The Winemaker Noah Gordon,2012-06-05 New York Times--bestselling author: In 19th-century Spain, the son of a vineyard owner builds a life for himself, but a dangerous plot threatens it all . . . Josep Alvarez is a young man in the tiny grape-growing village of Santa Eulàlia, in northern Spain, where his father grows black grapes that are turned into cheap vinegar. Joseph loves the agricultural life, but he is the second son, and his father's vineyard will be inherited by his brother Donat, the firstborn. Josep needs to keep his hands in the soil. He yearns for a job growing grapes and for an opportunity to marry Teresa Gallego. In Madrid, an assassination plot, conceived against the political leader of Spain by men of wealth and power, creates a storm of intrigue that sucks into its vortex a group of innocent young farm workers in Santa Eulàlia. How Josep's life is changed drastically by these events, and how, ironically, they gradually turn him into an inspired vintner with an evolving vision of life, is the fascinating story of *The Winemaker*.

Grapes into Wine Philip M. Wagner,2011-04-13 As the first to write a basic book in English on winemaking from the winemaker's point of view, Philip Wagner has long been considered an authority on the subject, and his book *American Wines and Wine-Making* has become a bible for small producers and home winemakers in this country. Now, in this completely new version of that classic, Mr. Wagner takes into account the many dramatic changes that in recent years have revolutionized the American wine scene. With the knowledge that comes from his own experimentation, Mr. Wagner discusses the new, successful hybrids that have now made it possible to grow wine-producing grapes in far more areas of the United States than used to be considered feasible. Once again he covers all the basic technical information, including recent developments important to the small commercial winery and to the home producer--from the choice of the right vines to the vintage itself, the care of the new wines, and finally the bottling of the wine: red, white, and rosé, sparkling and sweet. There is a new chapter on concentrates for the growing number of people who want to make wine but are not close to a source for suitable grapes, or haven't the space to work with fresh materials. Mr. Wagner describes what concentrates are, how they are made, what the characteristics are of different types, and what to expect. There are specific instructions on procedure and on the necessary (and

unnecessary) equipment. In addition, Philip Wagner's introductory chapters on the evolution of the wine grape, on European winegrowing, and on the contemporary scene throughout the United States provide an excellent guide for the consumer, as does his concluding chapter on tasting and using wine. Peppered throughout with a wealth of historical and anecdotal material as well as down-to-earth experience—and full of the author's appreciation of wine and winemaking as a way of life—this book is not only a useful guide but delightful and rewarding reading.

Postmodern Winemaking Clark Smith, 2013-09-13 In *Postmodern Winemaking*, Smith shares knowledge he has accumulated in engaging, humorous, and erudite essays that convey a new vision of the winemaker's craft—one that credits the crucial roles played by both science and art in the winemaking process. Smith, a leading innovator in red wine production techniques, explains how traditional enological education has led many winemakers astray—enabling them to create competent, consistent wines while putting exceptional wines of structure and mystery beyond their grasp. Great wines, he claims, demand a personal and creative engagement with many elements of the process. In clear language aimed at the amateur winemaker, Jackisch explains the science behind wine and its application to winemaking. At the same time, he includes important material for commercial winemakers. Jackisch covers each step in the process of winemaking, from growing or purchasing grapes; choosing equipment; fermenting, aging, and storing the wine; to keeping records. By exploring in detail the various factors that affect wine quality, he shows which elements in wine production can be controlled to achieve certain sensory results. Among the other subjects he discusses are specific types of wine, ways of evaluating wine, common problems in cellar operations and how to prevent or correct them, and wine competitions. Five appendixes supply additional technical information. Since 1985, *Modern Winemaking* has proven invaluable for winemakers, both commercial and amateur, for wine educators and students, and indeed, for anyone who wants to know more about wine.

When Brunella Cartolano visits her father on the family vineyard in the basin of the Cascade Mountains, she's shocked by the devastation caused by a four-year drought. Passionate about the Pacific Northwest ecology, Brunella, a cultural impact analyst, is embroiled in a battle to save the Seattle waterfront from redevelopment and to preserve a fisherman's livelihood. But

when a tragedy among fire-jumpers results from a failure of the water supply—her brother Niccolo is among those lost--Brunella finds herself with another mission: to find out who is sabotaging the area's water supply. Joining forces with a Native American Forest Ranger, she discovers deep rifts rooted in the region's complicated history, and tries to save her father's vineyard from drying up for good . . . even as violence and corruption erupt around her.
