Spoils Of War Collection Conor H. Carton,2023-04-05 All three books in 'Spoils Of War', a series of science fiction novels by Conor H. Carton, now available in one volume! Bottle Born Blues: Shakbout Mansard, an artificial life form, wants a quiet life with his family. However, his dangerous knowledge of a plot to overthrow the government of Mengchi makes him a target for terrorists and security forces alike. To make matters worse, he has been hiding a secret that could threaten the lives of all free bottle-born life forms across the systems. In this gripping sci-fi novel, Shakbout must take desperate measures to protect his loved ones and prevent a systems-wide war between factions. The Thousand Year Fall: In the second book in the series, Shakbout finds himself pursued by his past and embroiled in a race against time to stop a cult from destroying inhabited systems. As he becomes a pawn in the struggle to harness the power of the Bottle Born, Shakbout must rely on allies to survive. Ladder To The Sun: Shakbout is forced back into a dangerous situation when a claimant to the Emperor's throne arises, risking a return to war in the Inhabited Systems. Along with his allies, Shakbout fights to stop the process, but faces many obstacles from those who wish to prevent him. As he delves deeper, he uncovers a conspiracy that reveals the dark truth about the spoils of war.

Advanced Information Networking and Applications Leonard Barolli,2023-03-14 Networks of today are going through a rapid evolution and there are many emerging areas of information networking and their applications. Heterogeneous networking supported by recent technological advances in low power wireless communications along with silicon integration of various functionalities such as sensing, communications, intelligence and actuations are emerging as a critically important disruptive computer class based on a new platform, networking structure and interface that enable novel, low cost and high volume applications. Several of such applications have been difficult to realize because of many interconnections problems. To fulfill their large range of applications different kinds of networks need to collaborate and wired and next generation wireless systems should be integrated in order to develop high performance computing solutions to problems arising from the complexities of these networks. This volume covers the theory, design and applications of computer networks, distributed computing and information systems. The aim of the volume "Advanced Information Networking and Applications" is to provide latest research findings, innovative research results, methods and development techniques from both theoretical and practical perspectives related to the emerging areas of information networking and applications.

Raven Walks Around the World Thom Henley,2017-10-07 In 1970, twenty-two-year-old Thom Henley left Michigan and drifted around the northwest coast, getting by on odd jobs and advice from even odder characters. He rode the rails, built a squatter shack on a beach, came to be known as Huckleberry and embarked on adventures along the West Coast and abroad that, just like his Mark Twain namesake, situated him in all the right and wrong places at all the right and wrong times. Eventually, a hippie named Stormy directed him to Haida Gwaii where, upon arrival, a Haida Elder affirmed to the perplexed Huckleberry that she had been expecting him. From that point onward, Henley's life unfolded as if destiny were at work--perhaps with a little help from Raven, the legendary trickster. While kayaking the remote area around South Moresby Island, Henley was struck by the clear-cut logging and desecration of ancient Haida village sites. Henley collaborated with the Haida for the next fourteen years to spearhead the largest environmental campaign in Canadian history and the creation of Gwaii Haanas National Park. Later, he became a co-founder of Rediscovery--a wilderness program for First Nations and non-aboriginal youth that would become a global model for reconciliation. Henley's story is peppered with a cast of unlikely characters serendipitously drawn together, such as the time he hosted then-Prime Minister Pierre Elliott Trudeau and entourage, including five-year-old Justin Trudeau, at his remote driftwood hippie hut (the visit was unanticipated and at the time the helicopter touched down, Henley and a friend were doing laundry). Over and over, Henley found himself at the epicentre of significant events that included a historic train caravan across Canada, an epic Haida canoe voyage, an indigenous rights campaign world tour for the Penan tribespeople of Borneo, as well as two global disasters--the 2004 South Asian tsunami and the 2015 Nepal earthquake. Beautifully recounted with passion, humour and humility, Raven Walks around the World is a moving and thoughtful account of a life lived in harmony with the land and community.

Albatrosses, Petrels and Shearwaters of the World Derek Onley,Paul Scofield,2013-02-28 Famous for their size and elegance in flight, albatrosses are familiar to anyone who has travelled through the southern oceans, and are a flagship family of conservation concern. However, albatrosses are just one of several groups of 'pelagic' birds - those that visit land only to breed, and spend the rest of their lives far from the coast, soaring from ocean to ocean in a never-ending search for food. Mysterious and graceful, these birds can present a formidable identification challenge to even the most experienced birder. This fixed-format ebook provides the answer - the first comprehensive guide to pelagic birds, the albatrosses, petrels, shearwaters, storm-petrels and diving petrels. Optimised for iPad, it features the book in crisp, clear high-resolution. A total of 46 detailed, fully zoomable colour plates highlight key ID criteria of the birds in flight, with close-ups of diagnostic regions of the plumage. The plates are accompanied by accurate distribution maps, while the sparkling text brings the world of these amazing birds to life. Sea-watchers all around the world will find this superb field guide indispensable — and no birder will want to be without it.

Highly accessible and written by experts in the field, Perioperative Pain Management for General and Plastic Surgery is an ideal resource for practicing surgeons, anesthesiologists, critical care personnel, residents, medical students--Provided by publisher.

Cataclysmic Variables and Related Objects A. Evans,Janet H. Wood,2012-12-06 In 1993 we began to consider the possibility of holding a conference on Catacysmic Variables (CVs) at Keele University. There have been several meetings in the area of CVs recently (e. g. Eilat, Abano-Padova, Capetown). However as preparations for the Keele meeting progressed we realized that, while there had been a number of IAU meetings devoted to related and to peripheral topics (such as IAU Colloquium 122 on Classical Novae in 1989, IAU Colloquium 129 on Accretion Disks in 1990), there had been no IAU-sponsored conferences in the area of cataclysmi/: variables (CVs) for a number of years. We felt therefore that the time was ripe to have an IAU meeting de voted to an overview of CVs and related objects and the SOC organized the conference such that there was an emphasis on invited reviews of the most recent advances in the field. The conference covered both CVs and LMXBs and the inter-relations between them. The meeting was held at a time when powerful satellite observatories, and rapid improvements in ground based instrumentation, had led to many advances in both CV and LMXB research. The conference provided a forum to review observations from ASCA, EUVE, ROSAT, Ginga and the recently-refurbished HST. Photo metric, spectroscopic and polarimetric observations of CVs and LMXBs have thrown new light on the distribution of matter and the nature of the stellar components in these systems.
