Los misterios del universo L. Parravicini,L. Viazzo,2017-08-10 Esta obra, completa y rica en ilustraciones, escrita por expertos astrónomos, le enseñará las nociones indispensables para observar el cielo: el origen de las estrellas y sus diferentes categorías (simples, dobles, variables, supernovas, enanas blancas, púlsares...), los demás objetos celestes (cúmulos estelares, nebulosas, galaxias...); el origen de los planetas de nuestro sistema solar, sus órbitas, sus satélites; los instrumentos más adecuados para los diferentes tipos de observación (prismáticos, telescopios, cámaras fotográficas...). Además, incluye una valiosa guía del cielo, de gran utilidad para identificar en la noche los objetos celestes más espectaculares. Por la claridad con la que se exponen los datos científicos más actuales, esta guía resultará de interés para quienes se acercan a la astronomía por primera vez y para quienes ya poseen unos conocimientos básicos

Mobile Data Management Ming-Syan Chen,2003-01-07 This book constitutes the refereed proceedings of the 4th International Conference on Mobile Data Management, MDM 2003, held in Melbourne, Australia, in January 2003. The 21 revised full papers and 15 revised short papers presented were carefully reviewed and selected from 87 submissions. The papers are organized in topical sections on storage management, location tracking, information management, location-aware services, context-aware services, resource discovery, location management, storage management and query processing, and context-aware information services.

Granular, Soft and Fuzzy Approaches for Intelligent Systems Janusz Kacprzyk, Dimitar Filev, Gleb Beliakov, 2016-11-14 This book offers a comprehensive report on the state-of-the art in the broadlyintended field of "intelligent systems". After introducing key theoretical issues, it describes a number of promising models for data and system analysis, decision making, and control. It discusses important theories, including possibility theory, the Dempster-Shafer theory, the theory of approximate reasoning, as well as computing with words, together with novel applications in various areas, such as information aggregation and fusion, linguistic data summarization, participatory learning, systems modeling, and many others. By presenting the methods in their application contexts, the book shows how granular computing, soft computing and fuzzy logic techniques can provide novel, efficient solutions to real-world problems. It is dedicated to Professor Ronald R. Yager for his great scientific and scholarly achievements, and for his long-lasting service to the fuzzy logic, and the artificial and computational intelligence communities. It has been motivated by the authors' appreciation of his original thinking and groundbreaking ideas, with a special thought to his valuable research on the computerized implementation of various aspects of human cognition for decision-making and problem-solving.

<u>Computer Vision -- ECCV 2010</u> Kostas Daniilidis,Petros Maragos,Nikos Paragios,2010-09-24 The 2010 edition of the European Conference on Computer Vision was held in Heraklion, Crete. The call for papers attracted an absolute record of 1,174 submissions. We describe here the selection of the accepted papers: Thirty-eight area chairs were selected coming from Europe (18), USA and Canada (16), and Asia (4). Their selection was based on the following criteria: (1) Researchers who had served at least two times as Area Chairs within the past two years at major vision conferences were excluded; (2) Researchers who served as Area Chairs at the 2010 Computer Vision and Pattern Recognition were also excluded (exception: ECCV 2012 Program Chairs); (3) Minimization of overlap introduced by Area Chairs being former student and advisors; (4) 20% of the Area Chairs had never served before in a major conference; (5) The Area Chair selection process made all possible efforts to achieve a reasonable geographic distribution between countries, thematic areas and trends in computer vision. Each Area Chair was assigned by the Program Chairs between 28–32 papers. Based on paper content, the Area Chair recommended up to seven potential reviewers per paper. Such assignment was made using all reviewers in the database including the conflicting ones. The Program Chairs manually entered the missing conflict domains of approximately 300 reviewers. Based on the recommendation of the Area Chairs, three reviewers were selected per paper (with at least one being of the top three suggestions), with 99.

Web Information Systems and Mining Zhiguo Gong, Xiangfeng Luo, Junjie Chen, Jingsheng Lei, Fu Lee Wang, 2011-09-06 The twovolume set LNCS 6987 and 6988 constitutes the refereed proceedings of the International Conference on Web Information Systems and Mining, WISM 2011, held in Taiyuan, China, in September 2011. The 112 revised full papers presented were carefully reviewed and selected from 472 submissions. The second volume includes 56 papers organized in the following topical sections: management information systems; semantic Web and ontologies; Web content mining; Web information classification; Web information extraction; Web intelligence; Web interfaces and applications; Web services and elearning; and XML and semi-structured data.

