

Weather Lighthouse

Elspeth Bragdon

Fairing Weather Elspeth Bragdon, 2018-05-10 Bleak Island, where Ann Marsh lived, was a wind-swept, solitary place, but it had everything that can make an island wonderful for a little girl. Then one day the Coast Guard boat brought a small, frightened stranger to Bleak Island: nine-year-old Betsy Gates had come alone all the way from Ohio to stay with her grandmother...

Stormy Weather Paulette Jiles, 2009-10-13 From Paulette Jiles, the acclaimed New York Times bestselling author of *Enemy Women*, comes a poignant and unforgettable story of hardship, sacrifice, and strength in a tragic time—and of a desperate dream born of an undying faith in the arrival of a better day. Oil is king of East Texas during the darkest years of the Great Depression. The Stoddard girls—responsible Mayme, whip-smart tomboy Jeanine, and bookish Bea—know no life but an itinerant one, trailing their father from town to town as he searches for work on the pipelines and derricks; that is, when he's not spending his meager earnings at gambling joints, race tracks, and dance halls. And in every small town in which the windblown family settles, mother Elizabeth does her level best to make each sparse, temporary house they inhabit a home. But the fall of 1937 ushers in a year of devastating drought and dust storms, and the family's fortunes sink further than they ever anticipated when a questionable accident leaves Elizabeth and her girls alone to confront the cruelest hardships of these hardest of times. With no choice left to them, they return to the abandoned family farm. It is Jeanine, proud and stubborn, who single-mindedly devotes herself to rebuilding the farm and their lives. But hard work and good intentions won't make ends meet or pay the back taxes they owe on their

land. In desperation, the Stoddard women place their last hopes for salvation in a wildcat oil well that eats up what little they have left . . . and on the back of late patriarch Jack's one true legacy, a dangerous racehorse named Smoky Joe. And Jeanine, the fatherless daddy's girl, must decide if she will gamble it all . . . on love.

Historic Lighthouses of the Florida Keys Laura Albritton, Jerry Wilkinson, 2021-11-29 The Florida Keys possess a staggering wealth of lighthouses--nine in all, from the remote iron light at Fowey Rocks to classic brick structures at Key West and Loggerhead Key. In the 1820s, the US government began constructing lighthouses to aid mariners navigating the dangerous Florida Reef. While some of the original lights were subsequently destroyed in dramatic circumstances, most that followed, including Carysfort Reef, Alligator Reef, Sombrero Key, Sand Key, and American Shoal, survived intense tropical weather and even major hurricanes. Among the lighthouse keepers were remarkable women who succeeded in a profession usually reserved for men.

Stormy Weather Paulette Jiles,2008-05-27 A New York Times Bestseller! A child of the Texas oil fields, Jeanine Stoddard grew up in poverty. Her father's death and the gambling debts he left behind force the family back to their abandoned farm to eke out a living from the withered land just as the Great Depression settles in. Their last hope may lie in Smoky Joe, a racing stallion as dangerous as he is fast--and in Jeanine's determination to bring the farm to life. When her mother decides to risk the family's last bit of money in a speculative oil-well scheme, Jeanine is left wondering if their misfortunes at gambling won't destroy them all. Paulette Jiles won the Rogers Writers' Trust Fiction Prize for her highly acclaimed debut novel, *Enemy Women*. With *Stormy Weather*, she turns again to the drama of America's history, creating a compelling epic of adversity and hope that brings to life a harsh place and a desperate time.

Historically Famous Lighthouses CG-232 (Illustrations) United States Coast Guard,2015-04-03 Example in this ebook Under the supervision of the United States Coast Guard, there are today some 158 manned lighthouses in the nation. Another 60 are cared for by other Coast Guard units in the general area. There are hundreds of other lights of varied description that are operated automatically. And, as technology improves, more and more lighthouses are being operated without a full time crew. Indeed, many of the isolated lighthouses described in this booklet are

scheduled for automation. In the course of our history as a nation, and before that as British colonies, we have built hundreds of lighthouses, some of which still stand though now inactive, having been sold for private residential or other use. Many have been rebuilt and not a few have succumbed to the ravages of time. The history of our lighthouses thus parallels the history of our nation. Since 1716, when the Province of Massachusetts built Boston Light, scarcely a year has passed that has not seen a new light structure erected somewhere along our sea coasts, on our navigable rivers, or along our lake shores. To tell the story of these lighthouses would be a major undertaking. These stories of some of them, however, have been selected chiefly for their historical interest. Others have been included because their unique locations or types of construction are of more than usual interest. The lighthouse typifies maritime safety. As part of our early coastal defense system, they played a major role in important Coast Guard duties related to military readiness. Additionally, the light's strategic locations along our coasts aided another early Coast Guard function, law enforcement, by making it possible for cutters to judge their distances from the coast and so prevent smuggling operations within the three-mile limit. The stories of 56 lighthouses have been told here. The stories of hundreds of others, of equal interest, could have been included had space permitted. The oldest lighthouse described is the Boston Light built in 1716. The newest in this booklet is Buzzards Bay Light which is located some five miles off the Massachusetts coast, replacing a lightship that had been there for many years. The distance these lights are visible has been given in the geographical range. The theoretical visibility of a light in clear weather depends upon two factors, the height of the light above water, and its

