"Listening to your mum's voice can make your day". An explorative study about the social functions of voice messages in messaging apps for international students Lisa Fritsch, 2020-01-08
Master's Thesis from the year 2019 in the subject Communications - Interpersonal Communication, grade: 1,6, European University Viadrina Frankfurt (Oder), language: English, abstract: Since 2013, voice messages can be sent using messaging services such as WhatsApp. Thus, the oral information transfer enters the digital messenger communication, which was previously exclusively based in written form. In German research of communication and linguistics, there are few scientists who have so far dealt with voice messages. They present a new challenge for the media linguistic conception of digital communication, as they fall into a gap between oral and written language utterances. The linguistics professor Katharina König emphasizes this decisive new aspect: With the integration of voice messages[...] media orality enters the non-simultaneous, quasi-synchronous messenger communication. Voice messages bring a kind of 'answering machine' option to messenger chats. How does this change digital communication? What are the social functions for the interpersonal exchange of them? These questions were investigated as part of a qualitative research, for which 20 international students between the ages of 20 and 34 were interviewed in Paris and Sofia. The selection of this sample favors the preservation of a homogeneous group of young adults in the same life situation. The research results showed that, despite the different countries of origin, the students have a similar usage of voice messages. The main benefit of voice messages is that they can be sent faster and easier and are therefore particularly practical in stressful situations. The speed allows more complex information to be recorded in less time. Furthermore, the increased emotionality through one's own voice and consequently a bigger intimacy between two chat

partners, play an important role in the social functions of voice messages.

The Scribe Method Tucker Max,Zach Obront,2021-04-15 Ready to write your book? So why haven't you done it yet? If you're like most nonfiction authors, fears are holding you back. Sound familiar? Is my idea good enough? How do I structure a book? What exactly are the steps to write it? How do I stay motivated? What if I actually finish it, and it's bad? Worst of all: what if I publish it, and no one cares? How do I know if I'm even doing the right things? The truth is, writing a book can be scary and overwhelming—but it doesn't have to be. There's a way to know you're on the right path and taking the right steps. How? By using a method that's been validated with thousands of other Authors just like you. In fact, it's the same exact process used to produce dozens of big bestsellers—including David Goggins's Can't Hurt Me, Tiffany Haddish's The Last Black Unicorn, and Joey Coleman's Never Lose a Customer Again. The Scribe Method is the tested and proven process that will help you navigate the entire book-writing process from start to finish—the right way. Written by 4x New York Times Bestselling Author Tucker Max and publishing expert Zach Obront, you'll learn the step-by-step method that has helped over 1,500 authors write and publish their books. Now a Wall Street Journal Bestseller itself, The Scribe Method is specifically designed for business leaders, personal development gurus, entrepreneurs, and any expert in their field who has accumulated years of hard-won knowledge and wants to put it out into the world. Forget the rest of the books written by pretenders. This is the ultimate resource for anyone who wants to professionally write a great nonfiction book.

if you wish to sell what you have to others, your commercial survival depends on you becoming the EDUPRENEUR. Consumers are tired of sales pitches and promises, and instead are seeking information and knowledge. By giving it to them you get to demonstrate your capability and expertise as much as they get to experience it - making you choice number 1 for their needs. Edupreneurs strategically share their expertise in a way that provides unprecedented global reach, immeasurable impact on the lives of others, and unlimited income potential. Every single person on Earth has an abundant and unique set of skills, experiences, and knowledge that could be turned into commercially profitable products and services. In this book, Sarah Cordiner will take you through the fundamentals of monetising your expertise and profitably sharing what you know with the world. Whether you are an absolute beginner in creating and selling information and education-based products and services, or are up-levelling to a serious education-based business operation; this book will help you get there. Inside this book: How to commercialise your skills, knowledge, and expertise and start profiting from what is already in your head. How to create your own unique 'funnel of service', so that you no longer need to 'sell', and instead have your customers coming eagerly to you for your advice and expertise. A deep dive into the 10 stages of designing and building a highly successful information or education-based business so that you maximise your impact and income. How to price your informational and educational products and services; including courses, consulting, workshops and more. Where and how to sell your educational products for maximum exposure and sales - particularly online courses. The critical elements of an online education based business. What online tools, apps and products you need and how they all fit together for maximum profitability, scalability, and automation. How to use your expertise to become a well-known leader in your industry.

