Martin Rosenberg

Raphael and France Martin Rosenberg, 1995 Focusing on French art and theory from the classical to the Romantic era, *Raphael and France* is part of the ongoing revision of views of that period which has been taking place for the last twenty years. The book demonstrates that the shifts from classical to Rococo to neo-classical aesthetics were not as abrupt or as all-encompassing as has been assumed. By tracing the continuity and transformation of the classical ideal, with Raphael's art and image as central paradigms, Rosenberg achieves a broader, more accurate, and comprehensive view of French artistic developments during this period.

Raphael's Astronomical Ephemeris of the Planets' Places for ..., 1883

The Biographical Landscapes of Raphael Lemkin Piotr Madajczyk, 2023-11-03 The book is the first biography of Raphael Lemkin to draw on a comprehensive body of research into Lemkin as a person and his background and will be of interest to both non-specialists and academics. Drawing on archival materials, a nuanced description is provided of the ethnically mixed Belarusian-Polish-Jewish border region where Lemkin grew up and which shaped him, clarifying at the same time some of the misinterpretations that have surrounded Lemkin's life. Lemkin's professional career and intellectual interests up to the time of his flight from Poland after the German aggression of 1939 are exhaustively described. In the latter part of the book, the author poses, among other things, the question of how Lemkin's activities in the United States were influenced by the experience of the first almost 40 years of his life.

Raphael's Ostrich Una Roman D'Elia, 2016-04-27 *Raphael's Ostrich* begins with a little-studied aspect of Raphael's painting—the ostrich, which appears as an attribute of Justice, painted in the Sala di Costantino in the Vatican. *Una Roman D'Elia* traces the cultural and artistic history of the ostrich from its appearances in ancient Egyptian hieroglyphs to the menageries and grotesque ornaments of sixteenth-century Italy. Following the complex history of shifting interpretations given to the ostrich in scientific, literary, religious, poetic, and satirical texts and images, D'Elia demonstrates the rich variety of ways in which people made sense of this living “monster,” which was depicted as the embodiment of heresy, stupidity, perseverance, justice, fortune, gluttony, and other virtues and vices. Because Raphael was revered as a god of art, artists imitated and competed with his ostrich, while religious and cultural critics complained about the potential for misinterpreting such obscure imagery. This book not only considers the history of the ostrich but also explores how Raphael's painting forced viewers to question how meaning is attributed to the natural world, a debate of central importance in early

modern Europe at a time when the disciplines of modern art history and natural history were developing. The strangeness of Raphael's ostrich, situated at the crossroads of art, religion, myth, and natural history, both reveals lesser-known sides of Raphael's painting and illuminates major cultural shifts in attitudes toward nature and images in the Renaissance. More than simply an examination of a single artist or a single subject, Raphael's Ostrich offers an accessible, erudite, and charming alternative to Vasari's pervasive model of the history of sixteenth-century Italian art.

Raphael Lemkin and the Concept of Genocide Douglas Irvin-Erickson, 2017 Raphaël Lemkin was one of the twentieth century's most influential human rights figures, coining the word genocide in 1942 and working to embed the idea into international law. This book sheds new light on the concept of genocide, exploring the connection between Lemkin's philosophical writings, juridical works, and politics.

Raphael Nicholas Penny, 2016-04-01 The Italian painter, draughtsman, and architect known as Raphael has always been acknowledged as one of the greatest European artists. In his own time he was one of the most famous painters working in Italy during the High Renaissance, commissioned to create celebrated altarpieces and devotional paintings, and to decorate the papal apartments in the Vatican Palace. This fully illustrated and comprehensive Grove Art Essentials title covers Raphael's life and prolific artistic career, exploring the development of his style and technique as well as his later critical reception.

The Histories of Raphael Samuel Sophie Scott-Brown, 2017-05-12 In the first integrated biographical study of his work, this book situates British historian Raphael Samuel (1934–1996) in relation to his distinctive form of activist politics as they developed from youthful Cold War communism to the first British New Left, 1960s radicalism to the 1980s history wars. As the catalyst behind the History Workshop movement, Samuel championed the democratisation of history-making and practised an eclectic form of people's history in his own work. His unique approach was controversial, drawing impassioned responses from across the ideological spectrum, the most sustained critique often coming from his left-wing contemporaries. It is argued here that this compelling figure has been unjustly neglected and that he continues to offer important insights into the politics of history-making in a post-

Marxist world.

Woman's Home Companion, 1924

Archangel Raphael Mary LaSota,

Between Raphael and Galileo Alexander Marr, 2022-08-22 Although largely unknown today, during his lifetime Mutio Oddi of Urbino (1569–1639) was a highly esteemed scholar, teacher, and practitioner of a wide range of disciplines related to mathematics. A prime example of the artisan-scholar so prevalent in the late Renaissance, Oddi was also accomplished in the fields of civil and military architecture and the design and retail of mathematical instruments, as well as writing and publishing. In *Between Raphael and Galileo*, Alexander Marr resurrects the career and achievements of Oddi in order to examine the ways in which mathematics, material culture, and the book shaped knowledge, society, and the visual arts in late Renaissance Italy. Marr scrutinizes the extensive archive of Oddi papers, documenting Oddi's collaboration with prominent intellectuals and officials and shedding new light on the practice of science and art during his day. What becomes clear is that Oddi, precisely because he was not spectacularly innovative and did not attain the status of a hero in modern science, is characteristic of the majority of scientific practitioners and educators active in this formative age, particularly those whose energetic popularization of mathematics laid the foundations for the Scientific Revolution. Marr also demonstrates that scientific change in this era was multivalent and contested,

governed as much by friendship as by principle and determined as much by places as by purpose. Plunging the reader into Oddi's world, *Between Raphael and Galileo* is a finely wrought and meticulously researched tale of science, art, commerce, and society in the late sixteenth and early seventeenth century. It will become required reading for any scholar interested in the history of science, visual art, and print culture of the Early Modern period.
