Mosaics of the Greek and Roman World Katherine M. D. Dunbabin, 1999 This book provides a comprehensive account of mosaics in the ancient world from the early pebble mosaics of Greece to the pavements of Christian churches in the East. Separate chapters in Part I cover the principal regions of the Roman Empire in turn, in order to bring out the distinctive characteristics of their mosaic workshops. Questions of technique and production, of the role of mosaics in architecture, and of their social functions and implications are treated in Part II. The book discusses both well-known works and recent finds, and balances consideration of exceptional masterpieces against standard workshop production. Two main lines of approach are followed throughout: first, the role of mosaics as a significant art form, which over an unbroken span illuminates the evolution of pictorial style better than any comparable surviving medium; and secondly, their character as works of artisan production closely linked to their architectural context.

Mosaics in the Medieval World Liz James, 2017-10-05 In this book, Liz James offers a comprehensive history of wall mosaics produced in the European and Islamic middle ages. Taking into account a wide range of issues, including style and iconography, technique and material, and function and patronage, she examines mosaics within their historical context. She asks why the mosaic was such a popular medium and considers how mosaics work as historical 'documents' that tell us about attitudes and beliefs in the medieval world. The book is divided into two parts. Part I explores the technical aspects of mosaics, including glass production, labour and materials, and costs. In Part II, James provides a chronological history of mosaics, charting the low and high points of mosaic art up until its abrupt end in the late middle ages.

Written in a clear and engaging style, her book will serve as an essential resource for scholars and students of medieval mosaics.

Mosaic Techniques & Traditions Sonia King, 2006 This visually arresting volume showcases mosaics from all corners of the globe and teaches the skills needed to produce 15 beautiful pieces of your own.

World Mosaics of Literary Analysis: Accepting Differences and Embracing Diversities Suzana Haji Muhammad, Agnes Liao Wei Lin, 2020-01-01 This collection renders an invigorating take into engaging ideas that traverse various literary issues. Each chapter opens our minds to the thrilling possibilities of approaching literary texts and paves the way for appreciating literature more widely. Although appearing divergent in nature, these chapters do encourage literary exploration and appreciation. Literature celebrates diversities and differences, and this book *World Mosaics of Literary Analysis: Accepting Differences and Embracing Diversities* admittedly urges its readers to accept differences and to embrace diversities. Undeniably there is strength in diversity.

Piece by Piece! Michael Avi-Yonah, 1993 Describes ancient and modern mosaic techniques, as well as early Greek, Roman, and Byzantine mosaics.

Mosaics as History G. W. Bowersock, 2006-11-15 In the past century, exploration and serendipity have uncovered mosaic after mosaic in the Near East—maps, historical images and religious scenes constituting a treasure of new testimony from antiquity. In them, Bowersock finds historical evidence, illustrations of literary and mythological tradition, religious icons, and monuments to civic pride.

Mosaics of Knowledge Andrew M. Riggsby, 2019 In the Roman world technologies were limited to small, scattered social groups. By examining five

technologies: lists, tables, weights and measures, artistic perspective, and mapping, this book shows how the Romans broke up a world we might have imagined them to unite. This study combines detailed readings of a wide variety of evidence (inscriptions, small archeological finds, artworks, literary texts) with theoretical consideration of the social, cognitive, and material contexts for their use to present a unique portrait of Roman computing capabilities, limitations, and habits.

The World Underfoot Hallie M. Franks, 2018-06-19 In the Greek Classical period, the symposium--the social gathering at which male citizens gathered to drink wine and engage in conversation--was held in a room called the andron. From couches set up around the perimeter, symposiasts looked inward to the room's center, which often was decorated with a pebble mosaic floor. These mosaics provided visual treats for the guests, presenting them with images of mythological scenes, exotic flora, dangerous beasts, hunting parties, or the spectre of Dionysos: the god of wine, riding in his chariot or on the back of a panther. In *The World Underfoot*, Hallie M. Franks takes as her subject these mosaics and the context of their viewing. Relying on discourses in the sociology and anthropology of space, she presents an innovative new interpretation of the mosaic imagery as an active contributor to the symposium as a metaphorical experience. Franks argues that the images on mosaic floors, combined with the ritualized circling of the wine cup and the physiological reaction to wine during the symposium, would have called to mind other images, spaces, or experiences, and in doing so, prompted drinkers to reimagine the symposium as another kind of event--a nautical voyage, a journey to a foreign land, the circling heavens or a choral dance, or the luxury of an abundant past. Such spatial metaphors helped to forge the

intimate bonds of friendship that are the ideal result of the symposium and that make up the political and social fabric of the Greek polis.

Ancient Mosaics Roger Ling, 1998 Using thousands and sometimes millions of pieces of colored stone or glass to create elaborate patterns or scenes is a painstaking and expensive way to decorate a surface. Yet the art of mosaic enjoyed spectacular success in the Graeco-Roman world, where its practitioners created some of the most beautiful artworks in history. This handsomely illustrated and elegantly written book traces the evolution of mosaic from the Hellenistic period to the early Christian era, with particular emphasis on the Roman Empire, and examines its regional variations from Britain to North Africa and from the Levant to the Spanish seaboard. The eminent classical scholar Roger Ling explains how mosaics were first made in the fifth century B.C. with the use of inset pebbles to provide durable pavements. He shows how mosaic became one of the hallmarks of luxury in Roman times, when such masterpieces of imperial floor decoration as the black-and-white silhouette pavements of Ostia and the colorful figure compositions of Piazza Armerina in Sicily were created. From pavements, mosaic graduated to walls and ceilings, where it culminated in the soaring blue and gold work of early Christian churches in Rome, Constantinople, and Ravenna. Ling examines the wide range of styles and subject matter employed by mosaicists, whether geometric patterns or figurative scenes of mythology, agriculture, and hunting, and explores what mosaics reveal about domestic and imperial tastes and aspirations. Such topics as techniques and materials, the relationship of mosaic to other forms of interior decoration, and the influence of ancient mosaics in more recent times are also discussed in detail. Illuminating, attractive, and affordable, this book makes a major contribution to classical

scholarship and will also appeal strongly to art historians, artists, designers, and general readers.

