Calling Family Tanja Ahlin, 2023-08-11 How do digital technologies shape both how people care for each other and, through that, who they are? With technological innovation is on the rise and increasing migration introducing vast distances between family members--a situation additionally complicated by the COVID-19 pandemic and the requirements of physical distancing, especially for the most vulnerable – older adults--this is a pertinent question. Through ethnographic fieldwork among families of migrating nurses from Kerala, India, Tanja Ahlin explores how digital technologies shape elder care when adult children and their aging parents live far apart. Coming from a country in which appropriate elder care is closely associated with co-residence, these families tinker with smartphones and social media to establish how care at a distance can and should be done to be considered good. Through the notion of transnational care collectives, *Calling Family* uncovers the subtle workings of digital technologies on care across countries and continents when being physically together is not feasible. *Calling Family* provides a better understanding of technological relationality that can only be expected to further intensify in the future.

The Impact of Covid-19 on Prison Conditions and Penal Policy Frieder Dünkel, Stefan Harrendorf, Dirk van Zyl Smit, 2022-04-19 The Impact of COVID-19 on Prison Conditions and Penal Policy presents the results of a worldwide exchange of information on the impact of COVID-19 in prisons. It also focuses on the human rights questions that have been raised during the pandemic, relating to the treatment of prisoners in institutions for both juveniles and adults worldwide. The first part brings together the findings and conclusions of leading prison academics and practitioners, presenting national reports with information on the prison system, prison population rates, how COVID-19 was and is managed in prisons, and its impact on living conditions inside prisons and on reintegration programmes. Forty-four countries are covered – many in Europe, but also Argentina, Brazil, Chile, Colombia, Perú, Costa Rica, Canada, the USA, Kenya, South Africa, China, India, Japan, Australia and New Zealand. In the second part, thematic chapters concentrate explicitly on the impact of the pandemic on the application of international human rights standards in prisons and on worldwide prison population rates. The book concludes by drawing out the commonalities and diverging practices between jurisdictions, discussing the impact of measures introduced and reflecting on what could be learnt from policies that emerged during the pandemic. Particular attention is paid to whether reductionist strategies that emerged during the pandemic can be used to counteract mass incarceration and prison overcrowding in the future. Although the book reflects the situation until mid 2021, after the second and during the third wave of the pandemic, it is highly relevant to the current situation, as the living conditions in prisons did not change significantly during the following waves, which showed high infection rates (in particular in the general population), but increased vaccination rates, too. In prisons, problems the pandemic raises have an even greater impact than for the general society. Revealing many notable and interesting changes in prison life and in release programmes, this book is essential reading for students and scholars of penology, criminology, law, sociology and public health. It will also appeal to criminal justice practitioners and policy makers.

The Pandemic and Social Science Approaches to Teaching and Learning Ojong Maheshvari, 2023-01-12 Undoubtedly, Covid-19 caused major disruptions in several realms of human life. Not least affected is higher education. New modes of learning, teaching and research had to be introduced to avoid a total shutdown of this crucial function of society. Educational institutions around the world had to devise ways and means to carry on with their core business of teaching, learning and research that could not be delayed due to the restrictions imposed by Covid-19. The arrival of this timely compendium makes its mark in this context. Focusing on the Social Sciences, the contributions in this volume show how an unexpected eventuality of a social situation can be handled and how teaching, learning and research are managed in the new situation. Through creative, innovative and transformative pedagogical approaches, academics are able to handle the situation quite successfully. The models and the examples presented in the book have applications in both pandemic and post-pandemic contexts. Although evidence is drawn from a single higher learning

institution in South Africa, the findings have significance in other contexts.

Handbook of Transnational Families Around the World Javiera Cienfuegos,Rosa Brandhorst,Deborah Fahy Bryceson,2023-01-01 This handbook compiles the most up-to-date research on transnational families. It employs a dialogue between classical approaches and cutting-edge directions in transnational family research to identify continuities and changes in terms of socioeconomic disparities and actors, and to analyze coexistence. Further, the volume adopts a twofold global and international comparative perspective. On the one hand, it focuses on different migratory flows around the world and describes their entangled logics; on the other, it is written by an international group of contributors, with a diverse range of professional backgrounds. Their contributions are based on sound empirical research, and explore geographical regions around the world. The handbook presents different thematic perspectives on transnational families, including an analytical focus on gender, global sociodemographic inequalities, power asymmetries, and border- and mobility regimes, as well as the organization of transnational care, transnational fatherhood, ageing, family reunions and return. It also includes a variety of methodological approaches to transnational family research, ranging from ethnography, biographical research, and life-course methods, to multi-sited approaches and quantitative surveys. Investigating an emergent debate, it sheds new light on migratory fluxes, their common and specific determinants, the types of actors involved, and ways to empirically and methodologically approach them. This is a must-read reference for social scientists interested in family research, migration, and gender studies.