Make Python Talk Mark Liu, 2021-08-24 A project-based book that teaches beginning Python programmers how to build working, useful, and fun voice-controlled applications. This fun, hands-on book will take your basic Python skills to the next level as you build voice-controlled apps to use in your daily life. Starting with a Python refresher and an introduction to speech-recognition/text-to-speech functionalities, you'll soon ease into more advanced topics, like making your own modules and building working voice-controlled apps. Each chapter scaffolds multiple projects that allow you to see real results from your code at a manageable pace, while end-of-chapter exercises strengthen your understanding of new concepts. You'll design interactive games, like Connect Four and Tic-Tac-Toe, and create intelligent computer opponents that talk and take commands; you'll make a real-time language translator, and create voice-activated financial-market apps that track the stocks or cryptocurrencies you are interested in. Finally, you'll load all of these features into the ultimate virtual personal assistant – a conversational VPA that tells jokes, reads the news, and gives you hands-free control of your email, browser, music player, desktop files, and more. Along the way, you'll learn how to:

- Build Python modules, implement animations, and integrate live data into an app
- Use web-scraping skills for voice-controlling podcasts, videos, and web searches
- Fine-tune the speech recognition to accept a variety of input
- Associate regular tasks like opening files and accessing the web with speech commands
- Integrate functionality from other programs into a single VPA with computational knowledge engines to answer almost any question

Packed with cross-platform code examples to download, practice activities and exercises, and explainer images, you'll quickly become proficient in Python coding in general and speech recognition/text to speech in particular.

Earth Force Shemer Kuznits, 2019-04-30 On the first day, a mist descended from the heavens blanketing Earth. On the second day, a cryptic message, 'Infusion commencing', appeared in the corner of everyone's eyes. On the third day, the sick were healed and the crippled walked again. On the fourth day, celebration and joy spread across the globe. And on the fifth day, the warping began... There was no warning. A mist descended from the sky, disabling all technology and causing a weird message to appear at the corner of everyone's eye. The situation grew even worse as animals and people started to warp, transforming into terrible monsters that prey on the livings. Within months, human civilization had crumbled. Unable to fight the seemingly-indestructible beasts, the survivors are reduced to cowering in reinforced shelters. Waiting for the end to come. Helpless. All seemed lost until a few brave souls discovered the secret of their new reality: the Tec and how to use it to level up. Together they represent humanity's last best hope for salvation. But they first must find the answers to the mystery of their new existence. Their journey will require them to quickly adapt to alien technology, operate strange spaceships, and even befriend an extra-terrestrial merchant with an Inferiority Complex.

Dictate Your Book Monica Leonelle, 2021-01-05 Ready to get on board with dictation (finally)?

Like many tools that have come before it, dictation is a new and exciting opportunity to write better, faster, and smarter. But many writers still believe it's not for them. Perhaps they've tried it in the past and it hasn't worked. Or perhaps this new technology is confusing, expensive, or frustrating and that's held them back from taking advantage of it. Smartland Korea Dal Yong Jin, 2017-02-20 The dramatic advancement of cellphone technology has fundamentally changed our daily lives. Smartphones and their applications have created new capital for information and communication technology corporations and changed the way people communicate. Because of an interesting awareness of the significance for digital economy and people's daily culture, many countries, from the U.S. to China, have massively invested in the smartphone industries since the early 21st century. Among them, South Korea has become one of the centers for technology development and digital culture, although the country was once lagging behind in the penetration of the phones and their apps. Yet within the last few years, the country has taken a big step toward their goal of becoming a 'mobile game wonderland' by appropriating smartphones and it now exists as a curious test-bed for the future of smartphone technology. Smartland Korea, as the first attempt to comprehensively analyze mobile communication in the context of Korean smartphones, looks into a largely neglected focus of inquiry, a localized mobile landscape, with particular reference to young Koreans' engagement with their devices and applications. Dal Yong Jin focuses not only on the celebratory achievement of technological advancement, but also the significance of social milieu in the development of the smartphones. He situates the emergence of smartphones within the growth of mobile technologies and overall telecommunications industries embedded in Korea's information and communication technologies. The book examines the technology's innovation and the evolution, the digital economy through the lens of political economy, and the youth culture embedded in the Korean smartphone context.
