*How to Write Web Copy and Social Media Content* Paul Lima, 2014-08-25 *How to Write Web Copy and Social Media Content: Spruce up Your Website Copy, Blog Posts and Social Media Content* is more than an online writing book. While writing for online media is the focus, the book takes writers through the important writing process--showing them how to think before they write. Then it demonstrates how to apply this process to website copy, including structuring copy on websites, blog posts and social media such as Twitter, Facebook and LinkedIn. This book is for those who want to make their website and blog copy sparkle and boost the effectiveness of their social media content. The book is

based on business-writing and online and social media copywriting courses that the author teaches for University of Toronto continuing education students and for corporate clients. In short, *How to Write Web Copy and Social Media Content* will help you organize your thoughts before you write, become a more effective and efficient online writer, make your points in a concise and easy to read/scan manner, achieve your purpose and obtain feedback (if so desired). This book is all about communicating more effectively online so your readers understand why you are writing and what action, if any (remember, a click is an action), you need them to take. It is filled with samples, examples and exercises to get you writing for various online media.

The Complete Guide to Writing Web-based Advertising Copy to Get the Sale Vickie Taylor, 2008 Since the advent of the Internet and since more and more people are making purchases online, writers have had to adapt to composing copy for the Web. Contrary to what many people think, writing for the Web and writing for print are not the same and involve very different skill sets. Instead of struggling to find the right words, copywriters should read this new book from cover to cover to discover how to write sales-generating copy. *The Complete Guide to Writing Web-based Advertising Copy*

to Get the Sale will teach you how to make your copy readable and compelling, how to reach your target audience, how to structure the copy, how to visually format the copy, how to forget everything you ever learned about writing, how to pull in visitors, how to convince visitors to buy, how to outline and achieve your goals, how to create a customer profile, how to create a unique selling position, how to include searchable keywords in the copy, how to convert prospects to paying customers, and how to compose eye-catching headlines. In addition, you will learn about the trends in Web-based advertising; the categories of advertising; the important information that needs to be included in your copy, such as what you are selling, what sets your product apart from the competition s, where you are located, what makes your product affordable, and why you yourself would buy the product; writing in the inverted pyramid sty□ the do's and don'ts of Web-based advertising; and key phrases to incorporate in your copy. We will also provide you with some common mistakes to avoid and tips for writing, revising, and proofreading. By incorporating the principles in this book, you will take your Web-based advertising copy from boring to brilliant, while boosting your sales and increasing your customer traffic. **Writing Copy for the Web in a Week** Nigel Temple,2003 Do you own, run or have input into a business website? Do you write, commission or edit any of the words? If the answer is 'yes' to either or both of these questions, then this book can help you. Why do customers and prospects visit your website? Why do they return? For a business website, the answer is information. The majority of this information comprises words which we will call 'web copy'.
