Lillrank, Sreekanth V. K., Paulus Torkki, 2018-06-29

This book presents a general conceptual framework to translate principles of system science and engineering to service design. Services are co-created immaterial, heterogeneous, and perishable state changes. A service system includes the intended benefit to the customer and the structure and processes that accomplish this benefit. The primary focus is on the part of the service system that can reproduce such processes, called here a Service Machine, and methodological guidelines on how to analyze and design them. While the benefit and the process are designed based on the domain knowledge of each respective field, service production systems have common properties. The Service Machine is a metaphor that elicits the fundamental characteristics of service systems that do something efficiently, quickly, or repeatedly for a defined end. A machine is an artifact designed for a purpose, has several parts, such as inputs, energy flows, processors, connectors, and motors assembled as per design specifications. In case of service machine, the components are various contracts assembled on contractual frames. The book discusses Emergency Medical Services (EMS) and Emergency Departments (ED) as cases. They illustrate that service machines need to be structured to adapt to the constraints of the served market acknowledging the fact that services are co-created through the integration of producers' and customers' resources. This book is highly recommended for those who are interested in understanding the fundamental concepts of designing

service machines.

You Got Anything Stronger? Gabrielle Union,2021-09-14 Included in Time's 100 Must Read Books of 2021 list * A New York Times Best Seller * One of Audible's Best of The Year * AV Club's Best Books to Buy "Funny, tender, and so good." — Mindy Kaling, #1 New York Times bestselling author of Why Not Me? Remember when we hit it off so well that we decided We're Going to Need More Wine? Well,

this time you and I are going to turn to our friend the bartender and ask, *You Got Anything Stronger?* I promise to continue to make you laugh, but with this round, the stakes get higher as the conversation goes deeper. So. Where were we? Right, you and I left off in October 2017, when my first book came out. The weeks before were filled with dreams of loss. Pets dying. My husband leaving me. Babies not being born. My therapist told me it was my soul preparing for my true self to emerge after letting go of my grief. I had finally spoken openly about my fertility journey. I was having second thoughts—in fact, so many thoughts they were organizing to go on strike. But I knew I had to be honest because I didn't want other women going through IVF to feel as alone as I did. I had suffered in isolation, having so many miscarriages that I could not give an exact number. Strangers shared their own journeys and heartbreak with me. I had led with the truth, and it opened the door to compassion. When I released *We're Going to Need More Wine*, the response was so great people asked when I would do a sequel. The New York Times even ran a headline reading “*We're Going to Need More Gabrielle Union.*” Frankly, after being so open and honest in my writing, I wasn't sure there was more of me I was ready to share. But life happens with all its plot twists. And new stories demand to be told. This time, I need to be more vulnerable—not so much for me, but anyone who feels alone in what they're going through. A lot has changed in four years—I became a mom and I'm raising two amazing girls. My husband retired. My career has expanded so that I have the opportunity to lift up other voices that need to be heard. But the world has also shown us that we have a lot we still have to fight for—as women, as black women, as mothers, as aging women, as human beings, as friends. In *You Got Anything Stronger?*, I show you how this ever-changing life presents challenges, even as it gives me moments of pure joy. I take you on a girl's night at Chateau Marmont, and I also talk to Isis, my character from *Bring It On*. For the first time, I truly open up about my surrogacy journey and the birth

of Kaavia James Union Wade. And I take on racist institutions and practices in the entertainment industry, asking for equality and real accountability. *You Got Anything Stronger?* is me at my most vulnerable. I have recently found true strength in that vulnerability, and I want to share that power with you here, through this book.