Fuzzy Sets and Their Extensions: Representation, Aggregation and Models Humberto Bustince, Francisco Herrera, Javier Montero,2007-10-30 This carefully edited book presents an up-to-date state of current research in the use of fuzzy sets and their extensions. It pays particular attention to foundation issues and to their application to four important areas where fuzzy sets are seen to be an important tool for modeling and solving problems. The book's 34 chapters deal with the subject with clarity and effectiveness. They include four review papers introducing some non-standard representations

Mobile Web Information Systems Irfan Awan,Muhammad Younas,Xavier Franch,Carme Quer,2014-08-19 This book constitutes the refereed proceedings of the 11th International Conference on Mobile Web and Information Systems, MobiWIS 2014, held in Barcelona, Spain, in August 2014. The 24 papers presented were carefully reviewed and selected from 75 submissions and cover topics such as: mobile software systems, middleware/SOA for mobile systems, context- and location-aware services, data management in the mobile web, mobile cloud services, mobile web of things, mobile web security, trust and privacy, mobile networks, protocols and applications, mobile commerce and business services, HCI in mobile applications, social media, and adaptive approaches for mobile computing.

Business Information Systems Muneesh Kumar,2009-11-01 With its emphasis on the managerial aspects of information systems, this book identifies the role of a manager in the process of planning, designing and developing IT infrastructure. It highlights the latest information in business systems and guides the reader on the various potent issues, their implications and possible solutions.

Colouring Meaning Gill Philip,2011 Primarily focused on idioms

and other figurative phraseology, Colouring Meaning describes how the meanings of established phrases are enhanced, refocused and modified in everyday language use. Unlike many studies of creativity in language, this book-length survey addresses the matter at several levels, from the purely linguistic level of collocation, through its abstractions in colligation and semantic preference, to semantic prosody and connotation. This journey through both linguistic and cognitive levels involves the examination of habitual language and its exploitations, both mundane and colourful, explaining the phenomena observed in terms of current psycholinguistic research as well as corpus linguistics theory and analysis. The relationships between meaning in text and meaning in the mind are discussed at length and extensively illustrated with worked case studies to offer the reader a comprehensive overview of metaphorical and other secondary meanings as they emerge in real-world communicative situations.

<u>On Fuzziness</u> Rudolf Seising, Enric Trillas, Claudio Moraga, Settimo Termini, 2012-12-15 The notion of Fuzziness stands as one of the really new concepts that have recently enriched the world of Science. Science grows not only through technical and formal advances on one side and useful applications on the other side, but also as consequence of the introduction and assimilation of new concepts in its corpus. These, in turn, produce new developments and applications. And this is what Fuzziness, one of the few new concepts arisen in the XX Century, has been doing so far. This book aims at paying homage to Professor Lotfi A. Zadeh, the "father of fuzzy logic" and also at giving credit to his exceptional work and personality. In a way, this is reflected in the variety of contributions collected in the book. In some of them the authors chose to speak of personal meetings with Lotfi; in others, they discussed how certain papers of Zadeh were able to open for them a new research horizon. Some contributions documented results obtained from the author/s after taking inspiration from a particular idea of Zadeh, thus implicitly acknowledging him. Finally, there are contributions of several "third generation fuzzysists or softies" who were firstly led into the world of Fuzziness by a disciple of Lotfi Zadeh, who, following his example, took care of opening for them a new road in science. Rudolf Seising is Adjoint Researcher at the European Centre for Soft Computing in Mieres, Asturias (Spain). Enric Trillas and Claudio Moraga are Emeritus Researchers at the European Centre for Soft Computing, Mieres, Asturias (Spain). Settimo Termini is Professor of Theoretical Computer Science at the University of Palermo, Italy and Affiliated Researcher at the European Centre for Soft Computing, Mieres, Asturias (Spain)

Morphological Productivity Ingo Plag,2012-10-25 The future of English linguistics as envisaged by the editors of Topics in English Linguistics lies in empirical studies which integrate work in English linguistics into general and theoretical linguistics on the one hand, and comparative linguistics on the other. The TiEL series features volumes that present interesting new data and analyses, and above all fresh approaches that contribute to the overall aim of the series, which is to further outstanding research in English linguistics.

<u>Graph-Theoretic Techniques for Web Content Mining</u> Adam Schenker, Abraham Kandel, Horst Bunke, Mark Last, 2005-05-31 This book describes exciting new opportunities for utilizing robust graph representations of data with common machine learning algorithms. Graphs can model additional information which is often not present in commonly used data representations, such as vectors. Through the use of graph distance — a relatively new approach for determining graph similarity — the authors show how well-known algorithms, such as k-means clustering and k-nearest neighbors classification, can be easily extended to work with graphs instead of vectors. This allows for the utilization of additional information found in graph representations, while at the same time employing well-known, proven algorithms. To demonstrate and investigate these novel techniques, the authors have selected the domain of web content mining, which involves the clustering and classification of web documents based on their textual substance. Several methods of representing web document content by graphs are introduced; an interesting feature of these representations is that they allow for a polynomial time distance computation, something which is typically an NP-complete problem when using graphs. Experimental results are reported for both clustering and classification in three web document collections using a variety of graph representations, distance measures, and algorithm parameters. In addition, this book describes several other related topics, many of which provide excellent starting points for researchers and students interested in exploring this new area of machine learning further. These topics include creating graph-based multiple classifier ensembles through random node selection and visualization of graphbased data using multidimensional scaling. Living in Chaos Survival Betty Jo Hilger, 2004-07-01 Life is not just sweetness, it is a journey. Mountains and valleys, laughter and tears, when the stresses faced by your child are more than a stage... This is the story of one mother's struggle to adjust to and accept the reality of facing her adopted son's life being challenged by BIPOLAR DISORDER, FETAL ALCOHOL SYNDROME, and REACTIVE ATTACHMENT DISORDER. Then finding that her birth-son's life is being irrevocably changed by the devastation of SCHIZOPHRENIA... It is a story of spiritual struggle and tested faith, as forced to hospitalize her son, she faced the tragedy and torment, the heights of hope, and the depths of despair as she searches to find a meaning, a reason, a knowledge about these diagnoses' and treatments, and a positive end to this disease... Recorded introspection and inspiration in the form of poetry, short stories, and reminiscences... This is the story of: Questioning Life Questioning God Questioning Hope and Questioning the limits of Love...

