Storied Inquiries in International Landscapes Tonya Huber,2010-06-01 Storied Lives: Emancipatory Educational Inquiry–Experience, Narrative, & Pedagogy in the International Landscape of Diversity contains exemplary research practices, strategies, and findings gleaned from the contributions

to the 15 issues of the Journal of Critical Inquiry Into Curriculum and Instruction (JCI~>CI). Founding Editor Tonya Huber initiated the JCI~>CI in 1997, as a refereed journal committed to publishing educational scholarship and research of professionals in graduate study. The journal was distinguished by its requirement that the scholarship be the result of the first author's graduate research—according to Cabell's Directory, the first journal to do so. Equally important, the third issue of each volume targeted wide representation of cultures and world regions. "Current thinking on ..." written by members of the JCI~>CI Editorial Advisory Board explores state-of-the-art topics related to curriculum inquiry. Illustrations, photography (e.g., Sebastião Salgado's Workers in vol. 2), collage, student-generated art/artifacts, and full-color art enhance cutting-edge methodologies extending educational research through Aboriginal and Native oral traditions, arts-based analysis, found poetry, data poetry, narrative, and case study foci on liberatory pedagogy and social justice action research.

Dementia and Memory Lars-Göran Nilsson, Nobuo Ohta, 2013-11-20 A negative effect of the ageing population is that more individuals are experiencing cognitive decline and some form of neurodegenerative disease. With the number of people experiencing dementia likely to double in the next 20 years, this change in society presents one of greatest challenges facing public health personnel in the 21st century. The aim of this volume is to describe research that is in progress, and the major findings that have been obtained in the scientific study of dementia. The chapters in the first section of the book focus upon early signs of dementia, and consider several approaches to finding early cognitive signs and biological markers of dementia. The second section considers whether dementia is inevitable for people who become very old, and features chapters on risk factors and proactive influences, cognitive reserve and intervention. Each chapter in the final section describes phenomena which are related to differences in function between

memory systems, including anterograde memory in fronto-temporal dementia, and the role semantic memory and semantic cognition may play in developing an understanding of the development of the degenerative processes in dementia. With contributions from world-class researchers in this area, the volume offers a concise overview of key findings in recent research on dementia and memory. It will be of great interest to researchers and advanced students of cognitive psychology, and to those working in related fields, such as gerontology, rehabilitation sciences, and allied health.

Teaching ELLs Across Content Areas Nan Li, 2016-04-01 The book, *Teaching ELLs Across Content Areas: Issues and Strategies*, is a unique, useful text written for K-12 teachers. This book is the culmination of the professional knowledge, expertise, and experience from the distinguished authors who represent the entire range of the content areas, including: language arts, science, mathematics, technology, arts, psychology, and Hispanic studies. The ELL school population has reached 5.3 million with the increase rate of 51 percent from School Year 1998-1999 to 2008-2009 (NCELA, 2012). By 2025, one out of four K-12 students will be ELLs (NEA Policy Brief, 2013). The NEA data states that the ELLs are the fastest-growing student population group in our schools and providing them with high-quality services and programs is an important investment in America's future (NEA Policy Brief, 2013). With the fast growth of the ELLs in schools, basic information and strategies are needed by all K-12 teachers. This book provides useful information and strategies for all K-12 teachers in content classrooms. This book has three significances. First, the book provides the most needed information for K-12 teachers with issues and strategies that are important in content areas to help ELLs' success. With the fast growth of the ELLs in schools, K-12 teachers need this information in content classrooms. Second, the book fills the gap related to teaching ELLs in content areas. There are some existing books with titles on teaching ELLs across content areas; yet, these books provide general information with fewer books that really address specific content topics. This book is unique because it has the dedicated chapters for specific content areas, e.g., Language Arts, Science, Math, Social Studies with issues and strategies in these respective contents as well as general

information, e.g., L2 theories for teachers to know and work with ELLs. Third, the book is reader-friendly with carefully crafted chapters. Each chapter begins with a scenario to catch the reader's attention, is followed by issues and strategies, and ends with a summary. A scenario begins with each chapter for teachers to get to know the ELLs with the content that focuses on the related information and teaching strategies. With the continued increase in the ELL school population, this book is intended helping all K-12 teachers in content areas have knowledge and strategies to better serve their ELLs.

Preparing Teachers to Work with English Language Learners in Mainstream Classrooms Luciana C. de Oliveira, Mike Yough, 2015-01-01 Co-published with TESOL Press There is a growing need for knowledge and practical ideas about the preparation of teachers for English language learners (ELLs), a growing segment of the K-12 population in the United States. This book is for teachers, administrators, and teacher educators looking for innovative ways to prepare teachers for ELLs and will position teachers to empower these students. This volume will appeal mostly to those preparing teachers in contexts that have not have historically had large numbers of ELLs, but have had a high rate of recent growth (e.g., Midwestern U.S.). This work is the combination of teacher preparation and ELL issues. This volume is unique in tackling pre-service and inservice teacher preparation. Additionally, the chapters collectively aim to go beyond merely equipping teachers to meet the needs of ELLs, but to reach a level of effectiveness with the outcome of equity. The book highlights the knowledge, skills, and beliefs of teachers about ELLs. Part I addresses teacher perceptions of, and beliefs about, ELLs and teacher preparation specifically addressing what they should know in terms of students' perspectives. Chapters attend to the experiences and beliefs of immigrant teachers about their roles, the role of service learning in teacher preparation, and the potential of understanding home literacy practices to change teacher beliefs about ELLs. Part II focuses on skills necessary to teach ELLs—writing skills teachers can draw on to inform their teaching practices, technological skills teachers need to develop, and skills related to focusing on the Common Core State Standards for English language arts and mathematics. Each chapter explicitly addresses implications for teacher education or professional development.

The Teacher's Awesome App Guide 1.5 John F. O'Sullivan, 2014-10-25

Contemporary Neuropsychology and the Legacy of Luria Elkhonon Goldberg, 2019-11-12 Best known as a founding father of neuropsychology, Luria is remembered for his clinical approach, which in many ways foreshadowed and served as the basis for the currently popular process approach to neuropsychological diagnosis. Although he never completed the job of designing a general theory of brain-behavioral relations, he nonetheless contributed mightily to the ongoing effort to develop one, and to the emergence of neuropsychology as a mature science. Written by professionals who either knew Alexandr Romanovich Luria personally or experienced his scientific influence, the topics examined in this volume reflect the expanse of his interests and contributions.

Firstly, it offers a sketch of a general theory of dependency in natural language. Different types of linguistic dependencies are distinguished (semantic, syntactic, and morphological), the criteria for their recognition are formulated, and all possible combinations are discussed in some detail. Secondly, it demonstrates the application of the general theory in two specific domains: establishing the system of Surface-Syntactic Relations in French and linear positioning of clitics in Serbian. Thirdly, it presents a formal sketch of Head-Driven Phrase-Structure Grammar modelled in terms of syntactic dependencies.
