What Makes a Bully? Jacqueline Yvonne Smart, Ed.D., 2016-09-09 Back Page I cry every day before and after school because I have been a victim of bullying for most of my life. I had the misconception that once I reached middle school that I would be free from being [a] victim. Wow! Was I wrong [!] I am now a 7th grader and the torture continues. I suffered in silence until I met Ms. Smart; I feel some level of comfort because she let us know that she does not tolerate bullying in her classroom. Like many others I tried to commit suicide by jumping out of a window of a three-story building. I am also a cutter. I want to live but how? –Seventh-grade student Unfortunately, stories like that of this middle school student are all too common. The social pressures of bullying can lead to intolerable unpleasantness for some students. Bullying in schools is a growing concern in the United States. Bullying causes many problems, not only for the victim, but also for the bully. Students desire a safe haven at home and school; however, problems with bullies lead to insecurity in the victim and make home and school feel more like a prison than the safe haven they are supposed to be. Bullying via the Internet or cyberbullying is steadily increasing. A bully can harass someone via text, email or hurtful comments on a social network site. This has led to a whole new breed of bullying. A bully no longer has to be face to face. He/she can now say harmful things about a person through the Internet for others to read and comment. No matter how it is looked at, bullying is wrong. It's never okay. It's never cool. It never makes one person look better than another because they are bullying someone. This book offers strategies as to what to do if one should find themselves as a victim of bullying behavior as well as if you happen to be the bully. Also covered are tips for parents, teachers and community members.

Completing a Professional Practice Dissertation Jerry W. Willis, Ron Valenti, Deborah Inman, 2010-06-01 A growing number of both established and newly developed doctoral programs are focusing on the preparation of practitioners rather than career researchers. Professional doctorates such as the Doctor of Nursing Practice (DNP), Doctor of Education (EdD), Doctor of Pharmacy (PharmD), Doctor of Professional Studies (DProf or DPS), and the Doctor of Psychology (PsyD) are, in fact, just a few of the professional doctorates being offered today. Professional doctorates are the fastest growing segment of doctoral education. The nature of the dissertation and the process of completing a dissertation can be quite different in a professional practice doctoral program but there are few resources for both students and faculty involved in completing and mentoring such dissertations. This book was written specifically for students and faculty involved in professional practice dissertation work. It addresses both the tasks and procedures that professional practice dissertations have in common with dissertations in research doctoral programs as well as the tasks and issues that are more common in professional practice doctoral programs. For example, negotiating entry into applied settings and securing the cooperation of practicing professionals is covered, as are alternative models for the dissertation (e.g., the three article dissertation or TAD). The book also covers tasks such as getting IRB approval for applied dissertation research conducted in the field and how to propose and carry out studies based on applied and professional models of research. This book, written by three experienced mentors of professional practice dissertation students, is the comprehensive guide for both students and faculty.
