*Getting Started with Your Mac and Mac OS X Tiger*  
Scott Kelby, 2005-05-25 You bought your Mac OS X Tiger computer because you thought it would be easy to use-and it is! But if you've never used a computer before, never

stared at a graphical user interface or clicked an icon to launch a program or open a file, getting going with your new machine can still be a daunting proposition. With this guide from legendary author Scott Kelby, it doesn't have to be! Realizing there are still plenty of novice users just like yourself whose Macs represent their very first foray into personal computing, this guide provides a simple, practical approach guaranteed to get you sending email, going on the Internet, creating Word documents, and more immediately with Mac OS X Tiger. Focused lessons take you step-by-step through all of the tasks you're most eager to tackle with your Mac OS X Tiger machine (in the order you're likely to approach them): using the mouse, going on the Internet, sending email, initiating iChat sessions, creating address books and calendars, importing and sharing photos, making play lists and burning CDs, synching music with your iPod, launching and saving Word documents, using search (Spotlight), organizing files, and more.

**Mac OS X Tiger Killer Tips** Scott Kelby, 2005-08-08  
Tips rule! Have you ever noticed that in just about every Mac book, the author will include a couple of tips in each chapter (you'll usually find them in the sidebar, or at the bottom of the page in a tinted box). Sometimes it's a shortcut, a faster way to do something, or a clever workaround that just makes your life easier. People really love those tips, but there's only one problem--there's never enough of them. That's why Scott Kelby, bestselling author and Editor-in-Chief of Mac Design magazine came up with the idea to create a book that's nothing but "sidebar" tips. That's right--this entire book, cover-to-cover is packed with nothing but those cool inside secrets, slick workarounds, undocumented shortcuts, and sneaky little tricks that will make you faster, better, and have more fun using Mac OS

10.4 (Tiger). Nothing but the tips! You're not going to find complicated descriptions on how to configure a network, how to partition a hard drive, or lines and lines of scary-looking UNIX code--instead this book is nothing but cool tips--and it's all written in Scott's casual, plain English style so you can start using these tips today. Plus, this book does the standard sidebar tip one better by including a clear screen capture with nearly every tip, so you can see exactly how it's all done. Not just tips. Killer tips! To be in this book, every tip has got to be a Killer Tip (the kind of tip that makes you nod and smile, then call all your Mac buddies to tune them up with your new-found power). Scott's a total hip hound (in fact, it was Scott who created the entire smash-bestselling Killer Tips book series), and he doesn't hold anything back--it's all here from the man who literally wrote the book on cool productivity tips. If you like doing things the easy way, if you like getting twice the work done in half the time, and if you get a kick out of knowing all the inside secrets and undocumented shortcuts that will wow your friends and coworkers, you're absolutely going to love this book.
