The sound of distorted guitar of Jimi Hendrix, Pierre Henry's concrete music, Pink Flyod's rock psychedelic, Kraftwerk 's electronic music, Daft Punk and rap T-Pain, have let emerge many effects: reverb, compression, distortion, auto-tune, filter, chorus, phasing, etc. The aim of this book is to introduce and explain these effects and sound treatments by addressing their theoretical and practical aspects.

Raspberry Pi GPU Audio Video Programming Jan Newmarch,2016-12-19 Delve into the Broadcom VideoCore GPU used on the Raspberry Pi and master topics such as OpenGL ES and OpenMAX. Along the way, you'll also learn some Dispmanx, OpenVG, and GPGPU programming. The author, Jan Newmarch bumped into a need to do this kind of programming while trying to turn the RPi into a karaoke machine: with the CPU busting its gut rendering MIDI files, there was nothing left for showing images such as karaoke lyrics except for the GPU, and nothing really to tell him how to do it. Raspberry Pi GPU Audio Video Programming scratches his itch and since he had to learn a lot about RPi GPU programming, he might as well share it with you. What started as a side issue turned into a full-blown project of its own; and this stuff is hard. What You'll Learn Use Dispmanx and EGL on Raspberry Pi Work with OpenMAX and its components, state, IL Client Library, ∗∗ Buffers, and more on RPi Process images and video on RPi Handle audio on RPi Render OpenMAX to OpenGL on the RPi Play multimedia files on the RPi Use OpenVG for text processing and more Master overlays Who This Book Is For You should be comfortable with C programming and at least some concurrency and thread programming using it. This book is for experienced programmers who are new or learning about Raspberry Pi.

Music's Meanings Philip Tagg,2013-03-03 "In addressing a pedagogical problem —how to talk about music as if it meant something other than itself – Philip Tagg raises fundamental questions about western epistemology as well as some of its strategically mystifying discourses. With an unsurpassed authority in the field, the author draws on a lifetime of critical reflection on the experience of music, and how to communicate it without resorting to exclusionary jargon. This is a must-read book for anyone interested in music, for whatever reason: students, teachers, researchers, performers, industry and policy stakeholders, or just to be able to talk intelligently about the musical experience." (Prof. Bruce Johnson)

The F.A.T. Manual Geraldine Juárez,2013 In more than five years of activity, the Free Art and Technology Lab produced an impressive series of projects, all developed with open source software, shared online and documented in a way that allows everybody to copy, improve, abuse or simply use them. This approach situates F.A.T. Lab in a long tradition of DIY, processual, sharable artistic practices based on instructionals, and reveals a democratic idea of art where Fluxus scores meet hacker culture (and rap music). The F.A.T. Manual is a selection of more that 100 projects, done in the belief that printing these bits on paper will allow them to spread in a different way, infiltrate other contexts, and germinate. An archive, a catalogue, a user manual and a software handbook. F.A.T. Lab is an organization dedicated to enriching the public domain through the research and development of creative technologies and media. Co-produced by Link Editions and MU in collaboration with XPO Gallery, Paris.