intensity. The height controls what is known as the geographic range, while the intensity controls what is known as the luminous range. As a rule, for the principal lights the luminous range is greater than the geographic, and the distance from which such lights are visible is limited by the earth's curvature only. Under some atmospheric conditions the glare or loom of these lights, and occasionally the light itself, may be visible far beyond the computed geographic range. On the other hand, and unfortunately more frequently, these distances may be lessened by fog, rain, snow, haze, or smoke. To be continue in this ebook

Lightships Wayne Kirklin, 2007-09-30 Light boats, light vessels, lightships—before radar, depth-finders and satellite-guided navigation, mariners relied on floating lighthouses that lingered offshore as warning beacons in perilous waters. Moored near shifting shoals and treacherous reefs, lightships remained on station during all weather conditions and played a vital role in keeping America's waterways safe for navigation. From 1820 to 1985, light vessels warned of treacherous seas and pointed the way to safe harbors. In *Lightships*, author Wayne Kirklin chronicles the eighty-five ships that protected the mid-Atlantic coast and the heyday of these special craft. From New York Harbor to the southernmost edge of North Carolina's notorious Cape Fear, Kirklin details the unsung role this fleet played in keeping America's merchant marines safe. Read *Lightships* to discover a forgotten but vital element of American maritime history.

Pacific Coast of the United States. Buoy List, Alaska. Sixteenth Lighthouse District United States. Bureau of Light-Houses, 1923

Sentinel of the Seas Dennis M. Powers, 2007 One of the most rugged expanses in the continental U.S., the coast of

northern California and Oregon saw frequent shipping disasters in the 19th century, before Congress ordered the construction of lighthouses on such dangerous promontories as Heceta Head, Cape Mendocino and a seaward-trending pile of rocks called St. George Reef. The brave, resourceful engineer who directed the Tillamook Rock lighthouse construction, Alexander Ballantyne, was later engaged for the St. George job, and it's this story that author Powers (Treasure Ship) chronicles here. Without any maps to illustrate it, however, readers will need an atlas to follow the movement of men and ships up and down the coast. Later chapters describing lighthouse life prove less problematic; lighthouse keepers were fascinating, courageous characters (and included a good number of women) who not only kept lights burning and fog horns sounding, but also risked life and limb to rescue people stranded in torrential weather.

And Now The Shipping Forecast Peter

Jefferson, 2011-05-19 Peter Jefferson presented The Shipping Forecast for over 40 years, and his familiar voice continued to be heard reading quotations on BBC Radio 4's Quote... Unquote. This book is both an affectionate memoir and a history of the science and BBC programming behind the forecast. Peter explains how it came out, who collects all the information and what it's like to read this bulletin. Even though the information in the forecast is now readily available in many formats, The Shipping Forecast is something of a 'must listen' for fans gathered over the decades. For reasons not quite understood, it has become a much-loved part of the British cultural landscape with an avid following of listeners who find its poetry is the perfect cure for insomnia. This book is perfect for those fans.

The Last Lighthouse Keeper John Cook, Jon

Bauer, 2020-07-02 John Cook's ripping life story exposes

Tasmania's old kero-fuelled lighthouses: relentless physically and emotionally demanding labour, done under the often cruel vagaries of nature. Noble work that can ultimately redeem a lost soul. Or break them.' MATTHEW EVANS I loved the life of the island, because I knew my body was more alive than it was on the mainland. People asked how we stood the isolation and boredom, but in some ways, it was more stimulating to have your senses turned up. In Tasmania, John Cook is known as 'The Keeper of the Flame'. As one of Australia's longest-serving lighthouse keepers, John spent 26 years tending Tasmania's well-known kerosene 'lights' at Tasman Island, Maatsuyker Island and Bruny Island. From sleepless nights keeping the lights alive, battling the wind and sea as they ripped at gutters and flooded stores, raising a joey, tending sheep and keeping ducks and chickens, the life of a keeper was one of unexpected joy and heartbreak. But for John, nothing was more heartbreaking than the introduction of electric lights, and the lighthouses that were left empty forever. Evocatively told, *The Last Lighthouse Keeper* is a love story between a man and a dying way of life, as well as a celebration of wilderness and solitude.
