*Landscape experiences as a cultural ecosystem service in a Nordic context* Lindhjem, Henrik,Reinvang, Rasmus,Zandersen, Marianne,2015-08-19 Cultural ecosystem services in the form of experiences derived from landscapes are potentially important, but often overlooked. Given the large and unprecedented landscape changes many of the Nordic countries are undergoing, there is a need to find ways of including people's preferences and the value of landscape impacts in policy assessments and decision-making processes. The project aim has been to synthesize knowledge about the magnitude and value of landscape experiences, and investigate current practices and examples of how landscape impacts are incorporated (or not) in policy assessments and decision-making contexts in the Nordics. The literature demonstrates potentially high unaccounted welfare loss from landscape change. We find clear weaknesses in current practices, that a second phase will try to address. The project was carried out by Vista Analysis in Oslo and Department of Environmental Science at Aarhus University from 2014–15.

*The Unaccountable State of Surveillance* Clive Norris,Paul de Hert,Xavier L'Hoiry,Antonella Galetta,2017-01-24 This book examines the ability of citizens across ten European countries to exercise their democratic rights to access their personal data. It presents a socio-legal research project, with the researchers acting as citizens, or data subjects, and using ethnographic data collection methods. The research presented here

evidences a myriad of strategies and discourses employed by a range of public and private sector organizations as they obstruct and restrict citizens' attempts to exercise their informational rights. The book also provides an up-to-date legal analysis of legal frameworks across Europe concerning access rights and makes several policy recommendations in the area of informational rights. It provides a unique and unparalleled study of the law in action which uncovered the obstacles that citizens encounter if they try to find out what personal data public and private sector organisations collect and store about them, how they process it, and with whom they share it. These are simple questions to ask, and the right to do so is enshrined in law, but getting answers to these questions was met by a raft of strategies which effectively denied citizens their rights. The book documents in rich ethnographic detail the manner in which these discourses of denial played out in the ten countries involved, and explores in depth the implications for policy and regulatory reform.

**Googling Security** Greg Conti,2008-10-10 What Does Google Know about You? And Who Are They Telling? When you use Google's "free" services, you pay, big time—with personal information about yourself. Google is making a fortune on what it knows about you...and you may be shocked by just

how much Google does know. Googling Security is the first book to reveal how Google's vast information stockpiles could be used against you or your business—and what you can do to protect yourself. Unlike other books on Google hacking, this book covers information you disclose when using all of Google's top applications, not just what savvy users can retrieve via Google's search results. West Point computer science professor Greg Conti reveals the privacy implications of Gmail, Google Maps, Google Talk, Google Groups, Google Alerts, Google's new mobile applications, and more. Drawing on his own advanced security research, Conti shows how Google's databases can be used by others with bad intent, even if Google succeeds in its pledge of "don't be evil." Uncover the trail of informational "bread crumbs" you leave when you use Google search How Gmail could be used to track your personal network of friends, family, and acquaintances How Google's map and location tools could disclose the locations of your home, employer, family and friends, travel plans, and intentions How the information stockpiles of Google and other online companies may be spilled, lost, taken, shared, or subpoenaed and later used for identity theft or even blackmail How the Google AdSense and DoubleClick advertising services could track you around the Web How to systematically reduce the personal information you expose or give away This book is a wake-up call and a "how-to" self-defense manual: an indispensable resource for everyone, from private citizens to security professionals, who relies on Google. **Energy and Transport in Green Transition** Atle Midttun, Nina Witoszek, 2015-06-26 This book breaks new ground in the studies of green transition. It frames the ongoing transformation in terms of a battle of modernities with the emerging vision of ecomodernity as the final destination. It also offers a systematic exploration of the potential for extensive transformation of carbon-intensive sectors – with a focus on energy and transport – towards a low or post-carbon economy. The book does so in a comparative perspective, by pointing to a diversity of techno-economic and institutional solutions in the mature Western economies, and in the rapidly growing East and developing South. The contributors highlight a broad spectrum of available alternatives as well as illuminate conflicting interests involved. They also demonstrate how solutions to the climate challenge require parallel technological and governance innovation. The book advocates a new, overarching vision and agenda of ecomodernity – based on a synergistic paradigm-shift in industry, politics and culture – to trigger and sustain the ecological innovation necessary to tip development in a green direction. This vision cannot be

monolithic; rather, it should reflect the diverse interests and conditions of the global population. This book is aimed at researchers and postgraduate students of energy, transport, environmental and climate policies, as well as development, environment, innovation and sustainability.

