McNeill,2011-04-27 The third edition of this book is an updated and expanded presentation of the widely used Integrative Developmental Model of Supervision. In addition to presenting a model of therapist development that spans beginning through advanced training, the book integrates theory and research from numerous perspectives, including learning, cognition, and emotion, as well as an up-to-date treatment of research directly addressing the supervision process. The model also examines the role of clinical supervision from an evidence-based practice perspective and addresses issues of common factors in therapy. The impact of cultural issues in supervision and training, as well as recent work in a competencies approach to supervision and trainee development, are also examined.
