Crash Course in Technology Planning Christopher D. Brown,2016-07-18 This easy-to-use primer will empower anyone—even those with no IT background—to face the challenge of adding one or more technologies to library services or maintaining existing technologies. Most of the public libraries in the United States are operating on tight budgets without allocation for IT personnel; in school libraries, the librarian often takes on the lion's share of IT responsibility. This book is an invaluable guide for library staff members who are put in the position of maintaining their own networks and computers with very little training or support. Authored by an assistant library director with years of firsthand experience working as a solo IT manager within public libraries, this guide provides practical information about overcoming the unique challenges of managing IT in a smaller organization, juggling multiple job roles, being limited by a restrictive budget, and working directly with the public. Crash Course in Technology Planning addresses a wide variety of IT topics in the library sphere, providing information in a logical manner and order. It begins with an explanation of triaging existing IT issues, then moves into diagnosing and repairing both individual PCs as well as the library Local Area Network (LAN). The following chapters cover other important topics, such as the best way to inventory computers and equipment, how to budget for and procure new equipment, and recommended ways for an IT layperson to set and achieve goals.

The Apple TV Crash Course Thomas Belle,2015-03-26 Mac. iPhone. iPad. Apple TV? While Apple TV may not get the same press is other Apple products, that is about to change. For years, Apple TV was touted on Apple's hobby product—something they tinkered with occasionally, but not something they put as much effort in as other Apple products. This changed in 2012. Apple announced a slimmed down version of the media device at a price people could actually afford: $99. In March of 2015, they dropped the price again to $69, and announced that they would be the first devices to offer HBO's monthly streaming service: HBO Now. What started as a hobby has turned into a powerhouse. The low-cost, high-powered, streaming media player, has become the best on the market. Other companies (notably Google, Amazon, and Roku) have tried to create their own media devices, but, in this authors opinion, none of them come close to offering an operating system that just works. This guide is an introduction to Apple TV. If you are just "thinking" about making the switch from cable to streaming TV, then this book will show you how; if you've already made the switch, but you want to get the most out of it, then it will covers that as well. There's something for everyone here, so read on…