<u>Grid and Cooperative Computing. Part 2</u> Minglu Li,2004-04-28 The two-volume set LNCS 3032 and LNCS 3033 constitute the thoroughly refereed post-proceedings of the Second International Workshop on Grid and Cooperative Computing, GCC 2003, held in Shanghai, China in December 2003. The 176 full papers and 173 poster papers presented were carefully selected from a total of over 550 paper submissions during two rounds of reviewing and revision. The papers are organized in topical sections on grid applications; peer-topeer computing; grid architectures; grid middleware and toolkits; Web security and Web services; resource management, scheduling, and monitoring; network communication and information retrieval; grid QoS; algorithms, economic models, and theoretical models of the grid; semantic grid and knowledge grid; remote data access, storage, and sharing; and computer-supported cooperative work and cooperative middleware.

Lady of the Tarot Juli D. Revezzo,2016-09-27 WHAT THE CARDS FORETELL MAY BE REAL, AFTER ALL 1793: Having escaped the Reign of Terror, Emilie Maigny took refuge in England, trying to come to grips with the life and loss she left behind. When her brother, Sinjon, returns, a terrifying evil swoops down upon her. Nightmares plague her now, providing strange clues ... but to what? Scottish-born Linton Morrison spent his entire life in luxury, whiling away the hours in intense study of the tarot and the cards' hidden meanings, but until he met the lovely Emilie Maigny, he would never have guessed how important his study might be--to his life and Emilie's survival when terrible evil strikes. A Cypher is all Emilie needs, but what is it? Is Linton the key? He may charm her heart-and he may be her only salvation.

FAQs About Www.querysoft.es Books

What is a Www.querysoft.es PDF? A PDF (Portable Document Format) is a file format developed by Adobe that preserves the layout and formatting of a document, regardless of the software, hardware, or operating system

used to view or print it. How do I create a Www.querysoft.es **PDF**? There are several wavs to create a PDF: Use software like Adobe Acrobat, Microsoft Word, or Google Docs, which often have built-in PDF creation tools. Print to PDF: Many applications and operating systems have a "Print to PDF" option that allows you to save a document as a PDF file instead of printing it on paper. Online converters: There are various online tools that can convert different file types to PDF. How do I edit a Www.querysoft.es **PDF?** Editing a PDF

can be done with software like Adobe Acrobat, which allows direct editing of text, images, and other elements within the PDF. Some free tools, like PDFescape or Smallpdf, also offer basic editing capabilities. How do I convert a Www.querysoft.es PDF to another file format? There are multiple ways to convert a PDF to another format: Use online converters like Smallpdf, Zamzar, or Adobe Acrobats export feature to convert PDFs to formats like Word, Excel, JPEG, etc. Software like Adobe Acrobat. Microsoft Word, or

other PDF editors may have options to export or save PDFs in different formats. How do I passwordprotect a Www.querysoft.es PDF? Most PDF editing software allows you to add password protection. In Adobe Acrobat, for instance, you can go to "File" -> "Properties" -> "Security" to set a password to restrict access or editing capabilities. Are there any free alternatives to Adobe Acrobat for working with PDFs? Yes, there are many free alternatives for working with PDFs, such as: LibreOffice: Offers PDF editing features. PDFsam:

Allows splitting, merging, and editing PDFs. Foxit Reader: Provides basic PDF viewing and editing capabilities. How do I compress a PDF file? You can use online tools like Smallpdf, ILovePDF, or desktop software like Adobe Acrobat to compress PDF files without significant quality loss. Compression reduces the file size, making it easier to share and download. Can I fill out forms in a PDF file? Yes, most PDF viewers/editors like Adobe Acrobat, Preview (on Mac), or various online tools allow you to fill out forms in PDF files by selecting text fields and entering

information. Are there any restrictions when working with PDFs? Some PDFs might have restrictions set by their creator, such as password protection, editing restrictions, or print restrictions. Breaking these restrictions might require specific software or tools, which may or may not be legal depending on the circumstances and local laws.