Risk Governance of Offshore Oil and Gas Operations Preben Hempel Lindøe, Michael Baram, Ortwin Renn, 2014 This book evaluates and compares risk regulation and safety management for offshore oil and gas operations in the United States, United Kingdom, Norway, and Australia. It provides an interdisciplinary approach with legal, technological, and sociological perspectives on their efforts to assess and prevent major accidents and improve safety performance offshore. Presented in three parts, the volume begins with a review of the technical, legal, behavioral, and sociological factors involved in designing, implementing, and enforcing a regulatory regime for industrial safety. It then evaluates the four regulatory regimes that encompass the cultural, legal, and other contextual factors that influence their design and implementation, along with their reliance on industrial expertise and standards and the use of performance indicators. The final section presents an assessment of the resilience of the Norwegian regime and its capacity to keep pace with new technologies and emerging risks, respond to near miss incidents, encourage safety culture, incorporate vested rights of labor, and perform inspection and self-audit functions. This book is highly relevant for those in government, business, academia, and elsewhere in civil society

who are involved in offshore safety issues, including regulatory authorities and industrial safety professionals.

**Computational Intelligence, Evolutionary Computing and Evolutionary Clustering Algorithms**

Terje Kristensen, 2016-09-30 This brief text presents a general guideline for writing advanced algorithms for solving engineering and data visualization problems. The book starts with an introduction to the concept of evolutionary algorithms followed by details on clustering and evolutionary programming. Subsequent chapters present information on aspects of computer system design, implementation and data visualization. The book concludes with notes on the possible applications of evolutionary algorithms in the near future. This book is intended as a supplementary guide for students and technical apprentices learning machine language, or participating in advanced software programming, design and engineering courses.

**Au Pairs' Lives in Global Context R.**

Cox, 2014-11-27 Far from being the preserve of middle-class women from Northern Europe, au pairing is now booming worldwide. This collection, the first dedicated entirely to examining the lives of au pairs, traces their experiences across five continents showing how this form of domestic labour and childcare is thriving in the twenty-first century.

**Social Investment and Social Welfare**

James Midgley, Espen Dahl, Amy Conley Wright, 2017-05-26 This book contributes to the growing literature on social investment by discussing the way social

investment ideas have been adopted in different countries and in various academic and professional fields, including social policy, development studies and non-profit management. Documenting the experience of implementing social investment in different communities, it encourages a One World perspective that integrates these diverse experiences and promotes policy learning between different nations.

*Edvard Munch Between the Clock and the Bed* Gary Garrels, Jon-Ove Steihaug, Sheena Wagstaff, Karl Ove Knausgaard, Patricia G. Berman, Allison

Morehead, Richard Shiff, Mille Stein, 2017-06-24 In Self-Portrait: Between the Clock and the Bed, the elderly Edvard Munch stands like a sentinel in his bedroom/studio surrounded by the works that constitute his artistic legacy. A powerful meditation on art, mortality, and the ravages of time, this haunting painting conjures up the Norwegian master's entire career. It also calls into question certain long-held myths surrounding Munch—that his work declined in quality after his nervous breakdown in 1908–9, that he was a commercially naive social outsider, and that he had only a limited role in the development of European modernism. p.pl {margin: 0.0px 0.0px 0.0px 0.0px; font: 14.0px Verdana} The present volume aims to rebut such misconceptions by freshly examining this enigmatic artist. In the preface, the renowned novelist Karl Ove Knausgaard considers Munch as a fellow creative artist and seeks to illuminate the source of his distinctive talent. The four groundbreaking essays that follow present numerous surprising insights on matters ranging from Munch's radical approach to self-portraiture to his role in promoting his own career. They also reveal that Munch has been an abiding inspiration to fellow painters, both during his lifetime and up to the present; artists as varied as Jasper Johns, Bridget Riley, Asger Jorn, and Georg Baselitz have acknowledged his influence. More than sixty of Munch's paintings, dating from the beginning of his career in the early 1880s to his death in 1944, are accompanied by a generous selection of comparative illustrations and a chronology of the artist's

life. The result is an intimate, provocative study that casts new light on Munch's unique oeuvre—an oeuvre that Knausgaard describes as having gone “where only a painting can go, to that which is beyond words, but which is still part of our reality.”

**Squaring the circle on Brexit** Fossum, John Erik, Graver, Hans Petter, 2018-05-16 This important book provides the first systematic assessment of the so-called Norway Model, suggested as an off-the-shelf option for the UK to ‘square the circle’ after Brexit. Two preeminent Norwegian scholars of politics and law offer a comprehensive first-hand account of Norway's relationship with the EU and how this affects the country's legal and political system, setting out what Britain can learn from Norway's experience and how transferable these lessons are. Their analysis also explores what impact the UK's presence is likely to have on existing members of the European Economic Area (EEA) discussing both the opportunities and the challenges. The book will be a valuable resource for anyone interested in the future of the UK's relationship with Europe.