Found Art Mosaics Suzan Germond, 2007 Found materials are taking the craft world by storm because the creative potential is tremendous. Contemporary mosaic artists--who continue to expand the limits of construction and materials--can benefit greatly from this movement toward reuse. Even the mosaic neophytes among us can explore the myriad possibilities of these new materials with this fabulous guide. Learn everything you need to get started in the world of found art mosaics, from materials, glass, ceramics, natural materials, grouts, surfaces, sealants, safety gear, and more. The 27 projects here--including the Buttons & Pebbles Vase, Glittering Jewels Belt Buckle, and Recycled Bathtub Garden Planter--each reuse and repurpose objects differently, as the found object may be the surface, the tesserae, or both.

The Art of Mosaics, 1975 An introduction to mosaics, including the techniques of making mosaics and the history of wall and pavement mosaics in Greece, Egypt, Rome, Africa, the Holy Land, and the Byzantine world.

World Cultures Iftikhar Ahmad, 2004 Content emphasis of this text is on global interdependence, cultural diffusion, and diversity, with the day-to-day lives of real people through-out the globe as a focus. Secondary level.

Mosaics of Knowledge Andrew M. Riggsby, 2019-07-25 Today's information technology often seems to take on a life of its own, spreading into every part of our lives. In the Roman world things were different. Technologies were limited to small, scattered social groups. By examining five technologies--lists, tables, weights and measures, artistic perspective, and mapping--*Mosaics of Knowledge* demonstrates how the Romans broke up a world we might have imagined them to unite. That is, the recording, storage, and

recall of information in physical media might be expected to bind together persons distant in time and space. More often than not, however, Roman instances serve to create or reinforce the isolation of particular groups. Persons in different locations- whether those are geographical, social, or occupational-had access to quite different informational resources, and the overall situation is thus not controlled by the needs of any particular class or group. On the one hand, these constraints on use in turn constrain the development and power of individual technologies. Development is slow, scattered, and far from one-directional. On the other, seeming technological weaknesses can turn out to be illusory if we set them in actual use-contexts. Romans deploy no more but also no less computing power than needed for very narrowly defined goals. This study combines detailed readings of a wide variety of evidence (inscriptions, small archeological finds, artworks, literary texts) with theoretical consideration of the social, cognitive, and material contexts for their use to present a unique portrait of Roman IT capabilities, limitations, and habits.

The Conservation and Presentation of Mosaics: At What Cost? Jeanne Marie Teutonico, Leslie Friedman, Aïcha Ben Abed, Roberto Nardi, 2017-09-01 In recent years, funding for the conservation of cultural heritage has become increasingly difficult to obtain, and this trend shows no sign of changing significantly in the foreseeable future. The twelfth triennial meeting of the International Committee for the Conservation of Mosaics, held in Sardinia in October 2014, focused on the theme of cost, broadly considered, relating specifically to the preservation and presentation of the world's mosaic heritage. This handsome, abundantly illustrated volume provides a

comprehensive record of the conference. The volume's sixty-seven papers and posters, comprising contributions from more than one hundred leading experts in the field, reflect the conference's principal themes: cost, methods of survey and documentation, conservation and management, education and training, backing materials and techniques, presentation and display, and case studies. Papers are presented either in English, French, or Italian; there are abstracts in English and either French or Italian for all entries. The volume will be of interest to conservators, site managers, and others responsible for conserving the mosaic heritage, especially in these challenging times.

Research Mosaics of Language Studies in Asia Differences and Diversity (Penerbit USM) Salasiah Che Lah, Rita Abdul Rahman Ramakrishna, This book gives readers a present and critical view of different language and linguistic issues in selected Asian contexts. The language aspect of the manuscript explores various areas of English language learning and teaching while the linguistic aspect looks at different fields such as sociolinguistics, semantics, stylistics, corpus-based studies, translation studies and cultural studies. These aspects also provide distinct tangents in researching language for they offer significant points of view and outcomes in understanding the influence and/or the function of cultures when dealing with either spoken or written discourses involving native or non-native speakers. Such dynamics are instrumental in bringing about wider range of topics pertinent to the transdisciplinary nature of the current research theme in this part of the world. Substantially, the major sub-disciplines included in the manuscript frame both theoretical and hands-on implications for more rigorous innovations and expansions in the respective area of

investigation.

Subcultural Mosaics and Intersubjective Realities Robert Prus,1997-01-09

The author builds on the broader interpretive/constructionist ethnographic and pragmatist traditions, particularly those developed within symbolic interaction to provide an agenda to refocus, revitalize, and synthesize the social or human sciences. Robert Prus offers a set of primary assumptions that centrally respect the unique (and uniquely enabling) features of the human condition, as well as considers a reformulation of the cultural problematic. By viewing human group life as a subcultural mosaic that is more or less continuously in the making, a systematic research agenda for attending to the entire realm of human involvement is developed; one that opens every single arena of human endeavor to ethnographic inquiry.
