New Advances in the Internet of Things Ronald R. Yager,Jordán Pascual Espada,2017-06-23 This book presents a selection of highly relevant works concerning the Internet of Things, including: IoT Architectures, Standardization, Smart Cities, Smart Health, the communication of Smart Things, and outstanding IoT use cases. Some of these works present important future lines for the evolution of IoT systems. Thanks to its unique structure, the book allows authors to describe their works at an unprecedented level of detail. The special chapters contain extended versions of prominent and/or high-impact IoT projects that have laid the foundations of many subsequent IoT systems due to their level of innovation, and reflect highly relevant and innovative trends in the development of a new generation of IoT Systems.

Enemy of Mine Brad Taylor,2013-01-15 Pike Logan and the Taskforce trail a trained killer through the Middle East in this heart-pounding installment of Brad Taylor's New York Times bestselling series. A tentative peace between Israel and Palestine has been brokered by the United States. But the Taskforce—a clandestine team operating outside of US law to protect the country from terrorism—hears of an assassination attempt on the American envoy sent to solidify the treaty. The Taskforce must devote every resource to saving his life—and preventing another bloody outbreak of violence. Taskforce operator Pike Logan and his partner, Jennifer Cahill, must hunt down the assassin through the Middle East, following a trail that becomes more perilous at every turn. And they must deal with terrorist organizations, independent killers, and shaky allies to uncover the biggest threat of all: an American citizen hiding a secret that just may destroy everything, including the Taskforce.

Hotel Llama Larry Mogelonsky,2014-11-25 Read The Whole Series! Hotel Llama is the third anthology book in Larry Mogelonsky's series following

Are You an Ostrich or a Llama? (2012) and Llamas Rule (2013). Together, they give a detailed picture of the present hotel business landscape, outlining how to best navigate new technological issues shaping our industry in addition to the need for a perpetual commitment to exceptional service. All three books draw from Larry's extensive experience in the field as well as the prudence of other senior managers and corporate executives active in the hospitality industry. Offering creative and effective solutions to today's problems, this collection will give you the tools you need to thrive in the modern hotel world. The Llama Digital Educational Program In tandem with the publishing of this book, Larry Mogelonsky has created an online educational program for hoteliers to sharpen their skill sets. Entitled Llama Digital, this interactive web portal allows executives, managers, staff members and hospitality students to access all the articles from the three books in the series. Attached to each article are several complex questions designed to give a more detailed analysis of the issues through the form of written responses so that hoteliers will improve their writing proficiency in addition to honing their managerial skills. To learn more about the Llama Digital educational program and how it can enhance your skillset in the hospitality field, go to www.lmadigital.ca. Why You Need This Book The hotel world is evolving. The proliferation of new mobile technologies, online travel agencies, social media and third-party review websites represent four great disruptors for any hotelier's business. And these are just the tip of the iceberg. Customer behavior is changing too rapidly for traditional hospitality marketing and operations textbooks to keep up. The modern traveler is highly intelligent and incredibly discerning when it comes to hotel purchases. In order to understand this consumer revolution, you must arm yourself with the latest resources. Enter Hotel Llama, the third book in the series written to give hoteliers the best tools in their arsenal to prosper in these changing times. This is not an introductory textbook on the hospitality industry, but rather a compilation of selected topics that highlight both modern success stories as well as the blunders to avoid. This book will strengthen your management skills by explaining many of the sales, marketing, branding, technological and psychological principles at work behind such contemporary facets of hotel operations as proper website design, channel distribution and emerging technology applications in addition to the more traditional aspects like onsite amenities, guestroom features, F&B, housekeeping and the front desk. Above all, it is stressed that the success of a property - even with all that has changed in recent years - nonetheless depends on the relationship a hotel fosters with its guests. This is the hotelier's guidebook that recognizes future developments while celebrating the past.

Transnational Intellectual Property Law Robert P. Merges, Seagull Haiyan Song, 2018-04-27 As companies and organisations increasingly operate

across national boundaries, so the incentive to understand how to acquire, deploy and protect IP rights in multiple national jurisdictions has rapidly increased. Transnational Intellectual Property Law meets the need for a book that introduces contemporary intellectual property as it is practiced in today's global context. Focusing on three major IP regimes – the United States, Europe and China – the unique transnational approach of this textbook will help law students and lawyers across the world understand not only how IP operates in different national contexts, but also how to coordinate IP protection across numerous national jurisdictions. International IP treaties are also covered, but in the context of an overall emphasis on transnational coordination of legal rights and strategies.