Local Languages as a Human Right in Education Zehlia Babaci-Wilhite, 2015-02-03 There seems to be general agreement that children learn better when they understand what the teacher is saying. In Africa this is not the case. Instruction is given in a foreign language, a language neither pupils nor the teachers understand well. This is the greatest educational problem there is in Africa. This is the problem this book discusses and it is therefore an important book. The recent focus on

quality education becomes meaningless when teaching is given in a language pupils do not understand. Babaci-Wilhite concludes that any local curriculum that ignores local languages and contexts risks a loss of learning quality and represent a violation of children's rights in education. The book is highly recommended. Birgit Brock-Utne, Professor of Education and Development, University of Oslo, Norway Zehlia Babaci-Wilhite's illuminating African case studies display a mastery of the literature on policies related to not only language policies integrally related to human rights in education, but to the relationship between education and national development. The book provides a paradigm shift from focusing on the issue of schooling access to the very meaning education has for personal and collective identity and affirmation. As such, it will appeal to a wide audience of education scholars, policy makers and practitioners. Robert F. Arnove, Chancellor's Professor Emeritus of Educational Leadership & Policy Studies, Indiana University, Bloomington, USA A very important and timely book that makes crucial contribution to critical reviews of the policies about languages of instruction and rights in education in Africa. Brilliantly crafted and presented with great clarity the author puts into perspective issues that need to be addressed to improve academic performance in Africa's educational systems in order to attain the goal of providing education for all as well as restoring rights in education. This can be achieved through critical examination of languages of instruction and of the cultural

relevance of the curricula. Definitely required reading for scholars of education and human rights in general, in Africa in particular, as well as for education policy makers. Sam Mchombo, Associate Professor of African Languages and Linguistics, University of California, Berkeley, USA This book contributes to enlighten a crucial academic as well as a democratic and philosophical issue: The right to education and the rights in education, as it is seen in the dilemmas of the right to use your local language. It offers a high-level research and the work is both cutting edge and offers new knowledge to the fields of democracy, human rights and education. The book is a unique contribution to a very important academic discussion on rights in education connecting to language of instruction in schools, politics and power, as well as it frames the questions of why education and language can be seen as a human right for sustainable development in Africa. The actuality of the book is disturbing: We need to take the debate on human rights in education for the children of the world, for their future and for their right to a cultural identity. Inga Bostad, Director of the Norwegian Centre for Human Rights, University of Oslo, Norway

**The Routledge Handbook of Differentiation in the European Union** Benjamin Leruth, Stefan Gänzle, Jarle Trondal, 2022-05-11 The Routledge Handbook of Differentiation in the European Union offers an essential collection of groundbreaking chapters reflecting on the causes and consequences of this complex phenomenon. With contributions from key experts in this subfield of European Studies, it

will become a key volume used for those interested in learning the nuts and bolts of differentiation as a mechanism of (dis)integration in the European Union, especially in the light of Brexit.

Organised around five key themes, it offers an authoritative encyclopaedia of differentiation and addresses questions such as: How can one define differentiation in the European Union in the light of the most recent events? Does differentiation create more challenges or opportunities for the European Union? Is Europe moving away from an ever closer Union and heading towards an ever more differentiated Union, especially as leading political figures across Europe favour the use of differentiation to reconcile divergences between member states? This handbook is essential reading and an authoritative reference for scholars, students, researchers and practitioners involved in, and actively concerned about, research in the study of European integration. As European differentiation is multifaceted and involves a wide range of actors and policies, it will be of further interest to those working on countries and/or in policy areas where differentiation is an increasingly relevant feature. The Introduction and chapters 13, 21, 30, and 35 of this book is available for free in PDF format as Open Access from the individual product page at [www.routledge.com](http://www.routledge.com). It has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license.

Christian ethics and political economy Morten Bøsterud, Jan C.M. Venter, 2020-12-31 The value-free and relativistic human and scientific discourses

have led to an era of ideology. From fascism at the dawn of the century, through liberalism and the associated phenomenon of unfettered statism, to the current disillusionment of postmodernism and relativism with endeavours towards new mercantilism. All have maintained poverty, inequality and created scepticism amongst both lay persons and academics. Above all else a renewed yearning for moral and ethical direction in political and economic conduct has been created. This book provides a Christian ethical reflection on political-economic conduct in South Africa as an alternative to current modernistic ideas. This book aims to produce new Christian ethical insight into the value of new liberal perspectives on the enhancement of the South African political economy. New Christian ethical insight will be gained through new perspectives on the South African political economy.

