How Many Stars in the Sky? Lenny Hort,1997-01-20 Mama's away one night, and her son can't sleep. He tries to relax by counting stars, but the more of them he sees, the more determined he is to count every single one. Then the boy finds that Daddy can't sleep either. Together, the two of them set off on an unforgettable all-night journey of discovery.

*Who Put the Stars in the Sky?* Judy Jackson,2011-09-01 This is a delightful and almost whimsical way for a child to learn who put the stars in the sky. These two young boys, Jordan and Gavin, listen to their grandfather tell them how God created the Heavens and Earth, and how God separated Earth, the water and the Heavens. Young children will easily learn about the bible and understand it better, and will certainly want to know more about the bible and God.

**From the Stars in the Sky to the Fish in the Sea** Kai Cheng Thom,Kai Yun Ching,2017-10-16 In the magical time between night and day, when both the sun and the moon are in the sky, a child is born in a little blue house on a hill. And Miu Lan is not just any child, but one who can change into any shape they can imagine. The only problem is they can't decide what to be: A boy or a girl? A bird or a fish? A flower or a shooting star? At school, though, they must endure inquisitive looks and difficult questions from the other children, and they have trouble finding friends who will accept them for who they are. But they find comfort in the loving arms of their mother, who always offers them the same loving refrain: whatever you dream of / i believe you can be / from the stars in the sky to the fish in the sea. In this captivating, beautifully imagined picture book about gender, identity, and the acceptance of the differences between us, Miu Lan faces many questions about who they are and who they may be. But one thing's for sure: no matter what this child becomes, their mother will love them just the same. Kai Cheng Thom is a writer, performance artist, and psychotherapist in Toronto. Her first poetry book, a Place Called No Homeland, was published in 2017. Kai Yun Ching is a community-based organizer, educator, and illustrator in Montreal. Wai-Yant Li is a ceramics artist and illustrator in Montreal.

Better yet, you'll learn how to locate any constellation in relation to the Big Dipper, the North Star and the top of the sky. With two ways to locate each constellation, you'll know where in the sky to look and what to look for! Along the way, you'll be introduced to mythology, facts and tidbits, as well as details about the planets, solar system and more! As an added bonus, the book comes with a red-light flashlight for night reading.

*Stars in the Sky* Casey Grant,2014-11 In all of the stories about aviation and its history, the stories of the first African American stewardesses have been left untold and unknown. We first took to the skies when flying was glamorous and exclusive, when little girls dreamt of being stewardesses, models, or movie stars. We rubbed elbows with the elite and traveled the world when few others could. We flew as pioneers in a global society long before the times of the Internet and globalizaiton. We also kept our heads high, facing down racial prejudice and discrimination. We lived as stars of the sky. I was one of the first African American stewardesses for Delta Air Lines, and I worked alongside other pioneers for almost thrity-five years as co-adventureres and friends. This book tells my story and theirs.--Author's notes.

*The Lights in the Sky are Stars* Fredric Brown,2011-09-29 Starduster Yes, I'm Max Andrews. I'm one of the guys who fought and bled and worked to get to Mars. I figure what I gave up in those early years gave me the right to pilot the next big jump. I've lied and stolen for that right. I'd have killed, too, but I didn't have to. Instead, I let a woman give her life so I could have my chance, my door to space. You think I'd stop at anything, now? I'll be on that rocket, blasting away on America's biggest adventure, the hop out into the stars themselves. Only Fred Brown could have written this deeply moving science fiction novel about one man's epic, life-long struggle to open mankind's pathway to the stars.

**Constellations** Govert Schilling,2019-06-04 Perfect for stargazers and armchair astronomers of all ages, CONSTELLATIONS is a beautifully illustrated, fascinatingguide to all 88 constellations, including an illustrated star map for each. In CONSTELLATIONS, award-winning astronomy writer Govert Schilling takes us on an unprecedented visual tour of all 88 constellations in our night sky. Much more than just a stargazer's guide, CONSTELLATIONS is complete history of astronomy as told by Schilling through the lens of each constellation. The book is organized alphabetically by constellation. Profiles of each constellation include basic information such as size, visibility, and number of stars, as well as information on the discovery and naming of the constellation and associated lore. Beyond details about the constellation itself is information about every astronomical

event that took place or discovery made in the vicinity of the constellation. In the constellation of Cygnus (the Swan) we encounter the location of the first confirmed black hole. A stop at Gemini (the Twins) is a chance to say hello to the dwarf planet Pluto, and in Orion (the hunter) we find the location of the first identified gamma-ray burst. Stunning star maps throughout the book by acclaimed star mapmaker Wil Tirion show us the exact location of every constellation, the details of its structure, as well as its surrounding astronomical neighbors.

Included inside: • season-by-season guide to stargazing • double-sided star chart covering the northern and southern hemispheres • pull-out activities, including Test Your Eyesight cards and a "What do you weigh on other planets?" spinning wheel, plus four sheets of stickers

**Through the Night Sky** DK,2020-09-08 A beautifully illustrated collection of nonfiction stories featuring the many wonders that exist in the night sky. Beginning with a sunset and ending at dawn, Through the Night Sky shines a light on the magical events taking place in the darkness above. Unlike an astronomy book that focuses on eye-popping facts and figures about the universe, Through the Night Sky features a series of incredible stories that take place in the sky at night. Track a colony of bats as they fly through the twilight to pollinate the flowers of the mysterious baobab tree, follow a family into the wilderness to gaze at the constellations, watch whales swimming through chilly Arctic waters under the gentle glow of the Northern Lights, then chart the journey of a ship navigating by the stars. Through the Night Sky is a beautiful book that spans a wide range of subjects, including everything from nocturnal animals or revelers watching fireworks illuminate the night, to celestial objects such as the moon, planets, stars, and meteor showers--all under the vast night sky.
