Serious Games Clark C. Abt, 1987 The author explores the ways in which games can be used to instruct and inform as well as provide pleasure. He uses innovative approaches to problem solving through individualized game techniques.

*Jane Jensen* Anastasia Salter, 2017-04-06 In the 1990s, the Personal Computer (or PC) was on the rise in homes, and with it came new genres of play. Yet most of the games in these new genres featured fantasylands or humorous science fiction landscapes with low stakes and little to suggest the potential of the PC as a serious space for art and play. Jane Jensen's work and landmark Gabriel Knight series brought a new darkness and personality to PC gaming, offering a first powerful glimpse of what games could be as they came of age. As an author and designer, Jensen brought her approach as a designer-writer hybrid to the forefront of game design, with an approach to developing environments through detailed research to make game settings come to life, an attention to mature dilemmas and complex character development, and an audience-driven vision for genres reaching beyond the typical market approaches of the gaming industry. With a brand new interview with Jensen herself, Anastasia Salter provides the first ever look Jensen's impact and role in advancing interactive narrative and writing in the game design process.

**Things We Think about Games** Will Hindmarch, Jeff Tidball, John August, 2008 An unholy mixture of helpful guidebook and jabbing provocation, [THINGS WE THINK ABOUT GAMES] will earn its right to rattle around your brain. It is essential reading for designer, critic, and straight-up rank 'n' file gamer alike. ; Robin D. Laws, creator of HeroQuest and Feng Shui Will Hindmarch and Jeff Tidball think a lot about games. At their commentary website, Gameplaywright.net, they think out loud about what it means to play games, make games, sell games, and love games. They are gamers. Here, with fellow game designers and notable game players, they think out loud on paper in the first Gameplaywright book. THINGS WE THINK ABOUT GAMES collects dozens on dozens of bite-sized thoughts about games. From the absurd to the magnificent, the demonstrable to the dogmatic, this collection spans both the breadth of games; board, card, roleplaying and more; and the depth of gaming, offering insights about collecting, playing, critiquing, designing, and publishing.

*Characteristics of Games* George Skaff Elias, Richard Garfield, K. Robert Gutschera, 2020-12-08 Understanding games--whether computer games, card games, board games, or sports--by analyzing certain common traits. Characteristics of Games offers a new way to understand games: by focusing on certain traits--including number of players, rules, degrees of luck and skill needed, and reward/effort ratio--and using these characteristics as basic points of comparison and analysis. These issues are often discussed by game players and designers but seldom written about in any formal way. This book fills that gap. By emphasizing these player-centric basic concepts, the book provides a framework for game analysis from the viewpoint of a game designer. The book shows what all genres of games--board games, card games, computer games, and sports--have to teach each other. Today's game designers may find solutions to design problems when they look at classic games that have evolved over years of playing.

spaces like conferences, museums, communities, cities, buildings or other non-traditional game venues...and game designers need to unde

Serious Games Ute Ritterfeld, Michael Cody, Peter Vorderer, 2009-09-10 The central purpose of this book is to examine critically the claim that playing games can provide learning that is deep, sustained and transferable to the real world.

*The Multiplayer Classroom* Lee Sheldon, 2021-03-04 The Multiplayer Classroom: Game Plans is a companion to The Multiplayer Classroom: Designing Coursework as a Game, now in its second edition from CRC Press. This book covers four multiplayer classroom projects played in the real world in real time to teach and entertain. They were funded by grants or institutions, collaborations between Lee Sheldon, as writer/designer, and subject matter experts in various fields. They are written to be accessible to anyone--designer, educator, or layperson--interested in game-based learning. The subjects are increasingly relevant in this day and age: physical fitness, Mandarin, cybersecurity, and especially an online class exploring culture and identity on the internet that is unlike any online class you have ever seen. Read the annotated, often-suspenseful stories of how each game, with its unique challenges, thrills, and spills, was built. Lee Sheldon began his writing career in television as a writer-producer, eventually writing more than 200 shows ranging from Charlie's Angels (writer) to Edge of Night (head writer) to Star Trek: The Next Generation (writer-producer). Having written and designed more than forty commercial and applied video games, Lee spearheaded the first full writing for games concentration in North America at Rensselaer Polytechnic Institute and the second writing concentration at Worcester Polytechnic Institute. He is a regular lecturer and consultant on game design and writing in the United States and abroad. His most recent commercial game, the award-winning The Lion's Song, is currently on Steam. For the past two years he consulted on an escape room in a box, funded by NASA, that gives visitors to hundreds of science museums and planetariums the opportunity to play colonizers on the moon. He is currently writing his second mystery novel.
