A New Course in Reading Pali James W. Gair, W. S.

Karunatilake,2017-01-01 This book is intended and serve as an introduction to the reading of Pali texts. For that purpose, it uses authentic readings especially compiled for the purpose drawn largely from Theravada canonical works, both prose and poetry. The reading are in Roman script, and carefully graded for difficulty, but they have also been selected so that each of them is a meaningful and complete reading in itself, so as to introduce some basic concepts and ways of thought of Theravada Buddhism. This book thus offers and opportunity to become acquainted with the ways in which the teachings of the Buddha are embodied in the language, a sense that it impossible to determine from English translations. The book contains 12 lessons. Each of them has three parts: (1) a set of basic readings and an accompanying glossary, (2) grammatical notes on the forms in the less, and (3) a set of further readings with its own glossary. The further readings introduce no new grammatical points, but reinforce ones already presented and give further practice in them. The work concludes, fittingly, with the Buddha's first sermon, The Dhammacakkapavattana Sutta. A cumulative glossary and index to the grammar is also provided. The text has been used successfully in its preliminary form at several universities, but it may also be used for self-study.

The Korean Vegan Cookbook Joanne Lee

Molinaro,2021-10-12 THE INSTANT NEW YORK TIMES
BESTSELLER • NAMED ONE OF THE BEST NEW COOKBOOKS
OF THE YEAR BY Epicurious • EATER • Stained Page •
Infatuation • Spruce Eats • Publisher's Weekly • Food52 •
Toronto Star The dazzling debut cookbook from Joanne Lee
Molinaro, the home cook and spellbinding storyteller behind the
online sensation @thekoreanvegan Joanne Lee Molinaro has
captivated millions of fans with her powerfully moving personal
tales of love, family, and food. In her debut cookbook, she shares
a collection of her favorite Korean dishes, some traditional and
some reimaged, as well as poignant narrative snapshots that

have shaped her family history. As Joanne reveals, she's often asked, "How can you be vegan and Korean?" Korean cooking is, after all, synonymous with fish sauce and barbecue. And although grilled meat is indeed prevalent in some Korean food, the ingredients that filled out bapsangs on Joanne's table growing up—doenjang (fermented soybean paste), gochujang (chili sauce), dashima (seaweed), and more—are fully plant-based, unbelievably flavorful, and totally Korean. Some of the recipes come straight from her childhood: Jjajangmyun, the rich Korean-Chinese black bean noodles she ate on birthdays, or the humble Gamja Guk, a potato-and-leek soup her father makes. Some pay homage: Chocolate Sweet Potato Cake is an ode to the two foods that saved her mother's life after she fled North Korea. The Korean Vegan Cookbook is a rich portrait of the immigrant experience with life lessons that are universal. It celebrates how deeply food and the ones we love shape our identity.

Ikigai Héctor García, Francesc Miralles, 2017-08-29
INTERNATIONAL BESTSELLER • 1.5 MILLION+ COPIES SOLD

WORLDWIDE “Workers looking for more fulfilling positions should start by identifying their ikigai.” —Business Insider “One of the unintended—yet positive—consequences of the [pandemic] is that it is forcing people to reevaluate their jobs, careers, and lives. Use this time wisely, find your personal ikigai, and live your best life.” —Forbes Find your ikigai (pronounced ee-key-guy) to live longer and bring more meaning and joy to all your days. “Only staying active will make you want to live a hundred years.” —Japanese proverb According to the Japanese, everyone has an ikigai—a reason for living. And according to the residents of the Japanese village with the world’s longest-living people, finding it is the key to a happier and longer life. Having a strong sense of ikigai—where what you love, what you’re good at, what you can get paid for, and what the world needs all overlap—means that each day is infused with meaning. It’s the reason we get up in the morning. It’s also the reason many Japanese never really retire (in fact there’s no word in Japanese that means retire in the sense it does in English): They remain active and work at what they enjoy, because they’ve found a real purpose in life—the happiness of always being busy. In researching this book, the authors interviewed the residents of the Japanese village with the highest percentage of 100-year-olds—one of the world’s Blue Zones. Ikigai reveals the secrets to their longevity and happiness: how they eat, how they move, how they work, how they foster collaboration and community, and—their best-kept secret—how they find the ikigai that brings satisfaction to their lives. And it provides practical tools to help you discover your own ikigai. Because who doesn’t want to find happiness in every day?

