Guide on digital agricultural extension and advisory services Food and Agriculture Organization of the United Nations,2023-03-30 Digital agricultural extension and advisory services (AEAS) have a great potential to enhance accessibility, delivery, transparency, scope and impacts of information and services for smallholder farmers. However, this potential is often unfully harnessed and the benefits of digital AEAS unequally distributed due to an evident, widening digital divide between rural and urban areas, gender, and different social groups both within and among regions. Due to low-level e-literacy and digital skills, particularly smallholder farmers in rural areas in developing countries have limited access to and utilization of digital AEAS. Considering the above-mentioned benefits of digital AEAS, their poor uptake by smallholder farmers, and the importance of digital empowerment of smallholder farmers in particular, this guide, targeting smallholder farmers in need of digital AEAS as its principal users, provides a set of tools to enhance their digital skills in terms of basic knowledge and skills on using digital tools, methods of access to digital AEAS, methods of access to e-commerce, and capacity building.

Encrypt, Sign, Attack Olaf Manz,2022-12-14 This book explains compactly, without theoretical superstructure and with as little mathematical formalism as possible, the essential concepts in the encryption of messages and data worthy of protection. The focus is on the description of the historically and practically important cipher, signature and authentication methods. Both symmetric encryption and public-key ciphers are discussed. In each case, the strategies used to attack and attempt to crack encryption are also discussed. Special emphasis is placed on the practical use of ciphers, especially in the everyday environment. The book is suitable for working groups at STEM schools and STEM teacher training, for introductory courses at universities as well as for interested students and adults.

The Palestine Laboratory Antony Loewenstein, 2023-05-23 How Israel makes a killing from the occupation of Palestine Israel's military industrial complex uses the occupied, Palestinian territories as a testing ground for weaponry and surveillance technology that they then export around the world to despots and democracies. For more than 50 years, occupation of the West Bank and Gaza has given the Israeli state invaluable experience in controlling an "enemy" population, the Palestinians. It's here that they have perfected the architecture of control. Best-selling journalist Antony Loewenstein, author of *Disaster Capitalism*, uncovers this largely hidden world in a global investigation with secret documents, revealing interviews and on-the-ground reporting. This book shows in-depth, for the first time, how Palestine has become the perfect laboratory for the Israeli military-techno complex: surveillance, home demolitions, indefinite incarceration and brutality to the hi-tech tools that drive the 'Start-up Nation'. From the Pegasus software that

hacked Jeff Bezos' and Jamal Khashoggi's phones, the weapons sold to the Myanmar army that has murdered thousands of Rohingyas and drones used by the European Union to monitor refugees in the Mediterranean who are left to drown. Israel has become a global leader in spying technology and defence hardware that fuels the globe's most brutal conflicts. As ethno-nationalism grows in the 21st century, Israel has built the ultimate model.

Foolproof: Why Misinformation Infects Our Minds and How to Build Immunity Sander van der Linden, 2023-03-21 A Next Big Idea Club Must-Read • A Financial Times Best Book of the Week A must-read for those of us interested in resisting the spread of disinformation. —Dale Hartley, Psychology Today Informed by decades of research and on-the-ground experience advising governments and tech companies, Foolproof is the definitive guide to navigating the misinformation age. From fake news to conspiracy theories, from inflammatory memes to misleading headlines, misinformation has swiftly become the defining problem of our era. The crisis threatens the integrity of our democracies, our ability to cultivate trusting relationships, even our physical and psychological well-being—yet most attempts to combat it have proven insufficient. In Foolproof, one of the world's leading experts on misinformation lays out a crucial new paradigm for understanding and defending ourselves against the worldwide infodemic. With remarkable clarity, Sander van der Linden explains why our brains are so vulnerable to misinformation, how it spreads across social networks, and what we can do to protect ourselves and others. Like a virus, misinformation infects our minds, exploiting shortcuts in how we see and process information to alter our beliefs, modify our memories, and replicate at astonishing rates. Once the virus takes hold, it's very hard to cure. Strategies like fact-checking and debunking can leave a falsehood still festering or, at worst, even strengthen its hold. But we aren't helpless. As van der Linden shows based on award-winning original research, we can cultivate immunity through the innovative science of "prebunking": inoculating people against false information by preemptively exposing them to a weakened dose, thus empowering them to identify and fend off its manipulative tactics. Deconstructing the characteristic techniques of conspiracies and misinformation, van der Linden gives readers practical tools to defend themselves and others against nefarious persuasion—whether at scale or around their own dinner table.

Dirty War Stephen Leather, 2022-07-21 THE NEW MUST-READ SPIDER SHEPHERD THRILLER The target - the Prime Minister. The assassins - hard-bitten jihadists with nothing to lose. The only man who can stop them? Dan Spider Shepherd. But Shepherd's reputation is also on the line - he helped get one of the jihadists into the UK during the final days of the War in Afghanistan. Now he has to track down the man whose life he once saved. But the assassins aren't lone wolf killers - someone much more devious is pulling their strings. And the clock is ticking . . .

Multi-Agent Systems Dorothea Baumeister, Jörg Rothe, 2022-12-10 This book constitutes thoroughly refereed and revised selected papers from the proceedings of 19th European Conference on Multi-Agent Systems, EUMAS 2022, held in Düsseldorf, Germany, during September 14-16, 2022. The 23 full papers included in this book were carefully reviewed and selected from 36 submissions. The book also contains 6 short summaries of talks from PhD students at the PhD day. The papers deal with current topics in the research and development of multi-agent systems.

Video Conferencing Axel Volmar, Olga Moskatova, Jan Distelmeyer, 2023-11-30 The COVID-19 pandemic has reorganized existing methods of exchange, turning comparatively marginal technologies into the new normal. Multipoint videoconferencing in particular

has become a favored means for web-based forms of remote communication and collaboration without physical copresence. Taking the recent mainstreaming of videoconferencing as its point of departure, this anthology examines the complex mediality of this new form of social interaction. Connecting theoretical reflection with material case studies, the contributors question practices, politics and aesthetics of videoconferencing and the specific meanings it acquires in different historical, cultural and social contexts.

Organising during the Coronavirus Crisis Mike Healy, 2022-05-03 This book investigates the use of digital technologies for social organisation during the Covid-19 pandemic, interrogating the specific relationship between digital technologies and social movements. Drawing upon Marx's theory of alienation and Antonio Gramsci's concepts concerning common-sense, good sense, hegemony and praxis, the author examines the effectiveness of digital technologies in filling the social void created by the pandemic. A series of in-depth interviews across a spectrum of areas – from community activism, mental health, trade union organisation, the creative arts, and resistance movements – reveal how digital technologies flourished during the pandemic crisis, facilitating new ways to communicate. However, the interviews also throw into sharp relief the inadequacies of digital technologies. The book challenges conventional wisdom concerning the beneficial impact of digital machines on our lives. This book will have a broad appeal to anyone researching or teaching the societal, ethical and political implications of digital technologies, particularly from a qualitative perspective. It also has relevance for a wider readership concerned about the influence of social media.