Securing the Information Infrastructure Kizza, Joseph, Migga Kizza, Florence, 2007-09-30 This book examines how internet technology has become an integral part of our daily lives and as it does, the security of these systems is essential. Monograf Pengembangan Infrastruktur Wireless Extended LAN Dr. Rufman Iman Akbar., MKom., MM., IPM, Chaerul Anwar, S.Kom., MTI., Drs. Johannes Hamonangan Siregar M.Ed, Ph.D., 2022-03-29 Buku ini merupakan monograf yang berisi temuan dan kegiatan penulis pada saat melakukan penelitian mengenai pemanfaatan antena wifi dalam memperluas jangkauan wireless local area network. Penelitian ini awalnya dibuat untuk mengatasi kendala yang terjadi saat pembelajaran daring pada masa pandemi – dimana ada banyak sekolah di daerah marginal yang kesulitan dengan sinyal komunikasi melalui koneksi 4G ataupun 3G. Dalam buku ini dibahas beberapa infrastruktur yang sempat dicoba penulis dalam pengembangan teknologi ini. Penulis menggunakan beberapa perangkat (Access Point, Repeater, Wifi Extender, dan juga perangkat sisi client – Laptop, Desktop, dan SmartPhone). Infrastruktur yang dikembangkan berkaitan dengan gelombang wifi dalam koneksi Wireless Local Area Network – yang oleh penulis dikembangkan menjadi Wireless Extended Local Area Network. Tetapi walaupun uji coba infrastruktur berkaitan dengan gelombang wifi – disain infrastruktur nya juga bisa dikembangkan untuk koneksi 4G atau 3G, terutama dari sisi Klien.

Wi-Fi Toys Mike Outmesguine, 2004-07-02 Provides instructions for fifteen projects using wireless technology, including a wi-fi antenna cable, a solar-powered wireless repeater, and a car-to-car wireless video link.

CLOUD AND INTERNET SECURITY Binh Nguyen, A while back I wrote two documents called 'Building a Cloud Service' and the 'Convergence Report'. They basically documented my past experiences and detailed some of the issues that a cloud company may face as it is being built and run. Based on what had transpired since, a lot of the concepts mentioned in that particular document are becoming widely adopted and/or are trending towards them. This is a continuation of that particular document and will attempt to analyse the issues that are faced as we move towards the cloud especially with regards to security. Once again, we will use past experience, research, as well as current events trends in order to write this particular report. Personal experience indicates that keeping track of everything and updating large scale documents is difficult and depending on the system you use extremely cumbersome. The other thing readers have to realise is that a lot of the time even if the writer wants to write the most detailed book ever written it's quite simply not possible. Several of my past works (something such as this particular document takes a few weeks to a few months to write depending on how much spare time I have) were written in my spare time and between work and getting an education. If I had done a more complete job they would have taken years to write and by the time I had completed the work updates in the outer world would have meant that the work would have meant that at least some of the content would have been out of date. Dare I say it, by the time that I have completed this report itself some of the content may have come to fruition as was the case with many of the technologies with the other documents? I very much see this document as a starting point rather than a complete reference for those who are interested in technology security. Note that the information contained in this document is not considered to be correct nor the only way in which to do things. It's a mere guide to how the way things are and how we can improve on them. Like my previous work, it should be considered a work in progress. Also, note that this document has gone through many revisions and drafts may have gone out over time. As such, there will be concepts that may have been picked up and adopted by some organisations while others may have simply

broken cover while this document was being drafted and sent out for comment. It also has a more strategic/business slant when compared to the original document which was more technically orientated. No illicit activity (as far as I know and have researched) was conducted during the formulation of this particular document. All information was obtained only from publicly available resources and any information or concepts that are likely to be troubling has been redacted. Any relevant vulnerabilities or flaws that were found were reported to the relevant entities in question (months have passed). Feedback/credit on any ideas that are subsequently put into action based on the content of this document would be appreciated. Any feedback on the content of this document is welcome. Every attempt has been made to ensure that the instructions and information herein are accurate and reliable. Please send corrections, comments, suggestions and questions to the author. All trademarks and copyrights are the property of their owners, unless otherwise indicated. Use of a term in this document should not be regarded as affecting the validity of any trademark or service mark. The author would appreciate and consider it courteous if notification of any and all modifications, translations, and printed versions are sent to him. Please note that this is an organic document that will change as we learn more about this new computing paradigm. The latest copy of this document can be found either on the author's website, blog, and/or <http://www.tldp.org/>