Acting with Technology Victor Kaptelinin, Bonnie A.

Nardi, 2009-08-07 A systematic presentation of activity theory, its application to interaction design, and an argument for the development of activity theory as a basis for understanding how people interact with technology. Activity theory holds that the human mind is the product of our interaction with people and

artifacts in the context of everyday activity. Acting with Technology makes the case for activity theory as a basis for understanding our relationship with technology. Victor Kaptelinin and Bonnie Nardi describe activity theory's principles, history, relationship to other theoretical approaches, and application to the analysis and design of technologies. The book provides the first systematic entry-level introduction to the major principles of activity theory. It describes the accumulating body of work in interaction design informed by activity theory, drawing on work from an international community of scholars and designers. Kaptelinin and Nardi examine the notion of the object of activity, describe its use in an empirical study, and discuss key debates in the development of activity theory. Finally, they outline current and future issues in activity theory, providing a comparative analysis of the theory and its leading theoretical competitors within interaction design: distributed cognition, actor-network theory, and phenomenologically inspired approaches.

The Present and Future of Music Law Ann Harrison, Tony Rigg, 2021-07-29 The music business is a multifaceted, transnational industry that operates within complex and rapidly changing political, economic, cultural and technological contexts. The mode and manner of how music is created, obtained, consumed and exploited is evolving rapidly. It is based on relationships that can be both complimentary and at times confrontational, and around roles that interact, overlap and sometimes merge, reflecting the competing and coinciding interests of creative artists and music industry professionals. It falls to music law and legal practice to provide the underpinning framework to enable these complex relationships to flourish, to provide a means to resolve disputes, and to facilitate commerce in a challenging and dynamic business environment. The Present and Future of Music Law presents thirteen case studies written by experts in their fields, examining a range of key topics at the points where music law and the post-digital music industry

intersect, offering a timely exploration of the current landscape and insights into the future shape of the interface between music business and music law.

47 Easy-to-Do Classic Science Experiments Eugene F. Provenzo, Asterie Baker Provenzo, 2012-07-31 Here is a highly motivating book for grade-school students that will introduce them to many of the world's most popular (and historically significant) scientific experiments. They'll learn about gravity simply by following the acrobatic antics of an ordinary coin. By trying to blow an egg out of a cup, they'll discover the principles of air pressure. Dancing soap bubbles will help them understand the effects of static electricity, and by dropping quarters into a full glass of water without causing it to overflow, they'll study the effects of surface tension. These and over 40 other experiments have been carefully selected by noted educators Eugene and Asterie Baker Provenzo to familiarize children with classic science experiments involving optics, inertia, air pressure, magnetism, sound, topology, light, density, vibration, prisms, elasticity, gases, vacuum, perspective, geometry, centrifugal

force, buoyancy, color, and much more. Some experiments, such as the optical Newton's Rings are hundreds of years old. Still others, like the straw lever test, are based on Greek experiments with leverage and the center of gravity — first carried out thousands of years ago. Easy-to-follow instructions and illustrations show youngsters how to perform each experiment, most of which are prefaced with historical background, a list of necessary materials and an explanation of key terms. Almost all experiments can be carried out with common household items (tissue paper, scissors, tapes, rubber balloons, pens, pencils, etc.) and can be worked at home or in the classroom to demonstrate specific scientific principles or to supplement a science-curriculum unit. Sources for all historical illustrations given in the text are listed at the end of the book.
