Future Tech Trond Arne Undheim, 2021-03-03 Amazon's Fire phone. Google Glass. Facebook Home. Quikster. New technologies alone don't always cause industry changes. Future Tech explains how the four forces of technology, policy, business models and social dynamics work together to create industry disruption and how this understanding can help to predict what is coming next. Technology is generally viewed as the single force that disrupts markets. However, history is rife with stories of technologies that have failed to meet such hyped expectations. In Future Tech, the author reveals that true change only results from combining the forces of science and technology, policy and regulation, new business models (i.e. sharing economy) and social dynamics (whether or not people adopt it). Whether these four forces align explains why some technologies, such as AI, blockchain, robotics, synthetic biology and 3D printing, stick and why others fail. With an understanding of these four forces, business executives and policymakers can explain what technology is likely to stick and even anticipate what is coming next. By 2030, the global labor force will be led by an elite set of knowledge workers enabled by robotic AI. To help individuals thrive in this workplace, Future Tech advises readers to develop their human capabilities of creativity and adaptation, develop deep expertise in one domain while being well-versed in dozens more, and develop a personalized approach to acquiring and processing information and deliberating decisions.

Comparative Competition Law Thomas Weck, Masako Wakui, 2023-12-04 This book provides a comparative overview of the rules of EU, US, and Japanese law on competition. After an overview of their history and the underlying economic issues, it compares perspectives on cartels and other agreements restraining competition (ancillary agreements, R&D/specialization agreements, distribution agreements); single-firm conduct (abuse of dominant market power/monopolization); general procedural law and merger control, and state measures such as regulation and subsidies. In each case, the presentation of the legal system is supplemented by examples from the case law. With a focus on the protection of competition in digital markets, new regulatory approaches (e.g., the EU Digital Markets Act and comparable US regulatory initiatives) are evaluated and current legal developments in other jurisdictions are addressed.

You Might Want To Marry My Husband Yap Swi Neo, 2021-12-01 My first aunt, Tua-Ee, left hand on hip, right hand holding a ladle of boiling salted vegetable and duck soup, would administer the test. Looking straight into our eyes, she would ask, "Is the soup done?" If we got it wrong, she scolded us, "Next time, what would your mother-in-law say, ah? Your mother n-e-v-e-r teach you. Where to put your face? So malu!" My cousin and I swore we

would never ever get married and live with mothers-in-law who would administer the “Is the soup done?” test and put our mothers to shame. In this intimate collection of autobiographical stories that every woman should read, Swi offers tales of deep reflection that relate to the tears and laughter, and the love and pain felt by girls and women in Malaysia and Singapore over the last 75 years. Swi recalls the convent sisters in Malacca who educated her and her classmates about sex, the camaraderie among girlfriends, and desires fulfilled. She explores issues of life and death and shares memories of the unforgettable men in her life. Swi holds in high regard the mothers under banana leaf umbrellas who dreamed great dreams for their children, and she introduces us to memorable characters including ‘bling, bling, the real thing, Pansy’, a lecherous Baba patriarch and his complaining wife, a Jonker Street cake shop baker whose strong arms are made to hug, a Singaporean academic with low EQ, and a nameless Malaysian bondmaid who must secure her place in a wealthy household. These are stories from the heart.

Genitori social ai tempi di Facebook e WhatsApp Andrea Bilotto,Iacopo Casadei,2015-11-12 Internet e le nuove tecnologie permettono di fare viaggi affascinanti, di ampliare le nostre conoscenze, di incontrare, seppure virtualmente, persone di tutto il mondo. Presentano però anche alcuni pericoli, che molti genitori, per i quali il web è ancora un mondo poco conosciuto, non sanno gestire. Il libro descrive l’universo della Rete, dei social network e delle applicazioni di instant messaging, sottolineandone gli effetti positivi sulla formazione dell’identità e delle abilità sociali dei nostri figli e suggerendo le modalità per aiutarli a difendersi dai rischi che i nuovi media comportano: le forme di dipendenza, la violazione della privacy, il cyberbullismo, la pornografia. Senza perdere mai di vista che la strada per salvaguardare i ragazzi da qualsiasi pericolo online (e offline) passa attraverso una corretta informazione e un’educazione consapevole.