Indoor Radio Planning Morten Tolstrup, 2011-08-22 Why is indoor coverage needed, and how it is best implemented? As the challenge of providing higher data speeds and quality for mobile applications intensifies, ensuring adequate in-building and tunnel coverage and capacity is increasingly important. A unique, single-source reference on the theoretical and practical knowledge behind indoor and tunnel radio planning, *Indoor Radio Planning, Second Edition* provides an overview of mobile networks systems and coverage solutions with GSM, UMTS, HSPA and LTE cellular systems technologies as a backdrop. All of the available solutions, from basic passive distributed antenna systems (DAS) through to advanced fiber optic systems supporting MIMO and LTE, are discussed in detail to give the reader a good understanding. In addition, there is a section covering multi-operator systems, as this becomes a more and more utilized approach. Systematically moving from the basic considerations through to advanced indoor planning, aspects such as upgrading passive DAS from 2G to 3G, noise analysis, link budgets, traffic calculations and software tools that can be used to help create in-building designs are also covered. Femtocells, outdoor DAS and tunnel radio planning are newly included in this edition. • A new version of the bestseller, updated with an introduction to LTE and treatments of modulation principle, DAS systems for MIMO/LTE , designing repeater systems

and elevator coverage • Addresses the challenge of providing coverage inside train, and high speed rail • Outlines the key parameters and metrics for designing DAS for GSM, DCS, UMTS, HSPA & LTE • Essential reading for engineering and planning personnel at mobile operators, also giving a sound grounding in indoor radio planning for equipment manufacturers • Written by a leading practitioner in the field with more than 20 years of practical experience

PCs Andy Rathbone, 2005-12-23 Provides information on using a PC, covering such topics as hardware, networking, burning CDs and DVDs, using the Internet, and upgrading and replacing parts.

Mobile Internet Security Il-sun You, Fang-Yie Leu, Hsing-Chung Chen, Igor Kottenko, 2018-01-15 This book constitutes the refereed proceedings of the First International Symposium on Mobile Internet Security, MobiSec 2016, held in Taichung, Taiwan, in July 2016. The 15 revised full papers presented were carefully reviewed and selected from 44 submissions. Progress in Robotics Jong-Hwan Kim, Shuzhi Sam Ge, Prahlad Vadakkepat, Norbert Jesse, Abdullah Al Mamun, Sadasivan Puthusserypady, Ulrich Rückert, Joaquin Sitte, Ulf Witkowski, Ryohei Nakatsu, Thomas Braunl, Jacky Baltes, John Anderson, Ching-Chang Wong, David Ahlgren, 2009-08-19 This volume is an edition of the papers selected from the 12 FIRA RoboWorld Congress, held in Incheon, Korea, August 16–18, 2009. The Federation of International Robosoccer Association (FIRA – www.fira.net) is a non-profit organization, which organizes robotic competitions and meetings around the globe annually. The RoboSoccer competitions started in 1996 and FIRA was established on June 5, 1997. The Robot Soccer competitions are aimed at promoting the spirit of science and technology to the younger generation. The congress is a forum in which to share ideas and future directions of technologies, and to enlarge the human networks in robotics area. The objectives of the FIRA Cup and Congress are to explore the technical development and achievement in the field of robotics, and provide participants with a robot festival including technical presentations, robot soccer competitions and exhibits - under the theme “Where Theory and Practice Meet.” Under the umbrella of the 12 FIRA RoboWorld Incheon Congress 2009, six international conferences were held for greater impact and scientific exchange: • 6 International Conference on Computational Intelligence, Robotics and Autonomous Systems (CIRAS) • 5 International Symposium on Autonomous Minirobots for Research and Edutainment (AMiRE) •

International Conference on Social Robotics (ICSR) • International Conference on Advanced Humanoid Robotics Research (ICAHRR) • International Conference on Entertainment Robotics (ICER) • International Robotics Education Forum (IREF) This volume consists of selected quality papers from the six conferences.