#### Go Systems Programming Mihalis

Tsoukalos, 2017-09-26 Learning the new system's programming language for all Unix-type systems About This Book Learn how to write system's level code in Golang, similar to Unix/Linux systems code Ramp up in Go quickly Deep dive into Goroutines and Go concurrency to be able to take advantage of Go server-level constructs Who This Book Is For Intermediate Linux and general Unix programmers. Network programmers from beginners to advanced practitioners. C and C++ programmers interested in different approaches to concurrency and Linux systems programming. What You Will Learn Explore the Go language from the standpoint of a developer conversant with Unix, Linux, and so on Understand

Goroutines, the lightweight threads used for systems and concurrent applications Learn how to translate Unix and Linux systems code in C to Golang code How to write fast and lightweight server code Dive into concurrency with Go Write low-level networking code In Detail Go is the new systems programming language for Linux and Unix systems. It is also the language in which some of the most prominent cloud-level systems have been written, such as Docker. Where C programmers used to rule, Go programmers are in demand to write highly optimized systems programming code. Created by some of the original designers of C and Unix, Go expands the systems programmers toolkit and adds a mature, clear programming language. Traditional system applications become easier to write since pointers are not relevant and garbage collection has taken away the most problematic area for low-level systems code: memory management. This book opens up the world of high-performance Unix system applications to the beginning Go programmer. It does not get stuck on single systems or even system types, but tries to expand the original teachings from Unix system level programming to all types of servers, the cloud, and the web. Style and approach This is the first book to introduce Linux and Unix systems programming in Go, a field for which Go has actually been developed in the first place.

*Arab Spring* Kjetil Fosshagen, 2014-03 The events of the Arab Spring presented a dramatic reconstitution of politics and the public sphere through their aesthetic and performative uses of public space. Mass demonstrations have become a

new global political form, grounded in the localization of globalizing processes, institutions, and relationships. This volume delves beneath the seemingly chaotic nature of events to explore the structural dynamics underpinning popular resistance and their support or suppression. It moves beyond what has usually been defined as Arab Spring nations to include critical views on Bahrain, the Palestinian territories, and Turkey. The research and analysis presented explores not just the immediate protests, but also the historical realization, appropriation, and even institutionalization of these critical voices, as well as the role of international criminal law and legal exceptionalism in authorizing humanitarian interventions. Above all, it questions whether the revolutions have since been hijacked and the broad popular uprisings already overrun, suppressed, or usurped by the upper classes.

**Chrome OS and Secret of Google** Anto.Y,2012-06-28  
"Move on to cloud; take cloud OS on your pocket  
"the main concept of this book is to explain about cloud OS (Chrome OS) administration. The need for Cloud OS is, in the present Operating system if there is any hard disk failure all the data will be lost but with the help of Cloud OS if there is any failure in the chrome book means also the data will not be lost. It will be stored in the cloud and the user can retrieve them. The tips to manage the team within an enterprise with cloud OS are listed neatly. The complete Chrome OS shortcuts and working with command lines are also explained. The installation of Chrome OS in a Chrome book and

netbook are given as with neat screenshots step by step process. The entire customization settings of this Chrome OS are elaborately given. Secret of search engines are explained. Many unknown secret of Google and Google products are also given. This book helps to gain more knowledge and you will feel like reading it again and again

### **Comparative Renewables Policy** Elin Lerum

Boasson, Merethe Dotterud Leiren, Jørgen

Wettestad, 2020-10-29 Challenging one-eyed

technology-focused accounts of renewables policy, this book provides a ground-breaking, deep-diving and genre-crossing longitudinal study of policy development. The book develops a multi-field explanatory approach, capturing inter-relationships between actors often analyzed in isolation. It provides empirically rich and systematically conducted comparative case studies on the political dynamics of the ongoing energy transition in six European countries. While France, Germany, Poland and the United Kingdom opted for 'technology-specific' renewables support mixes, Norway and Sweden embarked on 'technology-neutral' support mixes. Differences between the two groups result from variations in domestic political and organizational fields, but developments over time in the European environment also spurred variation. These findings challenge more simplistic and static accounts of Europeanization. This volume will be of key interest to scholars and students of energy transitions, comparative climate politics, policy theory, Europeanization, European integration and comparative European politics more broadly, as

well practitioners with an interest in renewable energy and climate transition. The Open Access version of this book, available at: <https://www.taylorfrancis.com/books/e/9780429198144>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license.
